[Edit](#)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area		Microsoft	
Statements	Yes	No

**Answer:**

Answer Area		Microsoft	
Statements	Yes	No

The sensitivity label can be applied only to documents that contain the word rebranding.	<input type="radio"/>	<input checked="" type="radio"/>	

Statement 1 - No. The sensitivity label includes content marking (watermark: INTERNAL), but it only applies to documents where the label is manually or automatically applied, not to all documents by default.

Statement 2 - No. The sensitivity label only specifies a watermark, not a header. If a header marking was configured, it would explicitly appear in the label settings.

Statement 3 - No. There is no indication that auto-labeling is configured to apply the label only to documents with the word "rebranding". Auto-labeling is an optional setting that needs explicit configuration.

#### NEW QUESTION # 24

You need to meet the technical requirements for the creation of the sensitivity labels.

To which user or users must you assign the Sensitivity Label Administrator role?

- A. Admin1, Admin2, and Admin3 only
- B. Admin1 only
- C. Admin1 and Admin5 only
- D. Admin1, Admin2, Admin4, and Admin5 only
- E. Admin1 and Admin4 only

**Answer: A**

Explanation:

To meet the requirement that all administrative users must be able to create Microsoft 365 sensitivity labels, we need to assign the

Sensitivity Label Administrator role to the correct users.

Sensitivity Label Administrator Role Responsibilities

This role allows users to:

# Create and manage sensitivity labels in Microsoft Purview.

# Publish and configure auto-labeling policies.

# Modify label encryption and content marking settings.

Review of Admin Roles from the Table:

A screenshot of a computer AI-generated content may be incorrect.

Admin	Role Assigned	Can Create Sensitivity Labels?

Admin2	Compliance Data Administrator	<input type="checkbox"/> Yes, can manage compliance data, including labels.
Admin3	Compliance Administrator	<input type="checkbox"/> Yes, has full compliance management, including labels.
Admin4	Security Operator	<input type="checkbox"/> No, this role is focused on security alerts and response.
Admin5	Security Administrator	<input type="checkbox"/> No, primarily focused on security policies and threat management.

Users that must be assigned the Sensitivity Label Administrator role:

# Admin2 (Compliance Data Administrator)

# Admin3 (Compliance Administrator)

# Admin1 (Global Reader) (should be assigned this role to fulfill the requirement that all admins can create labels).
