The experts in our company have been focusing on the PL-600 examination for a long time and they never overlook any new knowledge. The content of our PL-600 study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our PL-600 Study Guide. We will inform you by E-mail when we have a new version. We can ensure you a pass rate as high as 99%. If you don't pass the PL-600 exam, you will get a refund. Why not study and practice for just 20 to 30 hours and then pass the examination?

The PL-600 Certification Exam is a comprehensive exam that requires thorough preparation. Microsoft recommends that candidates have hands-on experience with the platform before taking the exam. This can be achieved through training courses, self-study, and practical experience. Microsoft also provides study materials such as exam guides, practice tests, and online training courses to help candidates prepare for the exam.

## Updated New Guide PL-600 Files - High Hit Rate Source of PL-600 Exam

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take PL-600 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our PL-600 Study Materials will be your right choice.

The PL-600 Exam is intended for solution architects, functional consultants, developers, and IT professionals who have experience

working with the Microsoft Power Platform. PL-600 exam measures your ability to design and implement solutions that meet business requirements, integrate with other systems and platforms, and leverage the full capabilities of the Power Platform. Successful candidates are able to provide guidance and recommendations to stakeholders, translate business requirements into technical solutions, and optimize the performance and scalability of Power Platform solutions.

## Microsoft Power Platform Solution Architect Sample Questions (Q84-Q89):

### NEW QUESTION # 84

A company plans to implement a model-driven app. The company has the following requirements:

- \* Short Message Service (SMS) data must be visible on the model-driven app timeline.
- \* Store location data must be referenced from a SQL server database.
- \* Customer data must be audited and only edited by specific users.

You need to recommend the table type for each requirement.

Which table types should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Solutions**

- Virtual – organization owned
- Custom – user or team owned
- Custom – organization owned
- Activity – user or team owned

**Requirement**

- SMS data
- Store location data
- Customer data

**Solution**

- 
- 
- 

**Answer:**

**Explanation:**

**Solutions**

- Virtual – organization owned
- Custom – user or team owned
- Custom – organization owned
- Activity – user or team owned

**Requirement**

- SMS data
- Store location data
- Customer data

**Solution**

- Activity – user or team owned
- Custom – organization owned
- Custom – user or team owned

**Explanation:**

**Solutions**

- Virtual – organization owned
- Custom – user or team owned
- Custom – organization owned
- Activity – user or team owned

**Requirement**

- SMS data
- Store location data
- Customer data

**Solution**

- Activity – user or team owned
- Custom – organization owned
- Custom – user or team owned

### NEW QUESTION # 85

You are designing a Power Platform solution.

The company wants its development team to adopt the construction of repeatable components for its implementation team to reuse on different entities and forms.

You need to recommend a technology that meets these requirements.

Which technology would you recommend the developers adopt to assist the implementation team?

- A. Power Apps Component Framework control
- B. Web resource
- C. JavaScript
- D. Canvas app

**Answer: A**

**Explanation:**

Power Apps component framework empowers professional developers and app makers to create code components for model-

driven and canvas apps (public preview) to provide enhanced user experience for the users to work with data on forms, views, and dashboards.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

### NEW QUESTION # 86

A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.

The company reports the following data quality issues with the existing solution:

Users often encounter a character limit when entering data.

The database includes multiple instances of duplicate records.

You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	<ul style="list-style-type: none"><li>Define a data mask.</li><li>Define and implement duplicate detection rules.</li><li>Define the data type and format for each column.</li></ul>
The database includes multiple instances of some records.	<ul style="list-style-type: none"><li>Define requirements for data entry.</li><li>Define and implement duplicate detection rules.</li><li>Define the data type and format for each column.</li></ul>

Answer:

Explanation:

Issue	Solution
Users often encounter a character limit when entering data.	<ul style="list-style-type: none"><li>Define a data mask.</li><li>Define and implement duplicate detection rules.</li><li>Define the data type and format for each column.</li></ul>
The database includes multiple instances of some records.	<ul style="list-style-type: none"><li>Define requirements for data entry.</li><li>Define and implement duplicate detection rules.</li><li>Define the data type and format for each column.</li></ul>

Explanation

Graphical user interface, text, application Description automatically generated

### Issue

Users often encounter a character limit when entering data.

### Solution

- Define a data mask.
- Define and implement duplicate detection rules.
- Define the data type and format for each column.

The database includes multiple instances of some records.

- Define requirements for data entry.
- Define and implement duplicate detection rules.
- Define the data type and format for each column.

Box 1: Define the data type and format for each column  
Increase the data type size of the column.

Box 2: Define and implement duplicate detection rules

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-duplicate-detection-rules-keep-data-clean>

### NEW QUESTION # 87

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

\* Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

\* An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

**Integration requirement**

Have read-only visibility of data from an external Azure SQL database.

**Solutions**

- Use virtual tables.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

Microsoft

External system sends data to Dynamics 365 Sales.

Answer:

Explanation:

Answer Area

**Integration requirement**

Have read-only visibility of data from an external Azure SQL database.

**Solutions**

- Use virtual tables.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Microsoft

**NEW QUESTION # 88**

You are a Microsoft Power Platform architect.

You need to design a process to transport configuration and test data from one environment to a separate environment. Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

**Explanation:**

**Explanation:**
