## CV0-004 Latest Test Format | CV0-004 Exam Learning

As you can find on our website, there are three different versions of our CV0-004 exam questions: the PDF, Software and APP online. I love the PDF version of CV0-004 learning guide the best. The PDF files carry all the exam questions and answers, and it is printable. Our dedicated expert team keeps the material updated and upgrades the material, as and when required. The CV0-004 Exam PDF file is portable which can be carries away everywhere easily and also it can be printed.

## CompTIA Cloud+ (2025) Sample Questions (Q29-Q34):

### NEW QUESTION # 29

A cloud solutions architect needs to have consistency between production, staging, and development environments. Which of the following options will best achieve this goal?

- A. Using Grafana in each environment
- **B. Using Terraform templates with environment variables**
- C. Using Jenkins agents in different environments
- D. Using the ELK stack in each environment

**Answer: B**

Explanation:

Terraform templates with environment variables can ensure consistency across different environments such as production, staging, and development. Terraform allows for infrastructure as code, which can be used to define and maintain infrastructure with consistency.

**NEW QUESTION # 30**

A developer is building an application that has multiple microservices that need to communicate with each other. The developer currently manually updates the IP address of each service. Which of the following best resolves the communication issue and automates the process?

- A. Managed container services
- B. DNS
- **C. Service discovery**
- D. Fan-out

**Answer: C**

Explanation:

Service discovery is a key component in microservices architectures, allowing services to dynamically discover and communicate with each other. By implementing service discovery, the developer can automate the process of updating service addresses, resolving the communication issue without manual updates to IP addresses, thus ensuring seamless interaction between the microservices.

**NEW QUESTION # 31**

An administrator configures three subnets to the corporate network. All servers should communicate with the main corporate network and access the internet. The administrator creates the following configurations:

| Network           | Subnet          |
|-------------------|-----------------|
| Corporate Network | 192.168.0.0/24  |
| Network 2         | 192.168.10.0/24 |
| Network 3         | 192.168.11.0/24 |
| Network 4         | 192.168.12.0/24 |

Routing Table:

| Source          | Destination    |
|-----------------|----------------|
| 192.168.10.0/24 | 192.168.0.0/24 |
| 192.168.11.0/24 | 192.168.0.0/24 |
| 192.168.12.0/24 | 192.168.1.0/24 |
| 192.168.13.0/24 | 192.168.1.0/24 |

After configuring the networks, the administrator recognizes an issue with the configuration. Which of the following can the administrator change in one step to accomplish the goal?

- A. Add source 192.168.12.0/24 and destination 192.168.0.0/24 to the routing table.
- **B. Replace destination 192.168.1.0/24 with destination 192.168.0.0/24.**
- C. Remove source 192.168.12.0/24 and destination 192.168.1.0/24 from the routing table.
- D. Reconfigure Network 4 to 192.168.13.0/24.

**Answer: B**

**NEW QUESTION # 32**

A cloud engineer needs to determine a scaling approach for a payroll-processing solution that runs on a biweekly basis. Given the

complexity of the process, the deployment to each new VM takes about 25 minutes to get ready. Which of the following would be the best strategy?

- A. Trending
- B. Event
- C. Horizontal
- D. Scheduled

**Answer: D**

Explanation:

For a biweekly payroll-processing solution that takes a significant amount of time to deploy to each new VM, the best scaling strategy is Scheduled scaling. This strategy involves preparing new instances in advance of when they are needed based on a known schedule, which in this case is the biweekly payroll process. By scheduling the scaling actions in advance, the cloud engineer ensures that the resources are ready when needed without incurring extra costs for running them all the time.

#### **NEW QUESTION # 33**

A company wants to use a solution that will allow for quick recovery from ransomware attacks, as well as intentional and unintentional attacks on data integrity and availability. Which of the following should the company implement that will minimize administrative overhead?

- A. Off-site backups
- B. Volume snapshots
- C. Data replication
- D. Object versioning

**Answer: B**

Explanation:

Implementing volume snapshots is an effective solution for quick recovery from ransomware attacks and protecting data integrity and availability. Snapshots capture the state of a storage volume at a point in time and can be used to restore data quickly with minimal administrative overhead. References: Data protection strategies like volume snapshots are discussed under cloud data management and protection in the CompTIA Cloud+ objectives.

#### **NEW QUESTION # 34**

.....

The Prep4pass is a leading and trusted platform that has been assisting the CV0-004 exam candidates since its beginning. Over this long time period, Prep4pass has helped countless candidates in their preparation and enabled them to pass the final CV0-004 Exam easily. The Prep4pass offers real, valid, and updated CompTIA Exam Questions.
