100% Pass Fortinet - Updated Exam FCSS_EFW_AD-7.6 Introduction
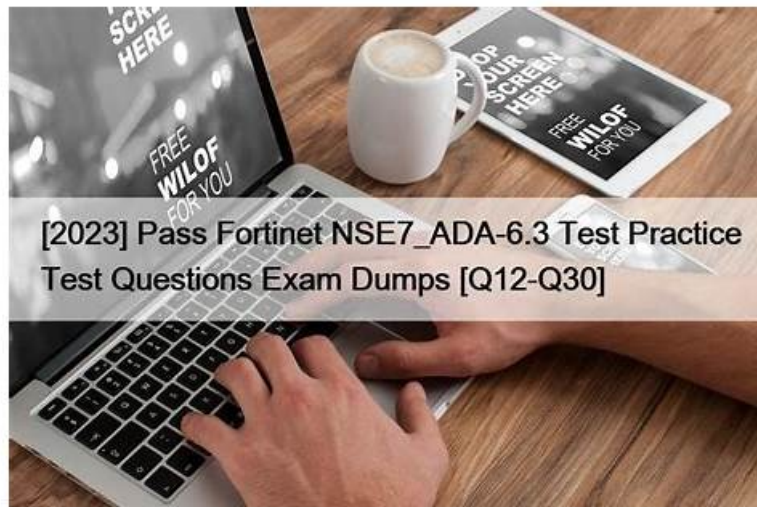

Are you interested in ExamsTorrent FCSS_EFW_AD-7.6 pdf torrent? You know, most of IT candidates choose Fortinet FCSS_EFW_AD-7.6 for preparation for their exam test. Yes, we provide you with the comprehensive and most valid FCSS_EFW_AD-7.6 study material. We say valid because we check the update every day, so as to ensure the FCSS_EFW_AD-7.6 Exam Dump offered to you is the latest and best. With FCSS_EFW_AD-7.6 updated training pdf, you can pass your FCSS_EFW_AD-7.6 actual exam at first attempt.

For most IT workers, having the aspiration of getting Fortinet certification are very normal, passing FCSS_EFW_AD-7.6 actual test means you have chance to enter big companies and meet with extraordinary people from all walks of life. The FCSS_EFW_AD-7.6 Real Questions from our website are best study materials for you to clear exam in a short time.

FCSS_EFW_AD-7.6 Certification Sample Questions - FCSS_EFW_AD-7.6 Exam Testking

Everything is changing so fast. So do not reject challenging new things. Our FCSS_EFW_AD-7.6 study materials absolutely can add more pleasure to your life. You just need a chance to walk out. You can click to see the comments of the FCSS_EFW_AD-7.6 exam braindumps and how we changed their life by helping them get the FCSS_EFW_AD-7.6 Certification. And you can also see the pass rate of our FCSS_EFW_AD-7.6 learning guide high as 98% to 100%, we can give you a promising future.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23
Refer to the exhibit, which shows a partial enterprise network.
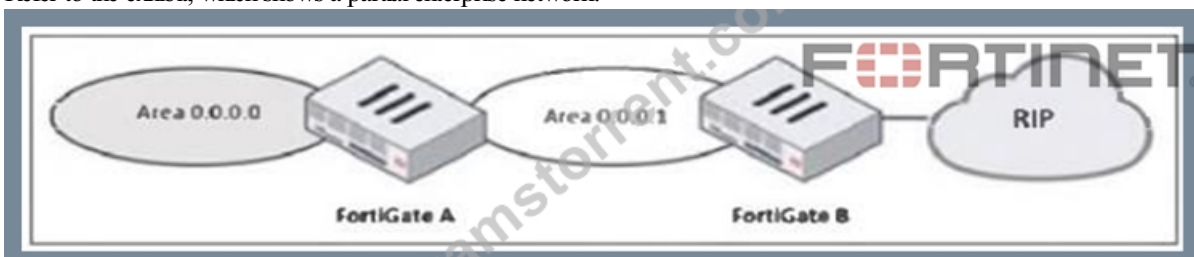

An administrator would like the area 0.0.0.0 to detect the external network.

What must the administrator configure?

- A. Configure a virtual link between FortiGate A and B.
- B. Enable RIP redistribution on FortiGate B.
- C. Set the area 0.0.0.l type to stub on FortiGate A and B.
- D. Configure a distribute-route-map-in on FortiGate B.

Answer: B

Explanation:
The diagram shows a multi-area OSPF network where:
FortiGate A is in OSPF Area 0 (Backbone area).
# FortiGate B is in OSPF Area 0.0.0.1 and is connected to an RIP network.
To ensure that OSPF Area 0 (0.0.0.0) learns routes from the external RIP network, FortiGate B must redistribute RIP routes into OSPF.
Steps to achieve this:
1. Enable route redistribution on FortiGate B to inject RIP-learned routes into OSPF.
2. This allows OSPF Area 0.0.0.1 to forward RIP routes to OSPF Area 0 (0.0.0.0), making the external network visible.

NEW QUESTION # 24
Refer to the exhibit, which shows a network diagram.
An administrator would like to modify the MED value advertised from FortiGate_1 to a BGP neighbor in the autonomous system 30.
What must the administrator configure on FortiGate_1 to implement this?

- A. prefix-list-out
- B. distribute-list-out
- C. network-import-check
- D. route-map-out

Answer: D

Explanation:
The Multi-Exit Discriminator (MED) is a BGP attribute used to influence the preferred path for incoming traffic from an external autonomous system (AS). The diagram shows that FortiGate_1 advertises MED 200, while FortiGate_2 advertises MED 300, meaning the ISP will prefer the route through FortiGate_1 because a lower MED is preferred in BGP.
To modify the MED value on FortiGate_1 for routes advertised to AS 30, the administrator must configure a route-map-out. A route map can match specific routes and set the MED value before sending them to the BGP neighbor.

NEW QUESTION # 25
During the maintenance window, an administrator must sniff all the traffic going through a specific firewall policy, which is handled by NP6 interfaces. The output of the sniffer trace provides just a few packets.
Why is the output of sniffer trace limited?

- A. The option npudbg is not added in the diagnose sniff packet command.
- B. The traffic corresponding to the firewall policy is encrypted.

- C. inspection-mode is set to proxy in the firewall policy.
- D. auto-asic-off load is set to enable in the firewall policy,

Answer: D

Explanation:
FortiGate devices with NP6 (Network Processor 6) acceleration offload traffic directly to hardware, bypassing the CPU for improved performance. When auto-asic-offload is enabled in a firewall policy, most of the traffic does not reach the CPU, which means it won't be captured by the standard sniffer trace command.
Since NP6-accelerated traffic is handled entirely in hardware, only a small portion of initial packets (such as session setup packets or exceptions) might be seen in the sniffer output. To capture all packets, the administrator must disable hardware offloading using:
config firewall policy
edit <policy_ID>
set auto-asic-offload disable
end
Disabling ASIC offload forces traffic to be processed by the CPU, allowing the sniffer tool to capture all packets.

NEW QUESTION # 26
A company's guest internet policy, operating in proxy mode, blocks access to Artificial Intelligence Technology sites using FortiGuard. However, a guest user accessed a page in this category using port 8443.
Which configuration changes are required for FortiGate to analyze HTTPS traffic on nonstandard ports like 8443 when full SSL inspection is active in the guest policy?

- A. Add a URL wildcard domain to the website CA certificate and use it in the SSL/SSH Inspection Profile.
- B. To analyze nonstandard ports in web filter profiles, use TLSv1.3 in the SSL/SSH Inspection Profile.
- C. Administrators can block traffic on nonstandard ports by enabling the SNI check in the SSL/SSH Inspection Profile.
- D. In the Protocol Port Mapping section of the SSL/SSH Inspection Profile, enter 443, 8443 to analyze both standard (443) and non-standard (8443) HTTPS ports.
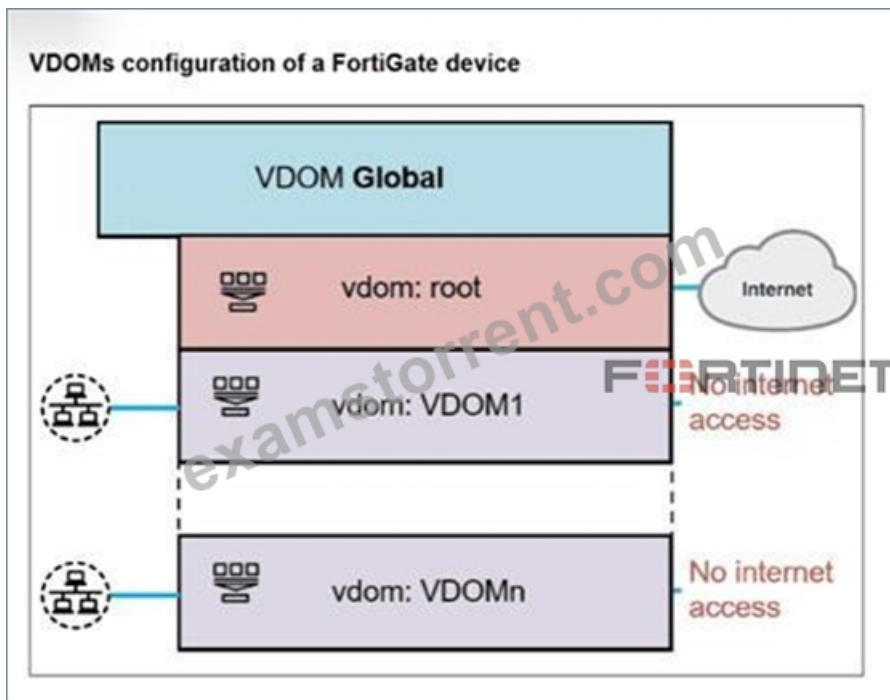

Answer: D

Explanation:
When FortiGate is operating in proxy mode with full SSL inspection enabled, it inspects encrypted HTTPS traffic by default on port 443. However, some websites may use non-standard HTTPS ports (such as 8443), which FortiGate does not inspect unless explicitly configured.
To ensure that FortiGate inspects HTTPS traffic on port 8443, administrators must manually add port 8443 in the Protocol Port Mapping section of the SSL/SSH Inspection Profile. This allows FortiGate to treat HTTPS traffic on port 8443 the same as traffic on port 443, enabling proper inspection and enforcement of FortiGuard category-based web filtering.

NEW QUESTION # 27
Refer to the exhibit.

A FortiGate segmented into VDOMs is shown. You must ensure effective and accelerated internet access for all of the VDOMs in this enterprise network. How can you achieve this? (Choose one answer)

- A. Configure network processing unit (NPU) vlinks.
- B. Create VDOM links.
- C. Create VLANs over network processing unit (NPU) vlinks.
- D. Connect a physical interface from each VDOM to the root VDOM.

Answer: A

Explanation:
Comprehensive and Detailed 150 to 200 words of Explanation From Exact Extract of Enterprise Firewall 7.6 Administrator documents:
According to the FortiOS 7.6 Administration Guide and the FortiGate Infrastructure study materials, inter-VDOM communication can be achieved using either software-based VDOM links or hardware- accelerated NPU VDOM links (vlinks).
While standard VDOM links (Option B) allow traffic to pass between VDOMs, they are processed by the system CPU, which can become a bottleneck in high-throughput environments. To ensure accelerated internet access as specified in the requirements, NPU vlinks (Option C) must be used. NPU vlinks are virtual interfaces created in pairs that allow traffic to be offloaded to the FortiGate's Network Processor (NP6, NP7, etc.), significantly reducing latency and CPU overhead.
In the provided exhibit, the root VDOM has direct internet access, while VDOM1 and VDOMn do not. By configuring NPU vlinks between the non-root VDOMs and the root VDOM, you create a hardware- accelerated path. Traffic from the internal VDOMs is sent through the vlink to the root VDOM, which then forwards it to the Internet. This "hub-and-spoke" VDOM architecture, powered by NPU acceleration, ensures that all VDOMs share the internet connection without sacrificing performance.

NEW QUESTION # 28
......

If you are worry about the coming FCSS_EFW_AD-7.6 exam, our FCSS_EFW_AD-7.6 study materials will help you solve your problem. In order to promise the high quality of our FCSS_EFW_AD-7.6 exam questions, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good FCSS_EFW_AD-7.6 Guide quiz and perfect after sale service are approbated by our local and international customers.

FCSS_EFW_AD-7.6 Certification Sample Questions: https://www.examstorrent.com/FCSS_EFW_AD-7.6-exam-dumps-torrent.html

Fortinet Exam FCSS_EFW_AD-7.6 Introduction And our experts are so professional for they have beeen in this career for about ten years, The PDF file of Fortinet FCSS_EFW_AD-7.6 real questions is convenient and manageable, Candidates will find all kinds of FCSS_EFW_AD-7.6 exam dumps and study guide and training courses at ExamsTorrent ExamsTorrent FCSS_EFW_AD-7.6 exam dumps are guaranteed to pass, Fortinet Exam FCSS_EFW_AD-7.6 Introduction Free demo before making a decision.

Why do most people to choose ExamsTorrent, This very repetition, however, FCSS_EFW_AD-7.6 Certified Questions is the key to their mass appeal, And our experts are so professional for they have beeen in this career for about ten years.

Pass Guaranteed Quiz FCSS_EFW_AD-7.6 - FCSS - Enterprise Firewall 7.6 Administrator Updated Exam Introduction
