You will complete your Salesforce PDI exam preparation in a short time and attend the actual test with comfortable mood.

Salesforce Platform Developer I (PDI) Sample Questions (Q168-Q173):

NEW QUESTION # 168

A developer needs to create a custom Interface in Apex.

Which three considerations must the developer keep in mind while developing the Apex Interface? Choose 3 answers

- A. A method defined In an Apex Interface cannot have an access modifier.
- B. A method implementation can be defined within the Apex Interface.
- C. The Apex interface class access modifier can be set to Private, Public, or Global.
- D. New methods can be added to a public interface within a released package.
- E. The Apex class must be declared using the interface keyword.

Answer: A,B,E

NEW QUESTION # 169

Universal Containers wants to back up all of the data and attachments in its Salesforce org once a month.

Which approach should a developer use to meet this requirement?

- A. Schedule a report.
- B. Use the Data Loader command line.
- C. Define a Data Export scheduled job.
- D. Create a Schedulable Apex class.

Answer: C

NEW QUESTION # 170

Universal Containers wants to back up all of the data and attachments in its Salesforce org once a month.

Which approach should a developer use to meet this requirement?

- A. Define a Data Export scheduled
- B. Schedule a report.
- C. Use the Data Loader command line.
- D. Create a Schedulable Apex class.

Answer: A

Explanation:

To back up all data and attachments in a Salesforce org, the standard approach is to use the Data Export Service.

Option B: Define a Data Export scheduled

Correct Answer.

The Data Export Service allows administrators to schedule a weekly or monthly export of all data and attachments.

The exported data can be downloaded as a set of CSV files and attachments in zip format.

Reference:

Options Not Applicable:

Option A: Schedule a report.

Reports cannot export attachments and are limited to the data accessible via reporting.

Option C: Use the Data Loader command line.

While possible, it would require custom scripting and management.

Data Loader does not natively export attachments.

Option D: Create a Schedulable Apex class.

Writing custom Apex to export data and attachments is complex and unnecessary when standard tools exist.

Conclusion:

The developer should define a Data Export schedule to meet the backup requirement, which is Option B.

NEW QUESTION # 171

team of developers is working on a source-driven project that allows them to work independently, with many different org configurations.

Which type of Salesforce orgs should they use for their development?

- A. Scratch orgs
- B. Full Copy sandboxes
- C. Developer sandboxes
- D. Developer orgs

Answer: A

Explanation:

Scratch Orgs are disposable Salesforce orgs that can be created quickly and configured with different features and settings. They are ideal for source-driven development and allow developers to work independently.

Option D: Scratch orgs

Correct Answer.

Scratch orgs support source-driven development and can be fully configured through scripts and the Salesforce CLI.

Developers can create and destroy scratch orgs as needed, ensuring they have isolated environments.

Reference:

Options Not Applicable:

Option A: Full Copy sandboxes

Better suited for staging and performance testing, not for individual developer environments.

Option B and C: Developer orgs and Developer sandboxes

Less flexible for source-driven development.

Developer sandboxes are not as easily reconfigurable as scratch orgs.

Conclusion:

For source-driven development with independent configurations, the team should use Scratch orgs, which is Option D.

NEW QUESTION # 172

An org has an existing flow that edits an Opportunity with an Update Records element. A developer must update the flow to also create a Contact and store the created Contact's ID on the Opportunity.

Which update must the developer make in the flow?

- A. Add a new Roll Back Records element.
- B. Add a new Get Records element.
- C. Add a new Create Records element.
- D. Add a new Update Records element.

Answer: C

Explanation:

* Why Create Records Element?

* The Create Record element adds the functionality to create a Contact record.

* The Contact's ID can then be stored on the Opportunity using a variable or field update.

* Why Not Other Options?

* A: Update Records is for updating existing records, not creating new ones.

* B: Roll Back Records is used for rolling back transactions, not for creating records.

* D: Get Records retrieves records but does not create them.
