

AIGP 100% Correct Answers, AIGP Valid Exam Tips

Q **AIGP Practice Test COMPLETE QUESTIONS AND ANSWERS 2024-202**
100% RATED CORRECT, 100% SURE PASS!1
Study online at https://quizlet.com/_gazu1

1. Which of the following are common elements in definitions of AI? A. Technology B. Autonomy C. Human Development D. Data Input	A. Technology B. Autonomy C. Human Development D. Data Input
2. True or False? AI and machine learning mean the same thing and can be used interchangeably?	FALSE
3. An AI system studies a large set of unlabeled data and tries to detect hidden patterns within it. What type of machine learning is being used in this example? A. Forecasting B. Supervised C. Unsupervised D. Reinforcement	C. Unsupervised
4. Which of the following models would be most appropriate for analysis of relationships between two variables? A. Linear/statistical model B. Computer vision C. Reinforcement learning D. Robotics	A. Linear/statistical model
5. When designing and AI system, which considerations impact the choice of the underlying hardware? A. Types of data used in training. B. Complexity of the AI algorithm C. Quality of the data labels D. Whether the data is biased	A. Types of data used in training. B. Complexity of the AI algorithm
6. You have been asked to review the AI project for IAPP/ The AI project has been delivering faulty predictions and corrupt data pipelines. What are possible sources of these issues? Select all that apply. A. Inability to scale B. Data Drift	B. Data Drift C. Bias D. Low data quality

9 / 14

P.S. Free & New AIGP dumps are available on Google Drive shared by PracticeDump: <https://drive.google.com/open?id=1vZvGFnnRXXp2YN-GcEmPCTVqzTv8xymP>

Free update for 365 days for AIGP study guide materials is available. That is to say, in the following year, you can get the latest information of the exam for free. Besides, our system will send the latest version of AIGP exam dumps to your email automatically. And you just need to receive them and carry on your practice. With the experienced experts to compile AIGP Study Guide materials, the quality can be guaranteed. And if you choose us, we will help you pass the exam successfully, and obtaining a certificate isn't a dream.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Topic 2	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 3	<ul style="list-style-type: none"> • Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 4	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.

Quiz IAPP - Accurate AIGP - IAPP Certified Artificial Intelligence Governance Professional 100% Correct Answers

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The AIGP quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The AIGP prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the AIGP qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's AIGP exam. AIGP test material will improve the ability to accurately forecast the topic and proposition trend this year.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31

Business A sells software that provides users with writing and grammar assistance. Business B is a cloud services provider that trains its own AI models.

- * Business A has decided to add generative AI features to their software.
- * Rather than create their own generative AI model, Business A has chosen to license a model from Business B.
- * Business A will then integrate the model into their writing assistance software to provide generative AI capabilities.
- * Business A is most concerned that its writing assistance software could recommend toxic or obscene text to its users.

Which of the following governance processes should Business A take to best protect its users against potentially inappropriate text?

- A. Business A should fine-tune the AI model on user-generated text that has been verified to be appropriate.
- B. Business A should establish a user reporting feature that allows users to flag toxic or obscene text, and report any incidents to Business B.
- C. Business A should ask Business B for detailed documentation on the generative AI model's training data and whether it contained toxic or obscene sources.
- **D. Business A should test that the AI model performs as expected and meets their minimum requirements for filtering toxic or**

obscene text.

Answer: D

Explanation:

Business A is integrating a generative AI model licensed from a third party (Business B) and is primarily concerned with the risk of toxic or obscene outputs being delivered to users. In this scenario, testing and validation of the AI model for such content risks is the most direct and effective governance strategy.

According to the AI Governance in Practice Report 2025, organizations that deploy AI must engage in performance monitoring protocols and ensure systems perform adequately for their intended purposes, including filtering harmful content:

"Operational governance... development of #Performance monitoring protocols to ensure systems perform adequately for their intended purposes." (p. 12)

"Product governance... includes: #System impact assessments to identify and address risk prior to product development or deployment." (p. 11) Furthermore, under the EU AI Act, which sets the global standard many organizations aim to align with, there is a clear obligation to test and monitor systems for potential harmful behavior:

"The act imposes regulatory obligations... such as establishing appropriate accountability structures, assessing system impact, providing technical documentation, establishing risk management protocols and monitoring performance..." (p. 7) Option B directly reflects this best practice of pre-deployment testing and validation to ensure that the model aligns with Business A's minimum content safety requirements.

Let's now evaluate the incorrect options:

* A. Fine-tuning on verified user-generated text may improve model alignment but does not guarantee that the model will generalize correctly, especially if Business A lacks access to model internals (common in third-party licensing scenarios). Fine-tuning also introduces its own risks and may be contractually restricted.

* C. A user reporting feature is reactive, not preventive. While helpful for long-term monitoring and mitigation, it does not prevent the initial harm of toxic outputs, which is Business A's primary concern.

* D. Requesting documentation from Business B is useful for transparency and risk management, but it does not replace independent verification that the model meets Business A's content safety standards.

Thus, testing the model's behavior for unacceptable outputs before deployment is the most aligned approach with AI governance best practices and obligations.

NEW QUESTION # 32

A deployer discovers that a high-risk AI recruiting system has been making widespread errors, resulting in harms to the rights of a considerable number of EU residents who are denied consideration for jobs for improper reasons such as ethnicity, gender and age. According to the EU AI Act, what should the company do first?

- A. Submit an incomplete report to the relevant market authority immediately and follow up with a complete report as soon as possible.
- B. Identify any decisions that may have been improperly made and re-open them for human review.
- C. Conduct a thorough investigation of the serious incident within the 15 day timeline and present the completed report to the relevant market authority.
- D. Notify the provider, the distributor, and finally the relevant market authority of the serious incident.

Answer: D

Explanation:

Under the EU AI Act, serious incidents involving high-risk AI systems must be reported. The deployer is required to promptly inform the provider and relevant authorities about the issue.

From the AI Governance in Practice Report 2024:

"Serious incidents involving high-risk systems... must be reported to the provider and relevant market surveillance authority." (p. 35)

"Timely reporting is required when AI systems result in or may result in violations of fundamental rights." (p.

35)

NEW QUESTION # 33

A US hospital plans to develop an AI that will review available patient data in order to propose an initial diagnosis to licensed physicians. The hospital will implement a policy that requires physicians to consider the AI proposal, but conduct their own physical examinations prior to making a final diagnosis.

An important ethical concern with this plan is?

- A. Whether patients will receive an economic benefit from the use of AI.

- B. Whether physicians understand how the AI works.
- C. Whether the AI will have an error rate comparable to human physicians.
- D. Whether the AI was trained on a representative dataset.

Answer: D

Explanation:

The core ethical concern when deploying diagnostic AI in a healthcare setting is ensuring fairness and accuracy across diverse patient populations. If the AI is trained on a dataset that is not representative of the population it will serve, it risks reinforcing health disparities and leading to misdiagnoses.

From the AI Governance in Practice Report 2024:

"Training datasets lacking in diversity can produce outputs that systematically underperform for certain groups... this can lead to inaccurate or biased outcomes in healthcare settings." (p. 41)

"Bias, discrimination and fairness challenge... inadequate or nonrepresentative training data can result in AI systems that propagate historical disparities." (p. 42) While physician oversight may reduce risk, biased data can still shape clinical decision-making.

* A- Economic benefit is not central to ethical risk here.

* C- Important but less critical than data representativeness.

* D- Error rate matters but is addressed via validation; it's not the core ethical issue.

NEW QUESTION # 34

Scenario:

A financial services company is planning a new AI project to assess creditworthiness. The AI team is mapping out what tasks should be completed during the planning phase of the AI lifecycle.

The planning phase of the AI lifecycle includes all of the following EXCEPT:

- A. Approach to governance
- B. Choice of the architecture
- C. Definition of underlying assumptions
- D. Context in which the model will operate

Answer: B

Explanation:

The correct answer is C. The choice of architecture (e.g., neural networks vs. decision trees) is typically part of the design and development phase, not the initial planning.

From the AIGP Body of Knowledge - AI Lifecycle Module:

"Planning involves scoping, context definition, stakeholder identification, governance planning, and assumptions-not yet model selection." Confirmed in the ILT Participant Guide:

"Design decisions such as architecture or algorithm type come after planning-usually during development based on technical feasibility and data availability."

NEW QUESTION # 35

The use of paid generative AI public tools is appealing because? (Choose three.)

- A. They have frequent enhancements of new features.
- B. They have additional privacy and security controls.
- C. They provide transparency in models and in decision-making.
- D. They eliminate concerns about the data used to generate outputs.
- E. They are convenient to adopt.

Answer: A,B,E

Explanation:

Paid generative AI tools are appealing because they are convenient to adopt, often include enhanced privacy and security controls, and receive frequent feature updates.

NEW QUESTION # 36

.....

In order to meet the demand of all customers and protect your machines network security, our company can promise that our AIGP test training guide have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the AIGP exam dumps system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security. If you choose our AIGP study questions as your study tool, we can promise that we will try our best to enhance the safety guarantees and keep your information from revealing, and your privacy will be protected well. You can rest assured to buy the AIGP exam dumps from our company.
