Over this long time period, thousands of HCL-DOM-AADM-12 Exam candidates have passed their HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) certification exam and now they are doing jobs in the world's top brands. You can also be a part of this wonderful community.

## HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q71-Q76):

### NEW QUESTION # 71

What is the purpose of the Server > Status tab in the Domino Administrator Client?

- A. To register new Domino servers
- B. To reset user passwords
- C. To configure server security settings
- **D. To display real-time server activity and task status**

**Answer: D**

Explanation:

The Server > Status tab is the primary interface for active server monitoring. It allows administrators to display real-time server activity, view the current list of running tasks (such as AdminP or Router), and observe the server console to verify that the environment is running correctly and efficiently.

#### NEW QUESTION # 72

In a hierarchical name like \$CN=Server1/OU=Boston/O=HCL\$ the component "OU" stands for

- A. Operating Unit
- **B. Organizational Unit**
- C. Organization Unit
- D. Office Unit

**Answer: B**

Explanation:

HCL Domino utilizes a hierarchical naming structure to ensure every entity (user or server) has a unique name. In this structure, OU stands for Organizational Unit. OUs are typically used to represent departments, physical locations, or branches within the broader Organization (O), allowing for granular administrative control and security delegation.

---

#### NEW QUESTION # 73

What authentication method does Domino use by default for client-to-server access?

- A. RADIUS-based challenge-response
- B. OAuth 2.0 token-based login
- **C. Notes ID-based authentication using public key infrastructure (PKI)**
- D. Biometric signature verification

**Answer: C**

Explanation:

The foundational security of HCL Domino is built on Public Key Infrastructure (PKI). By default, when a Notes client connects to a Domino server, it uses the Notes ID file. This file contains the user's private key.

The server uses the corresponding public key (stored in the user's Person document) to perform a complex cryptographic "handshake" to verify the user's identity without ever sending the actual password or private key over the network.

---

#### NEW QUESTION # 74

Which policy type is used to configure workstation-level security for Notes clients?

- A. Mail Policy
- **B. Desktop Policy**
- C. Registration Policy
- D. Archive Policy

**Answer: B**

Explanation:

While a Security Policy manages passwords and ID Vault settings, the Desktop Policy is used to manage the workstation environment itself. This includes workstation-level security settings like Execution Control Lists (ECLs), which prevent unauthorized

code from running on the user's machine, and ID file locking preferences. It ensures that security standards are enforced directly at the user's desktop interface.

---

#### NEW QUESTION # 75

What is displayed in the Domino Administrator Client's Messaging tab?

- A. Sametime server connection details
- **B. Mail routing status and router diagnostics**
- C. Replication schedule and encryption settings
- D. DAOS and attachment consolidation details

**Answer: B**

Explanation:

The Messaging tab in the Domino Administrator Client is the central hub for monitoring and managing the mail system. It provides administrators with a comprehensive view of mail routing status and router diagnostics, allowing them to see how many messages are pending in the mailbox, track the progress of the Router task, and troubleshoot delivery failures or bottlenecks in the mail flow.

---

#### NEW QUESTION # 76

.....

People need to increase their level by getting the HCL Software Academy HCL-DOM-AADM-12 certification. If you take an example of the present scenario in this competitive world, you will find people struggling to meet their ends just because they are surviving on low-scale salaries.
