Real DEA-C01 Testing Environment & Valid DEA-C01 Test Question

The passing rate of our DEA-C01 study material is very high, and it is about 99%. We provide free download and tryout of the DEA-C01 question torrent, and we will update the DEA-C01 exam torrent frequently to guarantee that you can get enough test bank and follow the trend in the theory and the practice. We provide 3 versions for you to choose thus you can choose the most convenient method to learn. Our DEA-C01 Latest Questions are compiled by the experienced professionals elaborately. So it will be very convenient for you to buy our product and it will do a lot of good to you.

Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q282-Q287):

NEW QUESTION # 282

Does sensitive data in Snowflake is modified in an existing table while applying Masking policies?

- A. YES
- B. NO

Answer: B

Explanation:
Explanation

Snowflake supports masking policies as a schema-level object to protect sensitive data from unauthorized access while allowing authorized users to access sensitive data at query runtime. This means that sensitive data in Snowflake is not modified in an existing table (i.e. no static masking). Rather, when users execute a query in which a masking policy applies, the masking policy conditions

determine whether unauthorized users see masked, partially masked, obfuscated, or tokenized data.

NEW QUESTION # 283

Company DEF has a strict security policy that mandates that all data at rest in Amazon S3 must be encrypted. They want to ensure that the encryption keys are managed by AWS, but they also want the flexibility to change the encryption keys when required. Which of the following encryption methods best meets Company DEF's requirements?

- A. Server-Side Encryption with AWS Key Management Service (SSE-KMS).
- B. Server-Side Encryption with Amazon S3 Managed Keys (SSE-S3).
- C. Server-Side Encryption with Customer-Provided Keys (SSE-C).
- D. Client-Side Encryption with a client-side master key.

Answer: A

NEW QUESTION # 284

A company is setting up a data pipeline in AWS. The pipeline extracts client data from Amazon S3 buckets, performs quality checks, and transforms the data. The pipeline stores the processed data in a relational database. The company will use the processed data for future queries.

Which solution will meet these requirements MOST cost-effectively?

- A. Use AWS Glue ETL to extract the data from the S3 buckets and perform the transformations. Use AWS Glue DataBrew to perform quality checks. Load the processed data and the quality check results into a new S3 bucket.
- B. Use AWS Glue ETL to extract the data from the S3 buckets and perform the transformations. Use AWS Glue Data Quality to enforce suggested quality rules. Load the data and the quality check results into an Amazon RDS for MySQL instance.
- C. Use AWS Glue Studio to extract the data from the S3 buckets. Use AWS Glue DataBrew to perform the transformations and quality checks. Load the processed data into an Amazon RDS for MySQL instance. Load the quality check results into a new S3 bucket.
- D. Use AWS Glue Studio to extract the data from the S3 buckets. Use AWS Glue DataBrew to perform the transformations and quality checks. Load the processed data and quality check results into an Amazon RDS for MySQL instance.

Answer: B

Explanation:

Using a single AWS Glue ETL job to both transform the data and invoke Glue Data Quality checks lets you declaratively enforce recommended rules without spinning up separate tools. You can then write the cleansed data and, if desired, the quality metrics, directly into your Amazon RDS for MySQL instance. This serverless, end-to-end approach minimizes service sprawl and only incurs Glue and RDS costs, making it the most cost-effective with the least operational overhead.

NEW QUESTION # 285

A company uses Amazon S3 to store semi-structured data in a transactional data lake. Some of the data files are small, but other data files are tens of terabytes.

A data engineer must perform a change data capture (CDC) operation to identify changed data from the data source. The data source sends a full snapshot as a JSON file every day and ingests the changed data into the data lake.

Which solution will capture the changed data MOST cost-effectively?

- A. Ingest the data into Amazon RDS for MySQL. Use AWS Database Migration Service (AWS DMS) to write the changed data to the data lake.
- B. Create an AWS Lambda function to identify the changes between the previous data and the current data. Configure the Lambda function to ingest the changes into the data lake.
- C. Use an open source data lake format to merge the data source with the S3 data lake to insert the new data and update the existing data.
- D. Ingest the data into an Amazon Aurora MySQL DB instance that runs Aurora Serverless. Use AWS Database Migration Service (AWS DMS) to write the changed data to the data lake.

Answer: C

NEW QUESTION # 286

A data engineer needs to create an AWS Lambda function that converts the format of data from .csv to Apache Parquet. The Lambda function must run only if a user uploads a .csv file to an Amazon S3 bucket. Which solution will meet these requirements with the LEAST operational overhead?

- A. Create an S3 event notification that has an event type of s3:ObjectTagging:* for objects that have a tag set to .csv. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.
- **B. Create an S3 event notification that has an event type of s3:ObjectCreated:*. Use a filter rule to generate notifications only when the suffix includes .csv. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.**
- C. Create an S3 event notification that has an event type of s3:ObjectCreated:*. Use a filter rule to generate notifications only when the suffix includes .csv. Set an Amazon Simple Notification Service (Amazon SNS) topic as the destination for the event notification. Subscribe the Lambda function to the SNS topic.
- D. Create an S3 event notification that has an event type of s3:*. Use a filter rule to generate notifications only when the suffix includes .csv. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.

Answer: B

Explanation:

This solution directly triggers the Lambda function only when a .csv file is uploaded to the S3 bucket, minimizing unnecessary invocations of the Lambda function. It uses a specific event type (s3:ObjectCreated:*) and a filter rule to ensure that the Lambda function is invoked only for relevant events. Additionally, it directly invokes the Lambda function without the need for additional services like Amazon SNS, reducing operational overhead.

NEW QUESTION # 287

.....

It is easy for you to pass the DEA-C01 exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is little time for you to learn the DEA-C01 study tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our DEA-C01 Test Torrent you only need 1-2 hours to learn and prepare the DEA-C01 exam and focus your main attention on your most important thing.

Real DEA-C01 Testing Environment: <https://www.dumpexam.com/DEA-C01-valid-torrent.html>

Only high-class DEA-C01 guide question like us can be your perfect choice, Snowflake DEA-C01 Training Online Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts, So the online version of the DEA-C01 study materials from our company will be very useful for you to prepare for your exam, If only you provide the screenshot or the scanning copy of DEA-C01 exam failure marks list we will refund you immediately and the process is really simple.

Reliability, Resiliency and Recovery Design Patterns in Cloud Computing, Are those words still accurate, Only high-class DEA-C01 Guide question like us can be your perfect choice.

Such a startling figure --99% pass rate is DEA-C01 not common in this field, but we have made it with our endless efforts, So the online version of the DEA-C01 study materials from our company will be very useful for you to prepare for your exam.

Snowflake - DEA-C01 Authoritative Training Online

If only you provide the screenshot or the scanning copy of DEA-C01 exam failure marks list we will refund you immediately and the process is really simple, Our DEA-C01 exam questions not only includes the examination process, but more importantly, the specific content of the exam.
