質問 # 61

Which of the following elements should be included in the solution design to ensure alignment with business requirements? Note: There are 3 correct answers to this question.

- A. Business case including project goals, cost estimates, expected ROI!
- B. Data migration strategy and approach for transitioning to the new solution
- C. Test plan focusing on validating functionality
- D. Integration design specifications for connecting SAP and non-SAP systems
- E. System landscape blueprint detailing the technical architecture

正解: B、D、E

解説:

Step 1 - Understanding the question

This question asks which elements should be included in a solution design to ensure alignment with business requirements during SAP S/4HANA Cloud, Private Edition implementation.

A complete solution design defines how the system will fulfill business needs, covering architecture, data, and integration perspectives.

Step 2 - Evaluate each option

Option A: System landscape blueprint detailing the technical architecture Correct.

A detailed system landscape ensures that the technical setup (systems, interfaces, environments) supports the business solution.

Option B: Test plan focusing on validating functionality

Incorrect.

While test plans are essential for validation, they are not part of the solution design itself. They are developed later during testing phases.

Option C: Business case including project goals, cost estimates, expected ROI Incorrect.

A business case supports project justification and approval but is not a direct part of the solution design.

Option D: Data migration strategy and approach for transitioning to the new solution Correct.

Data migration strategy ensures that all legacy data is transitioned accurately and supports the designed business processes in the new system.

Option E: Integration design specifications for connecting SAP and non-SAP systems Correct.

Integration design defines how data flows between SAP and external systems, which is critical to achieving end-to-end business process alignment.
