認定する-ユニークなC-THR92-2505認証資格試験-試験の準備方法C-THR92-2505的中関連問題

C-THR92-2505認定は、あなたの能力の最高の証明です。ただし、このようなC-THR92-2505試験を準備する自由時間が少ない作業担当者にとっては容易ではなく、人々は常に未知のものに対する恐怖を感じ、突然の変化に対処することはできません。ただし、C-THR92-2505試験問題はあなたのそばに立つことができます。そして、優れたC-THR92-2505学習教材を提供することに専念する決意です。C-THR92-2505試験問題の無料デモをお試しください。詳細を理解して選択することができます。

## SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting 認定 C-THR92-2505 試験問題 (Q72-Q77):

### 質問 # 72

You are creating a query for a historical compensation story report in Query Designer. You have added the Job Information table to the query, configured a scope filter, and previewed the result to verify you are returning the appropriate employees. You add the related table Compensation to the query.

When you preview the query, you only get the current compensation information for the employees. Why do you only receive the current records? Note: There are 2 correct answers to this question.

- A. The Job information table time filter is set to: As of Date > Dynamic Date: Today.
- **B. The Query Advanced Filter is set to: Job Information effective start date equal to Dynamic Date Today.**
- C. The compensation table time filter is set to: Same Filter as First Table.
- **D. The compensation table time filter is set to: As of Date > Dynamic Date: Today.**

正解: B、D

解説:

\* Understanding Time Filters in Query Designer

\* When creating a query, time filters determine the scope of the data retrieved. Filters such as As of Date or Dynamic Date often default to "Today," which retrieves only current records.

\* Reason for Current Records Only

\* Option B: The Compensation table filter is explicitly set to As of Date > Dynamic Date: Today.

This restricts the results to only the current compensation records.

\* Option D: The Job Information filter is configured to match records with the effective start date equal to today, which also limits the results to current data.

\* Why Other Options are Incorrect

\* A: This filter applies to Job Information, not Compensation, and does not explain why only current compensation records are retrieved.

\* C: "Same Filter as First Table" would align filters between tables, but does not necessarily restrict to current data.

### 質問 # 73

You need to create a chart of type Indicator: Numeric Point that displays the following output:

count of employees with the gender male divided by the count of employee with the gender female.

The chart can then be filtered for different departments. What calculation is required to create the metric?

- A. In Query Builder, use a calculated column.
- **B. In Chart Builder, use a calculation of type: Calculated Measure.**
- C. In Chart Builder, use a calculation of type: Aggregation.
- D. In Chart Builder, use a calculation of type: Restricted Measure.

正解: B

解説:

\* Understanding the Chart Type

\* Indicator: Numeric Point charts display a single numeric value based on a calculated metric.

\* The desired output requires dividing the count of male employees by the count of female employees.

\* Solution

\* A Calculated Measure in Chart Builder is the appropriate method to perform this calculation within the context of the chart.

\* Why Other Options are Incorrect

\* A (Aggregation): Aggregation alone cannot handle the required calculation.

\* B (Calculated Column): Calculated columns are created at the query level and are not specific to the chart.

- \* D (Restricted Measure): Restricted measures limit data based on conditions but do not perform calculations across dimensions.

#### 質問 # 74

In a canvas report, to which of the following can you export multipage reports in a single transaction? Note: There are 3 correct answers to this question.

- A. Microsoft Word
- B. Microsoft Excel
- C. XML format
- D. Microsoft PowerPoint
- E. Adobe PDF

正解: A、D、E

解説:

- \* Exporting Multipage Reports
- \* Canvas reports support exporting multipage reports in formats that preserve the layout and design, such as Microsoft Word, PowerPoint, and PDF.
- \* Why Other Options are Incorrect
- \* A. Microsoft Excel: Canvas reports do not support exporting multipage layouts to Excel.
- \* C. XML Format: XML is not supported for multipage exports.

References

- \* SAP SuccessFactors Canvas Reports Export Options

#### 質問 # 75

In Detailed Reporting, which fields can you format using Column Formatting on the Edit menu? Note: There are 2 correct answers to this question.

- A. Picklist fields
- B. Date fields
- C. Number fields
- D. Currency fields

正解: A、B

解説:

In Detailed Reporting, the Column Formatting option on the Edit menu allows customization of certain field types.

- \* Date Fields (C):
- \* You can format date fields to display in different formats (e.g., MM/DD/YYYY, DD-MM- YYYY).
- \* This helps in tailoring the report to regional or user-specific requirements.
- \* Picklist Fields (D):
- \* You can format picklist fields to customize how the values appear, such as displaying labels instead of codes.

#### 質問 # 76

You have created a custom MDF object to track company car information. You need to be able to create story reports on the data of the custom MDF object. What must you do to enable a custom MDF object to be listed in the Available Data section of Query Designer?

- A. Update the Report Object Configuration Entity record for the object and associate the object with a schema.
- B. Create a custom schema join using the Report Schema Join Manager tool.
- C. Update the Report Object Configuration Entity record for the object and set it as a root report object.
- D. Create a Report Schema Configuration Entity Record.

正解: A
