## HPE Hybrid Cloud Solutions Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Which components make up a CloudPhysics assessment? (Select two.)

- A. Storage Assessment Foundry web-based platform for analysis of collected data
- **B. SAFcollector.exe Collector as a Data Collector**
- C. The cp.exe application deployed across virtual machines as a data collector
- D. A data collector virtual appliance
- **E. A cloud-based SaaS platform that presents actionable insights through a web browser**

**Answer: B,E**

#### **NEW QUESTION # 40**

You need to describe the benefits of HPE GreenLake to your customer.

What details should you provide?

- A. HPE GreenLake enables the customer to be managed by HPE, HPE Partners, and other 3rd party vendors through its open management policy.
- **B. HPE GreenLake can increase financial flexibility, free up capital, and provide better cost control through its Pay-per-Use policy.**
- C. HPE GreenLake provides infinite scale to the customer at no additional cost with its scale up policy.
- D. HPE GreenLake allows customers to manage their accounts point-and-click automated provisioning from a mobile application.

**Answer: B**

Explanation:

Pay-per-Use policy: HPE GreenLake offers a consumption-based IT model that provides significant financial benefits. It increases financial flexibility by aligning costs with actual usage, frees up capital that can be invested elsewhere, and offers better cost control by reducing upfront expenses and providing predictable monthly payments based on consumption.

#### **NEW QUESTION # 41**

Match the feature of the HPE Ezmeral Container Platform to its business value.

**Answer:**

Explanation:

#### **NEW QUESTION # 42**

Match each HPE product With the customer requirements it meets.

**Answer:**

Explanation:

Explanation:

MSA 2062: A customer needs a low cost entry-level storage appliance with automatic tiering for their Fibre Channel environment

MSL2024: A hospital wants to store air-gapped copies of their medical imaging to protect against ransomware attacks and natural

disasters StoreEasy 1560: A small software development company needs a solution for their growing file shares in their Microsoft

environment StoreOnce VSA: Customer wants to backup and quickly recover their Hyper-V environment in a remote site with an

option to backup to the cloud This is because:

MSA 2062: This is a flash-enabled storage appliance that supports Fibre Channel, iSCSI and SAS connectivity. It offers automatic tiering that optimizes performance and cost by moving data between SSDs and HDDs based on usage patterns.

MSL2024: This is a tape library that supports up to 24 LTO tape cartridges and one or two tape drives. It provides offline data protection and long-term retention for compliance and disaster recovery purposes. It can also create air-gapped copies of data that are isolated from network threats such as ransomware.

StoreEasy 1560: This is a file storage appliance that supports SMB, NFS and FTP protocols. It is optimized for Microsoft environments and integrates with Active Directory, BitLocker encryption, Windows Storage Server and Windows Server Backup. It can scale up to 16 TB of internal capacity and 280 TB of external capacity.

StoreOnce VSA: This is a virtual storage appliance that provides backup and recovery for virtualized environments. It supports

Hyper-V, VMware and KVM hypervisors and integrates with backup applications such as HPE Data Protector and Veeam. It can also deduplicate data and replicate it to another StoreOnce system or to the cloud.

## NEW QUESTION # 43

your customer requires a server that can support a database Of 5TB to run in memory.

Which HPE server family should you recommend?

- A. DL385 Gen10 plus v2
- B. APollo 4510 Gen10 Plus V2
- C. DL345 Gen10 Plus
- D. DL560 Gen10

**Answer: D**

### Explanation:

## Explanation

HPE ProLiant DL560 Gen10 Server is a high-density, 4P server with high performance, scalability and reliability. It supports up to 6 TB of memory with 48 DIMM slots and up to 12 TB of memory with 96 DIMM slots when using HPE Persistent Memory2. This means that it can support a database of 5 TB to run in memory.
