It is very necessary for a lot of people to attach high importance to the DEP-2025 exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable DEP-2025 Study Materials can help people pass the exam in a relaxed state.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 2	<ul style="list-style-type: none">Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 3	<ul style="list-style-type: none">Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.

Topic 4	<ul style="list-style-type: none"> • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 5	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 6	<ul style="list-style-type: none"> • Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 7	<ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 8	<ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 9	<ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 10	<ul style="list-style-type: none"> • Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 11	<ul style="list-style-type: none"> • Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.

DEP-2025 Exam Labs - DEP-2025 Test Result

When we get into the job, our DEP-2025 training materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our DEP-2025 certification guide can help you improve your ability to work in the shortest amount of time, for more promotion opportunities and space for development. Believe it or not that up to you, our DEP-2025 Training Materials are powerful and useful, it can solve all your stress and difficulties in reviewing the DEP-2025 exams.

Apple Deployment and Management Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which feature allows IT administrators to manage Bluetooth settings on a device?

- A. iCloud
- B. Configuration profiles
- C. Find My
- D. MDM

Answer: B

Explanation:

Configuration profiles allow IT administrators to manage Bluetooth settings, such as disabling Bluetooth entirely or restricting pairing with specific devices, enhancing security and compliance. These profiles are deployed via MDM or manually. Find My (option B)

and iCloud (option C) are unrelated to Bluetooth management. MDM (option D) delivers profiles, but the profiles define the settings. The Apple Platform Deployment Guide details Bluetooth configuration via profiles.

NEW QUESTION # 79

Which MDM management capabilities are available on an iPhone enrolled using account-driven User Enrollment?

- A. Access device location
- **B. Require a passcode**
- C. Disable Activation Lock
- D. Remotely wipe the entire device

Answer: B

Explanation:

Account-driven User Enrollment limits MDM scope. The iOS Deployment Reference states, "MDM can enforce policies like requiring a passcode with User Enrollment, but it cannot access location, wipe the device, or disable Activation Lock." Reference: iOS Deployment Reference, "User Enrollment" section.
Apple Platform Deployment Guide, "BYOD Management" section.

NEW QUESTION # 80

In which ownership model can IT administrators restrict the installed apps and personal data on a device meant to be shared with multiple users?

- A. BYOD, personally enabled
- **B. Nonpersonalized, organization-owned**
- C. Personally enabled, organization-owned
- D. BYOD, User Enrollment

Answer: B

Explanation:

The nonpersonalized, organization-owned model is designed for shared or single-purpose devices, such as Shared iPads in education or kiosks in businesses. In this model, IT administrators centrally configure and manage the devices, restricting installed apps and personal data to ensure consistency and security across multiple users. BYOD, User Enrollment (option A) and BYOD, personally enabled (option B) involve personal devices with user control, not shared use. Personally enabled, organization-owned (option D) allows personalization, unsuitable for shared scenarios. The Apple Platform Deployment Guide details this model for shared device management.

Reference: Apple Platform Deployment Guide (Chapter: Shared Devices).

NEW QUESTION # 81

What is a feature of Apple Configurator for Mac?

- A. Buy apps and books
- B. Enable Managed Lost Mode
- **C. Create a Blueprint for your devices**
- D. Push profile updates over the air

Answer: C

Explanation:

Apple Configurator for Mac allows administrators to create Blueprints, which are templates for configuring devices with settings, apps, and profiles. The Apple Configurator User Guide explains, "Apple Configurator for Mac allows you to create Blueprints-templates containing settings, apps, and profiles-that can be applied to iPhones, iPads, or Macs during configuration." Option A is an MDM feature, B requires MDM for over-the-air updates, and D is handled via Apple Business Manager, not Configurator.

Reference:

Apple Configurator User Guide, "Blueprints" section.

Apple Platform Deployment Guide, "Apple Configurator Features" section.

NEW QUESTION # 82

Which is an important user authentication feature of an MDM solution that you should consider?

- A. Support for future versions of macOS, iOS, and iPadOS
- B. Support for the BYOD deployment model
- C. Support and integration with your identity provider or directory service

Answer: C

Explanation:

A key feature to consider in an MDM solution is its ability to integrate with an organization's existing identity provider (IdP) or directory service (e.g., Active Directory, Azure AD, or Google Workspace). This ensures seamless user authentication, leveraging single sign-on (SSO) and existing credentials, which enhances security and user experience. Support for future OS versions (option B) is important for compatibility but not specifically an authentication feature. Support for BYOD (option C) is a deployment consideration, not an authentication feature. The Apple Platform Deployment Guide highlights IdP integration as critical for authentication in MDM deployments.

Reference: Apple Platform Deployment Guide (Chapter: Identity and Authentication).

NEW QUESTION # 83
