SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q24-Q29):

NEW QUESTION # 24

What functionality is available with Basic Shipping in SAP S/4HANA Supply Chain for transportation management? Note: There are

3 correct answers to this question.

- A. Transportation Planning based on forwarding orders
- **B. Transportation Planning based on inbound deliveries**
- **C. Transportation execution without event management**
- D. Transportation Planning based on sales orders
- **E. Transportation Planning based on outbound deliveries**

Answer: B,C,E

Explanation:

Transportation Management Overview and Fundamentals

NEW QUESTION # 25

Which item category in a forwarding order item hierarchy is NOT considered in subsequent execution documents?

- **A. Service**
- B. Passive vehicle
- C. Product
- D. Package

Answer: A

Explanation:

In SAP S/4HANA Transportation Management, forwarding orders in LSP scenarios contain item hierarchies with categories like passive vehicle, package, service, and product. According to the SAP documentation, the service (C) item category is not considered in subsequent execution documents (e.g., freight orders or freight bookings). Service items represent non-physical services (e.g., customs clearance) and are used for costing or documentation in the forwarding order but are not relevant to execution documents, which focus on physical goods and equipment.

The other options are incorrect:

- * Passive vehicle (A) represents equipment like trailers and is included in execution documents for transport planning.
- * Package (B) represents packaging units and is considered in execution documents for load planning.
- * Product (D) represents the goods being transported and is critical in execution documents.

NEW QUESTION # 26

In a side-by-side scenario, which of the following objects can you map from transportation management (TM) to materials management (MM)? Note: There are 2 correct answers to this question.

- A. TM charge category to MM G/L account
- **B. TM purchasing organization to MM purchasing organization**
- **C. TM charge type to MM service master**
- D. TM charge type to MM service material group

Answer: B,C

Explanation:

In a side-by-side scenario integrating SAP S/4HANA Transportation Management (TM) with Materials Management (MM), specific objects are mapped to ensure seamless data transfer. According to the SAP documentation:

* TM charge type to MM service master (A) is mapped to link transportation-related charges to service master records in MM, enabling accurate service procurement.

* TM purchasing organization to MM purchasing organization (C) is mapped to align the organizational structure between TM and MM, ensuring consistent purchasing processes.

The other options are incorrect:

* TM charge category to MM G/L account (B) is not a standard mapping, as charge categories are higher-level groupings and are not directly linked to G/L accounts.

* TM charge type to MM service material group (D) is not typically mapped, as service material groups are less specific than service master records.

The freight unit building rule that is used contains the strategy "Consolidate as much as possible." No incompatibilities exist. What is the minimum number of freight units that are created?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

NEW QUESTION # 28

Which allocations are consumed by a freight order with means of transport B from transportation zone 4 to transportation zone 5?

Note: There are 3 correct answers to this question.

- A. Orientation: Within; From: 1; To: 1; Means of transport: A
- **B. Orientation: Along; From: 4; To: 5; Means of transport: C**
- **C. Orientation: Within; From: 1; To: 1; Means of transport: B**
- D. Orientation: Along; From: 4; To: 2; Means of transport: A

Answer: B,C

NEW QUESTION # 29

.....
