The Adobe Experience Manager Architect Master (AD0-E117) questions are being offered in three easy-to-use and different formats. These formats are Adobe Dumps PDF, desktop-based Adobe AD0-E117 practice test software, and web-based AD0-E117 practice exam. All these three AD0-E117 Exam Dumps formats contain real, valid, and updated AD0-E117 exam questions that surely repeat in the upcoming AD0-E117 exam and you can easily pass the Adobe AD0-E117 exam on the first attempt.

Adobe AD0-E117 is a certification exam for individuals seeking to become Adobe Experience Manager Architect Masters. AD0-E117 exam is designed to test the candidate's knowledge and skills in architecting and designing solutions using Adobe Experience Manager (AEM). Adobe Experience Manager Architect Master certification is ideal for professionals who want to demonstrate their expertise in AEM and gain recognition in the industry.

Adobe AD0-E117 exam is designed to test the skills and knowledge of professionals who are seeking to become Adobe Experience Manager (AEM) Architect Masters. Adobe Experience Manager Architect Master certification is ideal for individuals

who want to demonstrate their expertise in implementing and architecting AEM solutions for various industries. AD0-E117 Exam covers a wide range of topics, including AEM architecture, security, content management, and customization. It is a challenging exam that requires in-depth knowledge of AEM and its various components.

Adobe Experience Manager Architect Master Sample Questions (Q35-Q40):

NEW QUESTION # 35

An organization is transitioning its digital platform to AEMaaS. The lead architect is overseeing the transition and ensuring that the platform remains robust and offers a consistent user experience. The team has already performed general functionality tests. As the launch date approaches, the team is focusing on potential real-world challenges, such as the platform's behavior under high-user traffic and communicating with third-party services.

Which two types of testing should the architect prioritize next to ensure a seamless transition to AEMaaS?
(Choose two.)

- A. Unit Testing
- B. Usability Testing
- C. Integration Testing
- D. Load Testing

Answer: C,D

NEW QUESTION # 36

A client's site does not show the latest page content for some site visitors. The client has two data centers with each configured with a Dispatcher connected to two Publish machines. The site load issue only occurs intermittently for visitors from one of the data centers.

Which step should the Architect take to resolve the issue?

- A. Disable caching on all impacted data centers Dispatchers to force the Publish machines to serve the page content
- B. Check the SSL certificate on the impacted data center's load balance.
- C. Review the log files on the Author instances to determine if there are any template errors
- D. Check the Publish instance(s) attached to the Dispatcher associated to the impacted data center

Answer: D

Explanation:

"checking the Publish instance(s) attached to the Dispatcher associated to the impacted data center can help identify if there are any replication or caching issues that prevent the latest page content from being served"

NEW QUESTION # 37

A customer's photo gallery site uses query parameters to filter photo search results. The site experiences high AEM Publish server load when users filter photos on the site. The customer would like to identify the cause of this issue.

What should the Architect investigate first?

- A. Dispatcher load balancing configuration
- B. ignoreUrlParams configuration in dispatcher.any
- C. Cache-Control Headers in dispatcher.any
- D. Volume of assets being loaded at a time

Answer: C

Explanation:

"Cache-Control Headers in dispatcher.any control how long the dispatcher caches responses from the publish server. If these headers are not configured properly, the dispatcher may cache stale or dynamic content, resulting in high server load and poor performance".

NEW QUESTION # 38

A fashion retail company is planning to enhance the online shopping experience by integrating Adobe Experience Manager (AEM)

with a third-party commerce platform using the Commerce Integration Framework (CIF). What are the purpose and benefits of using CIF in this integration?

- A. CIF enables AEM to host the entire checkout process, reducing the dependency on the third-party commerce platform and improving security.
- B. CIF provides a set of pre-built UI components for AEM that can be easily embedded into the third-party commerce platform, ensuring consistent branding.
- **C. CIF facilitates the exchange of commerce data, such as products, prices, and inventory, between AEM and the third-party commerce platform, enabling a unified shopping experience.**
- D. CIF allows for direct data synchronization between AEM and the third-party commerce platform, eliminating the need for APIs and simplifying integration.

Answer: C

NEW QUESTION # 39

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:

[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Add additional dispatcher servers
- B. Create a cron job that will delete the dispatcher cache on a regular basis
- **C. Review and optimize the Dispatcher cache configuration**
- D. Add additional AEM instances to the Publish Farm

Answer: C

Explanation:

According to Adobe Experience Manager documentation⁵, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file⁶. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

NEW QUESTION # 40
