2026 2V0-15.25 Reliable Exam Pdf - VMware Cloud Foundation 9.0 Support Realistic Reliable Test Dumps Pass Guaranteed

Our 2V0-15.25 guide question dumps are suitable for all age groups. Even if you have no basic knowledge about the relevant knowledge, you still can pass the 2V0-15.25 exam. We sincerely encourage you to challenge yourself as long as you have the determination to study new knowledge. Our 2V0-15.25 exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done you work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our 2V0-15.25 Guide question dumps are beyond your imagination. You will regret if you throw away the good products.

Web-based software works without installation. VMware Cloud Foundation 9.0 Support exam practice test software works on all well-known browsers, including Chrome, Firefox, Safari, and Opera. Trust VerifiedDumps - VMware 2V0-15.25 exam preparation products and be prepared for the VMware Cloud Foundation 9.0 Support at your home. Preparing and testing yourself, again and again, can be nerve-wracking, so in this scenario, we provide a VMware 2V0-15.25 PDF for exam preparation.

Free updates VMware 2V0-15.25 Exam questions by VerifiedDumps

Our company has the highly authoritative and experienced team. In order to let customers enjoy the best service, all 2V0-15.25

exam prep of our company were designed by hundreds of experienced experts. Our 2V0-15.25 test questions will help customers learn the important knowledge about exam. If you buy our products, it will be very easy for you to have the mastery of a core set of knowledge in the shortest time, at the same time, our 2V0-15.25 Test Torrent can help you avoid falling into rote learning habits. You just need to spend 20 to 30 hours on study, and then you can take your exam. In addition, the authoritative production team of our 2V0-15.25 exam prep will update the study system every day in order to make our customers enjoy the newest information.

VMware 2V0-15.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• IT Architectures, Technologies, Standards: This domain covers fundamental frameworks, tools, and best practices for building scalable, secure, and interoperable enterprise IT systems.
Topic 2	• Install, Configure, Administrate the VMware by Broadcom Solution: This area covers installing, configuring, and managing VMware solutions including VCF Fleet deployment, expansion, and reduction operations.
Topic 3	• Troubleshoot and Optimize the VMware by Broadcom Solution: This domain focuses on troubleshooting VCF deployment, upgrades, conversions, workload domains, fleet operations (certificates, passwords, identity), licensing, compute resources, storage (vSAN, supplemental storage), networking (VDS, NSX), VCF Operations tools, Identity Broker automation, and HCX workload migrations.
Topic 4	• VMware by Broadcom Solution: This section focuses on understanding VMware by Broadcom's virtualization and cloud infrastructure platform for managing modern enterprise workloads.
Topic 5	• Plan and Design the VMware by Broadcom Solution: This domain addresses architectural planning and design principles for creating scalable, secure virtual environments aligned with business requirements.

VMware Cloud Foundation 9.0 Support Sample Questions (Q42-Q47):

NEW QUESTION # 42
An administrator is troubleshooting a problem with NSX.
Which command can be used to validate installed NSX VIBs on the ESX host?

- A. nsxcli get version
- B. esxcfg software list
- C. esxtop -b -d 2 -n 100
- D. esxcli software vib list

Answer: D

Explanation:
When troubleshooting NSX on an ESXi host, VMware requires verification that NSX VIBs (vSphere Installation Bundles) are installed and in the correct state. VIBs are responsible for NSX datapath, control- plane modules, and kernel extensions on ESXi.
The authoritative and documented method to list VIBs on an ESXi host is the command:
esxcli software vib list
This command displays all installed kernel modules, version numbers, NSX packages, and their installation status. For NSX-T (now part of VCF networking), administrators expect to see VIBs such as nsx-aggservice, nsx-bridge, nsx-esx-datapath, and others. If any required NSX VIBs are missing or inconsistent, the ESXi host will fail to join NSX transport nodes or will show "Not Ready."
Option A (esxtop) is for performance monitoring and does not show VIB information.
Option C (nsxcli get version) checks NSX version on Edge Nodes or host transport nodes but does not list VIBs.
Option D (esxcfg software list) is an outdated and invalid command.

NEW QUESTION # 43
A VMware Cloud Foundation (VCF) administrator cannot deploy Virtual Machines (VMs) to a compute cluster.
The administrator discovers that the vCLS VMs on the problematic cluster are powered off and cannot be powered on.
What action can the administrator take to enable deployment of VMs?

- A. Set DRS Automation level to fully automated.
- B. Delete all resource pools in the affected cluster.
- C. Disable HA on the affected cluster.
- D. Enable retreat mode on the affected cluster.

Answer: D

Explanation:
In vSphere 7+ and VCF-managed clusters, thevSphere Cluster Services (vCLS)VMs must remain powered on for DRS, cluster health, and policy enforcement to function. If the vCLS VMs cannot power on,no workloads-including new VMs-can be deployedto the cluster because vSphere considers the cluster unhealthy.
A common cause is insufficient resources (CPU/memory), datastore issues, or policy conflicts preventing vCLS VMs from starting. VMware providesRetreat Modeas a troubleshooting mechanism to temporarily disable vCLS, allowing the administrator to deploy VMs and correct underlying issues. Enabling retreat mode:
* Removes vCLS from the cluster
* Restores ability to deploy VMs
* Allows remediation of storage/placement issues
* Can later be disabled to restore DRS health
Option A (deleting resource pools) does not restore vCLS VM power state.
Option B (disabling HA) does not affect vCLS behavior.
Option D (setting DRS automation level) does not correct vCLS placement problems.

NEW QUESTION # 44
An administrator is attempting to troubleshoot why the vSAN witness node cannot form a stretched cluster with the vSAN data nodes. The administrator can successfully ping the vSAN data node from the vSAN witness using the following command:
vmkping -I <witness-vmk#> <vsan-IPaddress> -s <1472> -d
What could be the possible cause of the issue?

- A. Jumbo Frames have not been enabled on the Witness Network.
- B. The customer does not have any virtual machines in the vSAN Cluster.
- C. Port 443 is not opened bidirectionally between all nodes.
- D. Port 12321 is not opened bidirectionally between all nodes.

Answer: D

Explanation:
In avSAN Stretched Cluster, communication between thewitness nodeanddata nodesrequires several specific TCP/UDP ports. The ability to successfully execute:
vmkping -I <witness-vmk> <vsan-IP> -s 1472 -d
confirms that:
* L2/L3 connectivity is present
* MTU is correctly configured
* ICMP traffic flows without fragmentation
However,vmkping alone does not verify vSAN control-plane communication.
For the vSAN Witness to properly form a cluster,TCP port 12321must be openbidirectionallybetween:
* Witness # Data nodes
* Data nodes # Witness
Port12321is required for:
* vSAN cluster membership
* Witness traffic
* vSAN object health/state synchronization
If this port is blocked by firewall policy or misconfigured network ACLs, the nodes can ping each other, but vSAN witness traffic will fail, preventing the stretched cluster from forming.
Why the other options are incorrect:
* B. Port 443- Required for management, not cluster formation.
* C. No VMs in cluster- Hasno impacton witness formation.
* D. Jumbo frames not enabled- Already ruled out by the successful 1472-byte vmkping with DF bit.

NEW QUESTION # 45

An administrator is preparing to import a vSphere environment into VMware Cloud Foundation (VCF) as a workload domain. The vSphere environment has the following configuration:
- vSphere version 8.0 update 3.
- Three-node vSAN cluster with a single OSA datastore.
- Two vSphere Distributed Switches (VDS).
- Three vmkernel adapters with DHCP assigned IP addresses.
What change must the administrator make before importing this environment?

- A. Upgrade vCenter and ESXi to vSphere 9.0.
- B. Update the vmkernel adapters with statically assigned IPs.
- C. Consolidate to a single vSphere Distributed Switch.
- D. Convert the vSAN datastore from OSA to ESA.

Answer: B

Explanation:
When importing an existing vSphere environment into VMware Cloud Foundation (VCF) as a workload domain, several strict prerequisites must be met. One of the key requirements documented in VCF 9.0 is that all VMkernel adapters (vmk ports) used for vSAN, vMotion, management, or other system traffic must have statically assigned IP addresses. DHCP-assigned VMkernel IPs are not supported for VCF workload domain bring-up or import operations.
In the provided scenario, the environment includes:
* vSphere 8.0 U3
* A 3-node vSAN OSA cluster
* Two VDS switches
* VMkernel adapters using DHCP
Before VCF can successfully validate and import the environment, the administrator must convert these VMkernel interfaces to static IP addressing. VCF uses IPAM assumptions and deterministic host networking configurations; DHCP introduces variability incompatible with automated lifecycle operations.
Option A (consolidating VDS) is unnecessary-VCF supports multiple VDS configurations during import.
Option B (upgrading to vSphere 9.0) is not required for import.
Option D (convert OSA to ESA) is impossible pre-import and not required-VCF supports OSA clusters.

NEW QUESTION # 46
An administrator has successfully created a new Organization for All Apps In VMware Cloud Foundation (VCF) Automation.
When logging into the new organization using the first user account, only the Overview tab is visible.
What is a possible cause of this issue?

- A. The first user account was assigned the Organization Administrator Role.
- B. The first user account was assigned the Organization Auditor Role.
- C. The first user account was assigned the Organization User Role.
- D. The first user account was assigned a Custom Role.

Answer: C

Explanation:
This issue stems from an incorrect role assignment during the user creation process in VMware Cloud Director (VCF Automation).
Organization Administrator Role (Option D): This role grants full control, including visibility of the Administration tab (to manage users, groups, and settings), Data Centers, and Monitor tabs. If the user were an Admin, they would see all tabs.
Organization Auditor Role (Option A): This is a read-only role, but by definition, an Auditor can view anything an Organization Administrator can see (including the Administration settings), just without edit rights. Therefore, an Auditor would still see the Administration tab.
Organization User Role (Option B): This is a consumer-level role designed for deploying and managing vApps. By default, this role does not have access to the Administration tab or high-level organization settings.
If the organization is new and has no vApps or VDCs populated yet, a user with this role might see a very restricted view (effectively just a dashboard or "Overview") because they lack the rights to see the administrative configuration menus.
Conclusion: The fact that the "Administration" tab is missing (implied by "only Overview is visible") identifies the user as an Organization User (or a restricted Custom Role) rather than an Administrator or Auditor.

NEW QUESTION # 47

......

These VMware Cloud Foundation 9.0 Support (2V0-15.25) practice exams contain all the 2V0-15.25 questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final VMware Cloud Foundation 9.0 Support (2V0-15.25) exam. VMware Cloud Foundation 9.0 Support (2V0-15.25) practice test is customizable so that you can change the timings of each session. VerifiedDumps desktop VMware 2V0-15.25 Practice Test questions software is only compatible with windows and easy to use for everyone.
