

# NCP-EUC Reliable Exam Pattern 100% Pass | The Best Nutanix Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Test Dumps Free Pass for sure

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by Free4Dump: <https://drive.google.com/open?id=1Y4ITCQoU8z9ZFw4MEXh4whTWw4YTMMIt>

If you are still struggling to prepare for passing Nutanix real exam at this moment, our Free4Dump NCP-EUC vce dumps can help you preparation easier and faster. Our website can provide you Valid NCP-EUC Exam Cram with high pass rate to help you get certification, and then you will become a good master of certification exam.

Nutanix NCP-EUC Certification Exam is a vendor-neutral certification that aims to ensure that IT professionals have the necessary skills and knowledge to implement and manage Nutanix EUC solutions effectively. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam covers various topics such as Nutanix Frame Architecture, Nutanix Frame Deployment, Nutanix Frame Management, Nutanix Xi Frame Architecture, Nutanix Xi Frame Deployment, and Nutanix Xi Frame Management. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam also covers topics related to Nutanix Xi Leap, such as Nutanix Xi Leap Architecture, Nutanix Xi Leap Deployment, Nutanix Xi Leap Management, and Nutanix Xi Leap Integration.

## NCP-EUC Test Dumps Free - Latest NCP-EUC Exam Practice

At the Free4Dump, we strive to provide our customers with updated and real Nutanix NCP-EUC exam questions. We are committed to helping our students reach their goals and advance their careers through comprehensive, convenient, and cost-effective. Prepare for your Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam preparation material.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

## Sample Questions (Q79-Q84):

### NEW QUESTION # 79

A business unit requires different syslog servers for specific clusters.

Which tool can be used to set up a syslog monitoring configuration to avoid propagating the configuration to all clusters?

- A. PC
- B. acli
- **C. ncli**
- D. PE

**Answer: C**

Explanation:

According to Nutanix "Security Log Configuration" and "Prism Central" best practices, configuring syslog monitoring via the Prism Central (PC) web console automatically propagates the configuration to all registered Prism Element clusters. This is designed for centralized management but violates the requirement for cluster-specific servers.

To configure a syslog server for a specific cluster without propagating the setting to other clusters, the administrator must use the Nutanix Command-Line Interface (nCLI) on the specific cluster (Prism Element).

Documentation explicitly states: "Use the Nutanix command-line interface (nCLI) for syslog monitoring configuration to avoid propagating the configuration to the clusters."

### NEW QUESTION # 80

An administrator is required to keep past custom reports. The report runs once daily. Last Friday, when the administrator checked, there were 22 copies saved. On Friday this week, an administrator expects to see 29 saved report copies, but some reports are missing.

What is a probable cause?

- A. PC has migrated to another system and all reports are not visible.
- B. Time-based retention reached the maximum of 2 months.
- **C. The system currently has retained the maximum of 25 copies.**
- D. The system reached the default retention policy limit.

**Answer: C**

Explanation:

In Nutanix Prism Central, the reporting feature allows administrators to schedule and generate custom reports.

To manage storage and database capacity, Prism Central enforces a retention limit on these generated report instances.

According to the Prism Central Guide, "By default, Prism Central retains 25 instances of each report." In the scenario described:

\* The administrator had 22 reports.

\* Over the next week (7 days), 7 new reports were generated ( $22 + 7 = 29$  total potential instances).

\* Because the total (29) exceeds the hard default limit of 25, the system automatically rotated out (deleted) the 4 oldest copies to maintain the count at 25. This explains why reports are missing despite the expectation of seeing 29.

### NEW QUESTION # 81

The operations team have been tasked with increasing overall datacenter efficiency with a target minimum of 80% CPU, memory, and storage capacity utilization. They are requesting usage data from all application owners be sent on a monthly basis to be ingested into their capacity management software.

An administrator has an implementation of four Nutanix clusters under the management of a single Prism Central Instance.

How should the administrator best provide the data needed to the operations team to ensure adherence to the datacenter utilization directive?

- **A. Schedule a monthly email report with CPU, Memory, and Storage Usage data across all clusters under the Reporting facility in Prism Central.**
- B. Export the CPU Memory and Storage Usage metrics under Virtual Infrastructure/VMs in Prism Central and FTP the file to the operations team's FTP server.
- C. Create a Metric Chart in Prism Central with CPU, Memory, and Storage usage across all clusters and export the data to be sent to the operations team.
- D. Review the VM Efficiencies widget in Prism Central and export the data to a comma delimited file to be sent to the

operations team.

**Answer: A**

Explanation:

This option allows you to create a custom report with the required metrics for all VMs across all clusters and send it automatically to the operations team via email<sup>4</sup>. This way, you don't have to manually export or FTP the data every month.

#### NEW QUESTION # 82

An administrator needs to provide a standard desktop to a group of users that will replace their existing physical desktop. The administrator wants to minimize administrative overhead and application compatibility concerns.

Which desktop provisioning method best meets the requirements?

- A. Remote PC
- B. Non-Persistent VDI
- C. Hosted Shared Desktop
- **D. Persistent VDI**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix and Citrix Desktop Delivery Models:

\* Requirement Analysis: The goal is to replace a physical desktop while minimizing Application Compatibility concerns.

\* Why Persistent VDI? Persistent VDI (often Full Clones) provides a 1:1 user-to-VM mapping where the user's data, profile, and installed applications persist across reboots, exactly mimicking a physical PC. This offers the highest application compatibility because apps that require local installation, hard-coded paths, or local licensing work without the complex layering or virtualization required in non-persistent setups.

\* Comparison:

\* Non-Persistent VDI (C): often requires "App Layering" or complex image management for incompatible apps, increasing overhead for difficult applications.

\* Hosted Shared (B): (RDS) has the lowest app compatibility due to multi-user OS limitations.

#### NEW QUESTION # 83

An administrator would like to apply a group of base settings to Citrix-based VDI users at each logon. Which user profile type would best fit the scenario?

- A. Local Profiles
- B. Roaming Profiles
- C. Virtual disk-based Profiles
- **D. Mandatory Profiles**

**Answer: D**

Explanation:

A mandatory profile is a type of roaming profile that is read-only and does not save any changes made by users during their sessions.

A mandatory profile can be applied to a group of users who share a common desktop environment and do not need to customize their settings or preferences.

A mandatory profile can ensure that a group of base settings are applied to Citrix-based VDI users at each logon, regardless of any changes they make during their sessions. A mandatory profile can also improve performance, security, and consistency of the VDI environment.

To use a mandatory profile with Citrix Virtual Apps and Desktops, you need to create a template profile on a reference machine, rename its NTUSER.DAT file to NTUSER.MAN, and copy it to a network share. Then you need to configure Profile Management policies or Active Directory settings to point to the network share location for your users<sup>2</sup>.

#### NEW QUESTION # 84

.....

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best NCP-EUC NCP-EUC study materials for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We believe that our study materials will have the ability to help all people pass their NCP-EUC Exam and get the related exam in the near future.
