B . Manages production with AI automation in real-time

group.com+6learning.sap.com+6help.sap.com+6sap.com+8sap.com+8learning.sap.com+8.

Here's how the other options stack up:

* A. Improves logistics - While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing-not optimizing logistics functions directly.

* C. Automates procurement - This relates to supply chain/procurement modules in SAP, not manufacturing execution orchestration.

* D. Aligns financial optimization - Financial alignment comes primarily from ERP integration, not from real-time production orchestration.

So the best fit is option B.
