AWS-Certified-Cloud-Practitioner Exam consists of 65 multiple-choice and multiple-response questions and has a time limit of 90 minutes.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which feature of the AWS Cloud will support an international company's requirement for low latency to all of its customers?

- A. Pay-as-you-go pricing
- B. Fault tolerance
- C. High availability
- D. Global reach

Answer: C

NEW QUESTION # 46

Which tool should a developer use to integrate AWS service features directly into an application?

- A. AWS CodeDeploy
- B. AWS Batch
- C. AWS Lambda
- D. AWS Software Development Kit

Answer: D

Explanation:

AWS Software Development Kit (SDK) is a set of platform-specific tools for developers that let them integrate AWS service features directly into their applications. AWS SDKs provide libraries, code samples, documentation, and other resources to help developers write code that interacts with AWS APIs. AWS SDKs support various programming languages, such as Java, Python, Ruby, .NET, Node.js, Go, and more. AWS SDKs make it easier for developers to access AWS services, such as Amazon S3, Amazon EC2, Amazon DynamoDB, AWS Lambda, and more, from their applications. AWS SDKs also handle tasks such as authentication, error handling, retries, and data serialization, so developers can focus on their application logic.

NEW QUESTION # 47

What is one benefit AND one drawback of buying a reserved EC2 instance? (Select two) Choose the 2 Correct answers:

- A. Reserved instances can be purchased as a significant discount over on-demand instances.
- B. You can potentially save a lot of money by placing a lower "bid" price.
- C. You can terminate the instance at any time without any further pricing commitment.
- D. You are locked in to either a one- or three-year pricing commitment.

Answer: A,D

Explanation:

Reserved instances require a one- or three-year purchase term, so you are committing to paying for that much compute capacity for that full time period. However, in exchange for the long-term commitment, you will receive a discount (of up to 75%) over using an on-demand instance (for that same time period).

NEW QUESTION # 48

Which of the following common IT tasks can AWS cover to free up company IT resources? (Select TWO.)

- A. Patching databases software
- B. Backing up databases
- C. Testing application releases
- D. Creating database schema
- E. Running penetration tests

Answer: A,B

NEW QUESTION # 49

Which of the following services will automatically scale with an expected increase in web traffic?

- A. Amazon EBS
- B. Elastic Load Balancing
- C. AWS CodePipeline
- D. AWS Direct Connect

Answer: B

NEW QUESTION # 50
