Which ID is needed to visualize KPIs in the SAP Signavio Process Collaboration Hub?

- A. Customer ID
- **B. Widget ID**
- C. Variant ID
- D. Case ID

Answer: B

Explanation:

To visualize KPIs in the SAP Signavio Process Collaboration Hub, specific widgets are used, and these widgets are identified by a unique ID. The documentation clarifies:

* Option C (Widget ID): The Widget ID is required to configure and display KPIs in the Collaboration Hub. Each widget (e.g., Value Widget, Over Time Widget) has a unique ID that links it to the specific KPI data and visualization settings.

* Option A (Variant ID) is incorrect as Variant IDs are used in Process Mining to identify process variants, not for KPI visualization.

* Option B (Customer ID) is incorrect because it relates to customer data, not KPI visualization setup.

* Exact Extract: "Guided analysis includes the following sections:

* Typical Improvement Opportunities: Highlights common process issues, such as bottlenecks or redundant steps, with suggestions for optimization.

* Performance Indicators: Displays key metrics like cycle time, cost, or error rates to assess process efficiency.

* Related Content for Further Analysis: Provides links to additional analyses or widgets to deepen the investigation of specific issues." (SAP Signavio Process Intelligence User Guide, section on "Guided Analysis Structure").

* Explanation:

* Option A (Typical improvement opportunities): This section identifies common process inefficiencies and offers actionable recommendations, such as reducing wait times or streamlining steps.

* Option C (Performance indicators): This section presents KPIs relevant to the process, enabling users to evaluate performance and prioritize improvements.

* Option E (Related content for further analysis): This section suggests additional analyses or widgets to explore related aspects of the process, enhancing the depth of investigation.

* Option B (Ideas for discovering process pitfalls) is incorrect as it is not a formal section of guided analysis; pitfalls are covered under improvement opportunities or performance indicators.

* Option D (Most relevant filters) is incorrect because, while filters are used in guided analysis, they are not a distinct section but a tool applied across sections.
