Best of luck in Salesforce Certified B2C Commerce Architect (B2C-Commerce-Architect) exam and professional career!!!

Salesforce Certified B2C Commerce Architect Sample Questions (Q58-Q63):

NEW QUESTION # 58

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

* Separate realms

- * Different code bases
- * Different category navigation menus
- * Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example MTML for one of these links as displayed on Site A is:

Which solution should the Architect choose while keeping performance in mind?

- A. Create additional locales in all realms create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.
- B. Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales in JSON Format. Use the attribute to display the hreflang link tag.
- C. Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.
- **D. Create a new custom object type Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.**

Answer: D

Explanation:

For a multi-regional setup with different realms and frequent updates, using a custom object to manage hreflang mappings offers flexibility and scalability. Custom objects can efficiently store URL mappings for each category across different locales, making it easier to manage and update as category structures change.

This method allows for centralized control over hreflang mappings and simplifies maintenance compared to other options which might involve more complex integrations or manual updates.

NEW QUESTION # 59

A business wants to migrate its customer service provider from provider A to provider B. Provider e offers a LINK cartridge to integrate with its commerce solution.

Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document how the customer online journey flows from landing on the page to placing of the order
- **B. Document the custom Nations required on top of the LINK cartridge based on current commerce implementation and business needs.**
- C. Document the data objects, the interface, and data synchronization frequency between the systems.
- **D. Document the design of implementing a new B2C Commerce cartridge following the Industry standard best practices**
- **E. Document the data mapping between commerce and customer service provider.**

Answer: B,D,E

NEW QUESTION # 60

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the Client's Order Management System (OMS).
- * The OMS supports Integration using REST services.
- * The OMS is hosted on the Client's infrastructure.

What configurations are needed for this integration with the OMS?

- A. A service configuration, a service profile configuration, and a user credential configuration.
- B. A service profile configuration, a WAF configuration, and a service credential configuration.
- **C. A service configuration, a service profile configuration, and a service credential configuration.**
- D. A service configuration, a hostname alias configuration, and a user credential configuration.

Answer: C

NEW QUESTION # 61

An Order Management System (OMS) handles orders from multiple brandspecific sites, as part of the processing, the OMS sends the processing detail to be added as notes to the orders in B2C Commerce. These processing details are captured temporarily in custom objects, and are later processed by a batch Job that:

- * Processes the custom object to extract the orderid and note data.
- * Tries to load the order.
- * If the order is not found, it deletes the custom object and moves on.
- * If the order is found, it updates notes In the Order, upon successful update of this order, it deletes the custom object.

There is an Issue reported that the job is constantly failing and custom objects are growing in number. On investigating the production look the message below is being logged on each failure:

What are three solution The Architect can take to fix this issue without losing meaningful data?

Choose 3 answers

- A. Take the backup of the Order as XML and delete the Order to ensure on the next job run, the custom objects are getting processed.
- B. Engage B2C Commerce Support Team to soften the quota limit for "object.OrderPO.relation.notes"
- C. Take the backup of the Order as XML and delete the notes from Order to ensure on the next jobrun the custom objects are getting processed.
- D. Take the backup of the custom object and delete the custom object to ensure on the next job run the custom objects are getting processed.
- E. Using BM site import/export, softenthe<quota id="object.orderPo.relation,notes"> <custom-action>warn<custom-action> </quot> to make sure that neither order notes are lost and custom object is processed.

Answer: B,C,D

Explanation:

When facing an issue with a growing number of custom objects due to the exceeded quota limit for order notes, effective solutions include:

Option C (Take the backup of the custom object and delete the custom object): This ensures that the data is preserved while freeing up space for new processes and reducing the load, allowing the job to continue running without the impediment of quota limits.

Option D (Engage B2C Commerce Support Team to soften the quota limit for 'object.OrderPO.relation.notes'): Increasing the quota limit can resolve the root cause of the issue by accommodating the actual business needs without compromising the integrity of order processing and note addition.

Option E (Take the backup of the Order as XML and delete the notes from Order): This allows the job to process the custom objects as intended in subsequent runs by clearing out space while ensuring the order data remains intact for business needs.

These steps address the quota limit issue effectively without losing valuable order or note data, ensuring continuity and integrity of business operations.

NEW QUESTION # 62

New client is going to migrate to the Salesforce Commerce Cloud. Website is ready to be live but just is missing the customers and previous orders. What should we do?

- A. Send a ticket to Salesforce to publish the new site and import later missing data.
- B. Import at least orders before going live.
- C. There are no blockers. If everything else is working, the site can go live.
- D. Change Site status from password protected to live and import missing data when ready.

Answer: B

NEW QUESTION # 63

.....
