We talked with a lot of users about 300-535 practice engine, so we are very clear what you want. You know that the users of 300-535 training materials come from all over the world. The quality of our products is of course in line with the standards of various countries. You will find that the update of 300-535 learning quiz is very fast. You don't have to buy all sorts of information in order to learn more. 300-535 training materials can meet all your needs. What are you waiting for?

Cisco 300-535 certification exam, also known as Automating and Programming Cisco Collaboration Solutions (CLAUTO), is designed to test the candidate's knowledge and skills in automating and programming Cisco collaboration solutions. 300-535 exam is intended for professionals who wish to enhance their careers in the field of networking and collaboration solutions. 300-535 Exam is perfect for network engineers, software developers, network administrators, and IT managers who want to demonstrate their ability to automate and program Cisco collaboration solutions.

How Can You Pass the Cisco 300-535 Exam Quickly and Easily?

We can assure you that you will get the latest version of our 300-535 training materials for free from our company in the whole year after payment. For we promise to give all of our customers one year free updates of our 300-535 exam questions and we update our 300-535 Study Guide fast and constantly. Do not miss the opportunity to buy the best 300-535 preparation questions in the international market which will also help you to advance with the times.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q22-Q27):

NEW QUESTION # 22

An automation engineer is trying to configure a destination group to use dial-out telemetry with gRPC on a Cisco IOS XR platform. The template created is failing to apply. Which parameters must be configured?

- A. destination IP address, destination port, encoding, and protocol
- B. source IP address, source port, encoding, and protocol
- C. source IP address, source port, encoding, and sampling interval
- D. destination IP address, destination port, encoding, and sensor path

Answer: A

Explanation:

Reference: https://www.cisco.com/c/en/us/td/docs/iosxr/asr9000/telemetry/b-telemetry-cg-asr9000-61x/b-telemetry-cg-asr9000-61x_chapter_010.html

NEW QUESTION # 23

An engineer needs to configure network devices in an automated way. Which two ways are used to create structured data using YANG to provide REST-like APIs to enable programmability access? (Choose two.)

- A. JSON
- B. GPB
- C. E.XML
- D. JSON-RPC
- E. YAML

Answer: A,C

Explanation:

Reference: https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/prog/configuration/166/b_166_programmability_cg/restconf_prog_int.pdf

NEW QUESTION # 24

A network engineer is implementing a new network using NETCONF. The goal is to automate but also harden the device configuration. Which NETCONF action must be used to accomplish this goal?

- A. Configure by using the ip http secure-server command.
- B. Specify the source interface for SSH.
- C. Limit access to port 830, well-known clients, and SSH VTY.
- D. Enable CoPP.

Answer: C

Explanation:

To securely automate device configuration with NETCONF, limit access to port 830, restrict connections to well-known clients, and use only SSH VTY for NETCONF sessions.

NEW QUESTION # 25

Refer to the exhibit. Cisco NSO uses the Bandwidth on Demand application in Cisco WAE Automation Server to find a path for the SR policies that are being delegated in the network.

Based on the data that is collected from the network, the average utilization of the links is around 20%. When a network operator initiates a new service instance in Cisco NSO that requires around 10% of available bandwidth, Cisco WAE cannot find a path in the network. How should a network operator solve the problem?

- A. Enable the Bandwidth Optimization application to perform network bandwidth optimization.
- B. Increase the threshold in the bw-on-demand configuration to be more than 30%.
- C. Disable the WMD component, which prevents using the near real-time network model.
- D. Enable XTC to process the data that is received from the network.

Answer: B

Explanation:

The util-threshold in the bw-on-demand configuration is currently set to 10.0, which means paths will only be considered if link

utilization is below 10%. Since the average utilization is around 20%, no suitable path is found. Increasing the threshold to above 20% allows Cisco WAE to consider paths with higher utilization, enabling path selection for the new service instance.

NEW QUESTION # 26

Refer to the exhibit. Which lines of code need to be placed on the snippet where the code is missing in the script to connect to a Cisco IOS XR device via NETCONF over port 10000 and download the running-config in XML format?

- A.
- B.
- C.
- D.

Answer: A

Explanation:

This option uses the variables host, PORT, USER, and PASSWORD as defined earlier in the script, and retrieves the running configuration in XML format from a Cisco IOS XR device using NETCONF.

NEW QUESTION # 27

.....

While all of us enjoy the great convenience offered by 300-535 information and cyber networks, we also found ourselves more vulnerable in terms of security because of the inter-connected nature of information and cyber networks and multiple sources of potential risks and threats existing in 300-535 information and cyber space. Taking this into consideration, our company has invested a large amount of money to introduce the advanced operation system which not only can ensure our customers the fastest delivery speed but also can encrypt all of the personal 300-535 information of our customers automatically. In other words, you can just feel rest assured to buy our 300-535 exam materials in this website and our advanced operation system will ensure the security of your personal information for all it's worth.
