2V0-16.25 Latest Test Labs, 2V0-16.25 Reliable Test Topics

Please don't worry about the purchase process because it's really simple for you. The first step is to select the 2V0-16.25 test guide, choose your favorite version, the contents of different version of our 2V0-16.25 exam questions are the same, but different in their ways of using. We have three different versions for you to choose: PDF, Soft and APP versions. The second step: fill in with your email and make sure it is correct, because we send our 2V0-16.25 learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest 2V0-16.25 version.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q43-Q48):

NEW QUESTION # 43

What is the purpose of a port group on a Distributed Switch?

- A. To allocate CPU and memory resources to virtual machines.
- B. To manage storage I/O performance.
- C. To enable vSAN connectivity.
- **D. To define a logical grouping of virtual ports for network traffic segmentation.**

Answer: D

Explanation:

A port group on a vSphere Distributed Switch (VDS) provides:

- * Logical grouping of virtual ports.
- * Defines network policies such as VLAN IDs, traffic shaping, security policies, and teaming.
- * Used for segmenting traffic types (vMotion, vSAN, management, VM traffic).

Other options:

- * A. Enable vSAN connectivity# Achieved by assigning vSAN traffic to a port group, but not the main definition.
- * B. Allocate CPU/memory resources# Done via resource pools, not port groups.
- * D. Manage storage I/O performance# Done with Storage I/O Control, not port groups.

References:

VMware vSphere 9.0 - vSphere Networking Basics

VMware Docs: Port Groups on Distributed Switch

NEW QUESTION # 44

An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.

Which configuration step will satisfy the requirement?

- A. Configure notification to use generic contact information.
- B. Configure notification to write a file to an output folder.
- **C. Configure notification to specific alert recipients.**
- D. Configure notification for only critical alerts.

Answer: C

Explanation:

In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:

- * You assign specific recipients to notifications.
- * This avoids alert fatigue and ensures teams only see alerts they are responsible for.

Other options:

- * A. Write to file# Not for stakeholder notifications.
- * B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.
- * D. Generic contact info# Sends to broad groups, not selective.

VMware Cloud Foundation 9.0 - Alerting and Notification Settings

VMware Docs: Configuring Notifications in vRealize Operations

NEW QUESTION # 45

An administrator is informed that a digital certificate used by vSphere has been revoked by the issuing Certificate Authority (CA) before the scheduled expiration date. The administrator checks the Certificate Revocation List (CRL) in VMware Cloud Foundation (VCF) Operations but the CRL tab is not activated.

What must the administrator do to view the CRL?

- A. Select the External Event Based Active Symptoms under Global Settings.
- B. Set the Threshold For Adapters Certificate Expiration Alert to 6 under Global Settings.
- **C. Select the Activate Standard Certificate Validation under Global Settings.**
- D. The CRL tab is not available when VCF Operations is licensed under vSphere Foundation.

Answer: C

Explanation:

In VCF Operations, the Certificate Revocation List (CRL) tab is visible only when Standard Certificate Validation is activated in Global Settings.

* Once enabled, administrators can view the CRL tab and monitor revoked certificates.

Other options:

* A. External Event Based Active Symptoms# Related to alerting, not CRL.

* C. Threshold for Expiration Alert# Configures warnings, not CRL visibility.

* D. Not available under vSphere Foundation license# Incorrect; CRL is available if validation is enabled.

NEW QUESTION # 46

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.
- **B. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.**
- C. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.
- D. Disconnect the vCenter from Active Directory.

Answer: B

Explanation:

To ensure compromised users cannot access vCenter resources:

* Assign the No Access role at the vCenter level.

* Enable propagation so this restriction applies to all child objects.

* This guarantees zero permissions for SUSPECT_USERS.

Other options:

* B. Administrator with uncheck propagate# Still gives dangerous access at root level.

* C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.

* D. Read-only role# Still grants access, not acceptable during investigation.

NEW QUESTION # 47

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Operations
- B. VCF Automation
- C. VCF Fleet Management
- **D. vSphere Client**

Answer: D

Explanation:

To deploy the VCF Operations for Logs OVA appliance:

* The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.

* After deployment, the appliance can be configured and integrated with VCF.

Other options:

* A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.

* C. VCF Automation# Provides automation workflows, not appliance deployment.

* D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.
