EMC Dell Cloud Infrastructure and Services Foundations v2 Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

What is the function of problem management?

- A. Track service degradation periods to check for SLA violations
- **B. Prevent incidents that share common symptoms from occurring**
- C. Detect and record all incidents in the cloud infrastructure
- D. Document incident history used as input for change management

Answer: B

NEW QUESTION # 65

An organization requires double the processing capacity for a specific duration to handle increased workload.

For the remaining period, the organization might want to release the idle resources to save costs. The workload variations may be seasonal or transient.

Which cloud characteristic enables the consumer to handle such variations in workloads and IT resource requirements?

- A. On-demand self-service
- **B. Rapid elasticity**
- C. Resource pooling

Answer: B

NEW QUESTION # 66

What is true of a cloud service design best practice?

- A. Services should operate dependently.
- B. Services are inherently more complex and reduce administrative costs.
- C. Services should be readily available and dependent on one another.
- **D. Services must be loosely coupled.**

Answer: D

NEW QUESTION # 67

What allows an orchestrator to interact with other software components and devices in a cloud infrastructure?

- **A. Application programming interface**
- B. Cloud portal
- C. Service template
- D. Unified manager

Answer: A

NEW QUESTION # 68

Which service operation management activity expedites and restores cloud services to normal operations when unplanned events cause an interruption to services?

- Answer: D**
