It is also crucial to develop an in-depth understanding of the certification exam's various topics, including AEM installation, configuration, customization, and deployment. Furthermore, the aspiring candidate must have practical experience in working with AEM and building various AEM applications.

### Adobe Experience Manager Architect Master Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

An AEMaaCS customer wants to have a sub section in site to accept data from an end user, which may be text as well as documents. The site is expected to have high data input which would need moderation and masking before making it live for public access. Due to a legal content policy, the data collected through the site cannot be shared outside the organization. What would an architect recommend?

- A. Utilize Reverse Replication through publish servers
- **B. Utilize data storage/APIs outside of AEMaaCS**
- C. Utilize backward Sling Content Distribution from publish server
- D. Utilize AEM communities with MSRP topology

**Answer: B**

#### NEW QUESTION # 49

A client is migrating the content from a legacy website to an existing AEM implementation. An Architect evaluates the content of the legacy site and determine-that there are approximately 20,000 pages with a common structure, and a few hundred pages that do not follow a pattern. The client wants to complete the migration as soon as possible. Which approach should the Architect recommend for the content migration?

- A. Recreate the entire content manually with a group of Content Authors
- B. Use Site importer to import the content into AEM
- **C. Migrate all common pages using the ETL procedure and use manual authoring for the rest**
- D. Migrate all common pages using the ETL procedure with multiple rounds

**Answer: C**

Explanation:

"migrating all common pages using the ETL procedure and using manual authoring for the rest can reduce the time and effort required for the content migration".

#### NEW QUESTION # 50

During development the AEM Publisher server keeps crashing randomly. The deployment included a new static FAQ component that was used in the websites Contact Us page. An Architect investigates to find the root cause for the random failures, and notices the following parameters:

- \* The server slows down when requests are sent to the Contact us page
- \* The number of requests to the page were very few
- \* Heap dump shows a large number of instances of the FAQ component

What is likely causing this issue?

- A. The component has a cyclic dependency to itself
- B. The component triggers a traversal query.
- C. The page was not cached in the Dispatcher.
- D. The JVM garbage collection is not running

**Answer: A**

Explanation:

According to Adobe Experience Manager documentation<sup>3</sup>, a cyclic dependency occurs when a component includes itself either directly or indirectly through another component. This can cause an infinite loop of rendering and consume excessive memory resources, leading to server crashes. To avoid this issue, components should not include themselves or other components that include them

#### NEW QUESTION # 51

A customer wants to implement an AEM solution to serve localized content to several regional websites. Which AEM capability should the Architect recommend?

- A. Use i18N API and Multi Site Manager
- B. Use translation connector and translation workflows
- C. Use translation connector and Multi Site Manager
- D. Use translation connector and i18N API

**Answer: D**

#### NEW QUESTION # 52

A client wants to change how they publish their content. Refer to the following client business requirements:

- \* The client has a seasonal business that has significant content changes across their site that need to be rolled out at once based on the season change over date.
  - \* The content authors need to be able to work one season in advance of publish dates to ensure that all changes can be completed on time.
  - \* The content authors need a way to indicate that all the seasonal changes are ready. If the content changes are not completed, then the pages should not get published.
  - \* The content authors need the ability to modify the current live pages without rolling back changes for a future content rollout.
- What approach should the Architect recommend?

- A. Use the Manage Publication with scheduling value set to the season change over date when changes are completed.
- B. Use the Versioning feature when editing a page to toggle and publish changes when ready.
- C. Use Launches inside of AEM for each new season and use the production ready flag to show changes are completed.
- D. Create a Project inside of AEM for each new season and create a task for notifying that changes are completed.

**Answer: A**
