Itcerttest FCSS\_LED\_AR-7.6 study material also has a timekeeping function that allows you to be cautious and keep your own speed while you are practicing, so as to avoid the situation that you can't finish all the questions during the exam. With FCSS - LAN Edge 7.6 Architect FCSS\_LED\_AR-7.6 Learning Materials, you only need to spend half your money to get several times better service than others.

## Fortinet FCSS\_LED\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Central Management: This section addresses managing FortiSwitch via FortiManager over FortiLink, implementing zero-touch provisioning, configuring VLANs, ports, and trunks, and setting up FortiExtender and FortiAP devices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Authentication: This domain covers advanced user authentication using RADIUS and LDAP, two-factor authentication with digital certificates, and configuring syslog and RADIUS single sign-on on FortiAuthenticator.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Zero-Trust LAN Access: This domain covers machine authentication, MAC Authentication Bypass, NAC policies for wireless security, guest portal deployment, and advanced solutions like FortiLink NAC, dynamic VLAN, and VLAN pooling.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Monitoring and Troubleshooting: This section covers configuring quarantine mechanisms, managing FortiAIOps, troubleshooting FortiGate communication with FortiSwitch and FortiAP, and using monitoring tools for wireless connectivity.</li> </ul>

## FCSS\_LED\_AR-7.6 Latest Braindumps Free, Test FCSS\_LED\_AR-7.6 Collection

To gain all these benefits you need to enroll in the FCSS - LAN Edge 7.6 Architect Certification EXAM and put all your efforts to pass the challenging FCSS - LAN Edge 7.6 Architect (FCSS\_LED\_AR-7.6) exam easily. Do you want to gain all these Fortinet FCSS\_LED\_AR-7.6 Certification personal and professional advantages? Looking for the quick, proven, and easiest way to pass the final FCSS\_LED\_AR-7.6 exam?

### Fortinet FCSS - LAN Edge 7.6 Architect Sample Questions (Q107-Q112):

#### NEW QUESTION # 107

Which encryption protocols can CAPWAP use to secure the data channel when communicating between a FortiGate wireless controller and FortiAP?

Response:

- A. WPA3 and TLS
- B. SSL/TLS and IPsec
- C. SSH and SSL
- **D. DTLS and IPsec**

**Answer: D**

#### NEW QUESTION # 108

Which three conditions can FortiLink NAC use to enforce network access control?

(Choose three)

Response:

- **A. User identity**
- B. Interface MTU
- C. Switch stack priority
- **D. Device type**
- **E. MAC address**

**Answer: A,D,E**

#### NEW QUESTION # 109

Which FortiAnalyzer dashboard provides AIOps-related summaries and alerts?

Response:

- A. Fabric View > AI-Powered Insights
- B. Log View > Threats
- C. FortiView > System Events
- **D. Incidents & Events > AIOps**

**Answer: D**

### NEW QUESTION # 110

A network engineer is deploying FortiGate devices using zero-touch provisioning (ZTP). The devices must automatically connect to FortiManager and receive their configurations upon first boot. However, after powering on the devices, they fail to register with FortiManager.

What could be a possible cause of this issue?

- A. The ZTP process works only when devices are connected using a console cable.
- **B. The FortiManager IP address is not reachable over TCP port 541.**
- C. The FortiGate device requires manual intervention to accept the FortiManager connection.
- D. The FortiGate device must be preloaded with a configuration file before ZTP can function.

**Answer: B**

Explanation:

The LAN Edge 7.6 Architect Study Guide explicitly confirms that during the ZTP process, after FortiGate retrieves the FortiManager address (via DHCP Option 240 for IP address or Option 241 for FQDN), it contacts FortiManager to initiate a secure tunnel on TCP port 541. If that port is unreachable - due to firewall rules, routing issues, or misconfiguration - the tunnel cannot be established, and registration fails.

The guide also confirms in the device registration section: "During device registration, FortiManager and FortiGate create a secure tunnel on TCP port 541. The tunnel is used for checking device status and configuration, as well as configuration installation." Why the other options are wrong:

\* A is incorrect - ZTP is designed specifically to be automated and does not require manual acceptance for the initial tunnel establishment in the standard ZTP flow.

\* B is incorrect - ZTP operates over the network (LAN/WAN), not via console cable; it is a network-based provisioning process.

\* C is incorrect - ZTP's entire purpose is to allow devices to be deployed without a pre-loaded configuration on-site; the configuration is pushed by FortiManager after registration.

### NEW QUESTION # 111

When the MAC address of a device is placed in quarantine on FortiSwitch, what happens to its egress traffic?

- A. Traffic is sent to an allowed VLAN.
- B. Traffic is sent as untagged traffic.
- **C. Traffic is sent to an access VLAN.**
- D. Traffic is assigned to the native VLAN.

**Answer: C**

Explanation:

When a device is quarantined, its traffic is redirected to the quarantine access VLAN configured on the FortiSwitch port, isolating it from normal network access while still allowing controlled connectivity for remediation.

### NEW QUESTION # 112
