3V0-32.23 Latest Exam Fee & Reliable 3V0-32.23 Dumps Pdf

Candidates who become VMware 3V0-32.23 certified demonstrate their worth in the VMware field. 3V0-32.23 certification is proof of their competence and skills. This is a highly sought after credential and it makes career advancement easier for the candidate. To become VMware 3V0-32.23 Certified, you must pass the Cloud Management and Automation Advanced Design (3V0-32.23) Exam. For this task, you need actual and updated 3V0-32.23 Questions.

VMware 3V0-32.23 certification exam is intended for IT professionals who work with VMware vRealize Suite, including architects, consultants, and engineers. 3V0-32.23 exam is ideal for individuals who have already earned the VMware Certified Professional (VCP) certification and are looking to further their knowledge and skills in cloud management and automation. Passing 3V0-32.23 exam demonstrates that you have the necessary expertise to design and implement VMware-based cloud management and automation solutions in complex environments.

VMware 3V0-32.23 Certification Exam covers a wide range of topics related to cloud management and automation, including designing and implementing SDDC automation solutions, designing and implementing vRealize automation solutions, designing and implementing vRealize Orchestrator solutions, and designing and implementing vRealize Operations solutions.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q176-Q181):

NEW QUESTION # 176
An administrator maintains multiple tenants on a vRealize Automation environment. Consumers of Tenant B have requested to modify their current tenant architecture from the default to incorporate their own mail servers so that their user base can respond to

notifications for completing work items and approvals. Consumers of Tenant A insist that no change be made to their current mail settings.

Which design changes are required to the architecture to meet the requirements for both tenants?

- A. Log in to Tenant B as an IaaS administrator and grant approval administrator privileges to the required user base of the tenant.
- B. Log in to the default tenant as administrator and under the Administration tab, select Tenant B, then add and configure the requested new mail servers for the tenant.
- C. Log in to Tenant B as a tenant administrator and under the Administration tab, select each mail server and click Override Global, then configure the requested new mail servers.
- D. Log in to the default tenant as administrator and under the Administration tab, select Email Servers, then add and configure the additional new mail servers.

Answer: C

NEW QUESTION # 177

Drag and drop each Design Quality from the left into the box corresponding to the correct requirement on the right.

Design Quality		Requirement
Availability		Provide the capability to recover from an unexpected incident that affects the availability of an environment.
Manageability		Deliver the standards of responsiveness of components of the desired environment to meet the application workloads deployed and SLAs specified.
Performance		Provide overall data control, confidentiality, integrity, accessibility, governance, and risk management, often including the capability to demonstrate or achieve compliance with regulations.
Recoverability		Provide ease of lifecycle operations. Sub-qualities may include scalability and flexibility.
Security		Deliver highly available operation, as measured by percent uptime of relevant components.

Answer:

Explanation:

Design Quality		Requirement
Availability	Recoverability	Provide the capability to recover from an unexpected incident that affects the availability of an environment.
Manageability	Performance	Deliver the standards of responsiveness of components of the desired environment to meet the application workloads deployed and SLAs specified.
Performance	Security	Provide overall data control, confidentiality, integrity, accessibility, governance, and risk management, often including the capability to demonstrate or achieve compliance with regulations.
Recoverability	Manageability	Provide ease of lifecycle operations. Sub-qualities may include scalability and flexibility.
Security	Availability	Deliver highly available operation, as measured by percent uptime of relevant components.

Design Quality		Requirement
Availability	Recoverability	Provide the capability to recover from an unexpected incident that affects the availability of an environment.

NEW QUESTION # 178

What design decision(s) would you need to address in a VMware Aria Operations for Logs physical design?

- A. Selecting team-building activities
- B. Defining log collection, storage, and analysis processes
- C. Determining company financial budgets
- D. Choosing office decorations

Answer: B

NEW QUESTION # 179

Identify the example that best represents a technical requirement rather than a business requirement.

- A. "The application must support 1000 concurrent users."
- B. "The system should be accessible on both desktop and mobile devices."
- C. "The software should increase customer engagement by 20%."
- D. "The platform should target users in the age group of 18-35."

Answer: A

NEW QUESTION # 180

An architect is responsible for reviewing the requirements for an existing Cloud Management solution design.
Which requirement would be considered as a functional requirement?

- A. The solution must support the management of workloads within a public cloud.
- B. The solution must meet a Recovery Time Objective (RTO) of 4 hours.
- C. The solution must meet a Recovery Point Objective (RPO) of 1 day.
- D. The solution must meet a monthly uptime SLA of 99.5%.

Answer: A

NEW QUESTION # 181

......

3V0-32.23 test questions have a mock examination system with a timing function, which provides you with the same examination environment as the real exam. Although some of the hard copy materials contain mock examination papers, they do not have the automatic timekeeping system. Therefore, it is difficult for them to bring the students into a real test state. With 3V0-32.23 Exam Guide, you can perform the same computer operations as the real exam, completely taking you into the state of the actual exam, which will help you to predict the problems that may occur during the exam, and let you familiarize yourself with the exam operation in advance and avoid rushing during exams.
