

# Valid Clear HPE7-J02 Exam–The Best Pdf Braindumps Providers for HPE7-J02: Advanced HPE Storage Integrator Solutions Written Exam

P.S. Free 2026 HP HPE7-J02 dumps are available on Google Drive shared by PracticeMaterial: [https://drive.google.com/open?id=1iRW2oJglap5\\_9NyHvr2I8IpGHLZGindx](https://drive.google.com/open?id=1iRW2oJglap5_9NyHvr2I8IpGHLZGindx)

Preparation for the professional Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam is no more difficult because experts have introduced the preparatory products. With PracticeMaterial products, you can pass the HP HPE7-J02 Exam on the first attempt. If you want a promotion or leave your current job, you should consider achieving a professional certification like Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam.

## HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li></ul>

## Interactive HP HPE7-J02 Online Practice Test Engine

PracticeMaterial offers affordable Advanced HPE Storage Integrator Solutions Written Exam exam preparation material. You don't

have to go beyond your budget to buy updated HP HPE7-J02 Dumps. Use the coupon code 'SAVE50' to get a 50% exclusive discount on all HP Exam Dumps. To make your HPE7-J02 Exam Preparation material smooth, a bundle pack is also available that includes all the 3 formats of dumps questions.

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q33-Q38):

### NEW QUESTION # 33

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By adding more arrays and capacity to a single scale-out group.
- B. By initially selecting the timeless storage option for the array.
- C. By selecting more flash to cache ratio on the expansion shelves.
- D. By including more NIC cards to load balance host traffic.

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.

C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.

D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.

Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.

Reference: HPE Alletra 6000 Technical Architecture Guide.

### NEW QUESTION # 34

A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.

How would you respond regarding the new setup?

- A. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.
- B. Quorum witness appliance security patch updates follow the array release train updates.
- C. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.
- D. Quorum witness appliance can be set to automatically download and apply available updates.

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes. This resolves the audit concern.

Distractors:

A: Applies to older 3PAR environments, not Alletra/Primera.

C/D: Quorum Witness is no longer an appliance - it is SaaS managed, so these don't apply.

Key Concept: Alletra Quorum Witness is SaaS-managed, removing patching responsibility.

Reference: HPE Alletra Peer Persistence and Cloud Quorum Witness Guide.

### NEW QUESTION # 35

You are troubleshooting a storage environment using HPE Alletra Storage MP B10000 in a Peer Persistence configuration. A customer reports high latency when accessing data from applications.

When reviewing the MPIO path status on the host, what should be the path status for connections to the storage array located in the remote data center?

- A. Passive
- B. Active Optimized
- C. Standby
- **D. Active Non-optimized**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In an HPE Peer Persistence configuration (supported on HPE Alletra MP, Primera, and 3PAR), hosts see volumes presented from arrays at both sites. For optimal load balancing and transparent failover, the local array paths are shown as "Active Optimized" while the remote array paths are marked "Active Non-optimized". The "Non-optimized" label indicates these paths are functional but involve remote access with higher latency. This design ensures automatic transparent failover if the local site becomes unavailable.

Distractors:

A: "Active Optimized" applies only to local array paths, not remote ones.

B: Passive paths are typical of ALUA implementations without Peer Persistence, not here.

D: "Standby" is not the term used in Peer Persistence multipathing.

Key Concept: MPIO with Peer Persistence (ALUA Active/Active configuration).

Reference: HPE Primera/Alletra Peer Persistence Best Practices Guide.

### NEW QUESTION # 36

Your customer is a regional bank with branches in two different cities. Each branch is run as an isolated independent business and IT manages their SANs as separate fabrics to limit the scope of any failure. They use B-Series Switches.

The customer has requested a disaster recovery option that will allow replication between the two sites without merging the fabrics.

Which SAN technology meets the requirements?

- A. Fabric partitioning
- B. FCIP
- **C. FC-FC routing**
- D. NPIV

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

FC-FC routing (also known as Fibre Channel Routing / LSANs on B-Series switches) allows replication between separate SAN fabrics without merging them. This supports disaster recovery scenarios while preserving fabric isolation, exactly matching the bank's requirement.

Distractors:

A: FCIP tunnels extend Fibre Channel over IP networks, but this typically merges SAN domains.

C: NPIV (N\_Port ID Virtualization) allows multiple virtual WWNs per port, not cross-fabric replication.

D: Fabric partitioning is zoning and segmentation within a single fabric, not between independent fabrics.

Key Concept: FC-FC routing on Brocade (B-Series) for SAN isolation with replication.

Reference: HPE B-Series SAN Design Guide, Brocade FCR/LSAN Concepts.

### NEW QUESTION # 37

Refer to the exhibit.

Your customer had an unexpected failure of their current storage array, causing them to lose some of their critical data. As a result, they are looking for a storage array with a guarantee of 100% data availability to prevent this failure and loss in the future.

They need 80TB raw and two new 25GbE top-of-rack switches to connect to their environment.

They expect 5% annual growth.

Which correction should be made to the configuration in the exhibit to meet the customer's requirements?

- A. Add 2× Aruba 8325 switches
- B. Decrease to 20 × 3.84TB drives
- C. HPE GreenLake financial model
- **D. Change to 25G networking**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows the use of 32Gb FC HBAs and 100GbE switches (Aruba 100G). However, the customer specifically requires 25GbE top-of-rack switches. Therefore, the configuration needs to be corrected to 25GbE networking. The HPE Alletra MP B10000 guarantees 100% data availability SLA, so the primary correction is networking alignment, not drives or financial model.

Distractors:

B: Reducing drives reduces raw capacity below 80TB requirement.

C: GreenLake is a consumption model but not the technical correction required.

D: Aruba 8325 is a core switch option; customer only asked for ToR 25GbE.

Key Concept: Networking alignment with requirements.

Reference: HPE Alletra MP Ordering and Configuration Guide.

## NEW QUESTION # 38

.....

With the rapid development of the world economy, it has been universally accepted that a growing number of people have longed to become the social elite. The HPE7-J02 latest study guide materials will be a shortcut for a lot of people who desire to be the social elite. If you try your best to prepare for the HPE7-J02 Exam and get the related certification in a short time, it will be easier for you to receive the attention from many leaders of the big company like us, and it also will be very easy for many people to get a decent job in the labor market with the help of our HPE7-J02 learning guide.
