

AZ-140 Clear Exam, AZ-140 Latest Exam Forum

P.S. Free & New AZ-140 dumps are available on Google Drive shared by Pass4sureCert: <https://drive.google.com/open?id=1PjIEShi50dOfj2psbKsVJxE6unVwvf8>

We provide all candidates with AZ-140 test torrent that is compiled by experts who have good knowledge of exam, and they are very experience in compile AZ-140 study materials. Once we have latest version, we will send it to your mailbox as soon as possible. our AZ-140 exam questions just need students to spend 20 to 30 hours practicing can let them have the confidence to pass the AZ-140 Exam, so little time great convenience for some workers. It must be your best tool to pass your AZ-140 exam and achieve your target.

Microsoft AZ-140 Exam Syllabus Topics:

Section	Weight	Objectives
Configure access and security	20-25%	- Configure security • 1. Implement Azure Private Virtual Network • 2. Implement session security and bandwidth recommendations • 3. Configure Microsoft Defender for Cloud Apps • 4. Configure Conditional Access policies for Azure Virtual Desktop - Configure role-based access control (RBAC) • 1. Assign roles to users and groups • 2. Implement the principle of least privilege • 3. Plan Azure Virtual Desktop access roles - Configure authentication • 1. Configure Azure AD join for Azure Virtual Desktop • 2. Configure Hybrid AD join for Azure Virtual Desktop • 3. Implement single sign-on (SSO)

Plan and design an Azure Virtual Desktop architecture	15-20%	- Design a business continuity and disaster recovery (BCDR) strategy • 1. Plan for scenarios requiring multi-session desktop pools • 2. Plan for identity and authentication • 3. Plan for user profiles • 4. Plan for host pool scaling • 5. Recommend appropriate licensing model - Design an Azure Virtual Desktop topology • 1. Recommend subscriptions and subscriptions limits • 2. Recommend network capacity and connectivity • 3. Design a metadata location for FSLogix • 4. Recommend a naming convention for host pools and session hosts
Deploy an Azure Virtual Desktop solution	20-25%	- Create and deploy host pools • 1. Implement a validation environment • 2. Deploy a host pool by using PowerShell or other tools • 3. Configure host pool assignment types (pooled or personal) • 4. Deploy a host pool by using the Azure portal - Create and manage session hosts • 1. Configure Azure VM image for host pools • 2. Deploy Windows 10/11 multi-session VMs • 3. Implement scaling plans for autoscaling • 4. Add session hosts to existing host pools - Create and manage workspaces and application groups • 1. Publish applications and desktops • 2. Create and configure workspaces • 3. Assign users to application groups • 4. Create and configure application groups
Monitor and maintain an Azure Virtual Desktop infrastructure	15-20%	- Troubleshoot Azure Virtual Desktop issues • 1. Troubleshoot application issues • 2. Troubleshoot user experience issues • 3. Troubleshoot session host issues • 4. Troubleshoot Azure Virtual Desktop connectivity issues - Implement monitoring and alerting • 1. Configure Azure Virtual Desktop insights • 2. Create and configure alerts and notifications • 3. Monitor Azure Virtual Desktop with Azure Advisor • 4. Set up monitoring dashboards - Manage resilience and availability • 1. Implement backup and disaster recovery • 2. Plan for disaster recovery scenarios • 3. Configure host pool availability options

Manage user experience and desktop settings	15-20%	- Install and configure applications • 1. Implement session-specific application publishing • 2. Configure MSIX app attach • 3. Configure application packages for host pools - Configure remote connections and experience • 1. Configure bandwidth and latency recommendations • 2. Configure quality user experience • 3. Configure display protocols • 4. Configure Remote Desktop Protocol (RDP) properties - Configure user profiles • 1. Configure profile containers for host pools • 2. Configure cloud cache for FSLogix • 3. Implement FSLogix profile containers • 4. Implement user profile disks

Windows computers support the desktop practice test software. Pass4sureCert has a complete support team to fix issues of Microsoft AZ-140 practice test software users. Pass4sureCert practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their Configuring and Operating Microsoft Azure Virtual Desktop (AZ-140) preparation status and remove their mistakes.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q303-Q308):

NEW QUESTION # 303

You need to configure a conditional access policy to meet the authentication requirements.

What should you include in the policy configuration? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 304

You have an Azure Virtual Desktop deployment.

In Azure Advisor, you discover the following recommendation related to Azure Virtual Desktop:

Impact: Medium

100

Description: No validation environment enabled

Potential Benefit: Ensure business continuity through AVD service deployments

Impacted Resource: 1 Host Pool

What can you validate by implementing the recommendations?

- A. Security settings of Azure Virtual Desktop
- **B. Preview features for Azure Virtual Desktop**
- C. Capacity requirements of session hosts
- D. Azure Site Recovery failover of the session hosts

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-validation-host-pool?tabs=azure-portal> Validation host pools let you monitor service updates before the service applies them to your standard or non-validation environment.

NEW QUESTION # 305

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Server1 that runs Windows Server and is connected to VNet3.

You need to deploy the Azure Virtual Desktop host pools shown in the following table.

The solution must meet the following requirements:

- * The session hosts in Pool1 must access Server1 via the Microsoft backbone network.
- * The session hosts in Pool2 must access storage1 via the Microsoft backbone network.

What should you configure on the virtual networks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 306

You have an Azure Virtual Desktop deployment.

You plan to use FSLogix profile containers.

You need to recommend a solution that will be used to store the containers. The solution must meet the following requirements:

- * The containers must be stored on solid-state drives (SSDs)
- * Minimize administrative effort
- * Minimize cost

What should you recommend?

- A. Azure Files Standard
- B. Azure Blob Storage Premium
- C. Azure Files Premium
- D. Azure NetApp Files

Answer: C

Explanation:

"Use Azure Files for FSLogix user profile data with Azure Virtual Desktop Azure Files provides multiple tiers that you can select based on your cost and performance needs."

- <https://azure.microsoft.com/en-us/services/storage/files/#security>

"Premium file shares enable highly I/O-intensive workloads, with high throughput and low latency. Premium file shares are offered on high-performance solid-state drive (SSD) based storage."

- <https://azure.microsoft.com/en-us/pricing/details/storage/files/>

NEW QUESTION # 307

You have an Azure subscription that contains the storage accounts shown in the following table.

Name	Location	Azure Files share
storage1	West US	share1
storage2	West US	share2, share3

The subscription contains the vaults shown in the following table.

Name	Location	Type
Vault1	East US	Recovery Services vault
Vault2	West US	Recovery Services vault
Vault3	West US	Recovery Services vault
Vault4	West US	Backup vault

The subscription contains the Azure Virtual Desktop host pools shown in the following table.

Name	Session host	Location	FSLogix user profile location
Pool1	P1-0	West US	share1
Pool2	P2-0	West US	share2
Pool3	P3-0	West US	share3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE Each correct selection is worth one point.

Statements	Yes	No
The FSLogix user profiles in Pool1 can be backed up to Vault1.	☐	☐
The FSLogix user profiles in Pool2 can be backed up to Vault2.	☐	☐
P3-0 can be backed up to Vault4.	☐	☐

Answer:

Explanation:

Statements	Yes	No
The FSLogix user profiles in Pool1 can be backed up to Vault1.	☐	☒
The FSLogix user profiles in Pool2 can be backed up to Vault2.	☒	☐
PS-0 can be backed up to Vault4.	☒	☐

NEW QUESTION # 308

.....

Considered many of our customers are too busy to study, the AZ-140 real study dumps designed by our company were according to the real exam content, which would help you cope with the AZ-140 exam with great ease. The masses have sharp eyes, with so many rave reviews and hot sale our customers can clearly see that how excellent our AZ-140 Exam Questions are. After carefully calculating about the costs and benefits, our AZ-140 prep guide would be the reliable choice for you, for an ascending life. And you can free download the demo of our AZ-140 exam questions before your payment.
