答案： A,B,D

問題 #68

What are the key components of RISE with SAP Methodology? Note: There are 3 correct answers to this question.

- A. Follow a standardized framework
- B. Leverage the integrated toolchain
- C. Provide solution activations
- D. Access to expert guidance
- E. Explore Business AI scenarios

答案： A,B,D

解題說明：

Step 1 - Understanding the Question

The question refers to the key components of the RISE with SAP Methodology- the structured approach SAP uses to guide customers through their digital transformation journey from SAP ECC or legacy systems to SAP S/4HANA Cloud, Private Edition. This methodology ensures a standardized, guided, and value-focused transformation process supported by tools, expertise, and best practices.

Step 2 - Evaluate Each Option

A). Explore Business AI scenarios

* Business AI capabilities are part of SAP's innovation portfolio, but they are not defined as core components of the RISE with SAP Methodology itself.

* The methodology focuses on transformation framework and execution, not specific technologies like AI.

Result: Incorrect.

B). Follow a standardized framework

* RISE with SAP is built around SAP Activate, a standardized implementation framework with defined phases (Discover, Prepare, Explore, Realize, Deploy, Run).

* It ensures consistent project execution, governance, and delivery quality across transformation projects.

Result: Correct - A standardized framework is a foundation of RISE with SAP Methodology.

C). Access to expert guidance

* RISE with SAP includes access to SAP experts, advisory services, and best practices through the Customer Success Partner and SAP Value Assurance teams.

* This ensures expert-led support throughout the migration and transformation journey.

Result: Correct - Expert guidance is a formal component of the methodology.

D). Provide solution activations

* Solution activation activities belong to the SAP Activate methodology phases, not directly to RISE with SAP's high-level transformation methodology components.

Result: Incorrect.

E). Leverage the integrated toolchain

* RISE with SAP provides access to an integrated toolchain that includes:

* SAP Signavio Process Insights- for process discovery and optimization.

* SAP LeanIX- for enterprise architecture and application portfolio management.

* SAP Cloud ALM- for implementation and operations management.

* This toolchain supports continuous improvement and smooth transition to S/4HANA.

Result: Correct - The integrated toolchain is a core pillar of RISE with SAP Methodology.

問題 #69

In the SAP Activate prepare phase, the cloud project is set up and officially launched. Which change management activities are usually started in this phase? Note: There are 3 correct answers to this question.

- A. Facilitate the role mapping process
- B. Develop an initial change plan for the cloud project
- C. Develop and align the change network strategy
- D. Identify the key stakeholders and conduct a stakeholder analysis
- E. Conduct a detailed change impact analysis

答案： B,C,D

解題說明：

Step 1 - Understanding the Question

In the SAP Activate methodology, the Prepare phase is where the project is officially launched, governance is established, and foundational change management (OCM) activities begin.

Change management in this phase focuses on building awareness, defining structure, and planning- not yet detailed change execution.

Step 2 - Evaluate Each Option

A). Develop and align the change network strategy

* During the Prepare phase, one of the first organizational change activities is to design the change network- a group of change agents and champions who support adoption across business areas.

* The strategy defines roles, responsibilities, and communication lines for this network.

* This early setup enables effective stakeholder engagement during later phases.

Result: Correct - The change network strategy is initiated and aligned in the Prepare phase.

B). Identify the key stakeholders and conduct a stakeholder analysis

* Early stakeholder identification is a core task in the Prepare phase.

* The project team identifies business and IT stakeholders who influence or are impacted by the project.

* A stakeholder analysis is then performed to understand their interests, influence, and readiness levels.

* This ensures targeted communication and support planning for each group.

Result: Correct - Stakeholder analysis is a standard activity of the Prepare phase.

C). Facilitate the role mapping process

* Role mapping links system roles to business users and is typically performed later - in the Explore or Realize phase, once business process requirements and system access needs are clearly defined.

* It is not a primary OCM activity in the Prepare phase.

Result: Incorrect - Conducted later in the project.

D). Conduct a detailed change impact analysis

* Detailed change impact analysis requires finalized process design, which occurs after Fit-to-Standard workshops in the Explore phase.

* In the Prepare phase, teams may perform only initial impact identification, not a detailed analysis.

Result: Incorrect - Performed during Explore.

E). Develop an initial change plan for the cloud project

* A high-level change plan is developed in the Prepare phase to outline change management goals, key activities, milestones, and success criteria.

* This plan serves as the foundation for detailed OCM execution plans in subsequent phases.

Result: Correct - Initial change plan development is a key Prepare phase deliverable.

Step 3 - Final Answer

The correct answers are:

A). Develop and align the change network strategy

B). Identify the key stakeholders and conduct a stakeholder analysis

E). Develop an initial change plan for the cloud project

問題 #70

How do you define the term Organizational Change Management?

- A. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits.
- B. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users.
- C. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users.
- **D. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits.**

答案： D
