

Authentic F5 F5CAB3 Exam Questions | F5CAB3 Free Sample

Exam B F5 101 100 Questions and Answers 2023-2024 with complete solution

What does HTTP status code 500 mean? - A. Service unavailable
B. Internal server error ###
C. Gateway timeout
D. Bad gateway

An administrator wants to insert per-session data in a user's browser so that user requests are directed to the same session.
Which session persistence method should the administrator use? - A. SSL persistence
B. Source address persistence
C. Destination address persistence
D. Cookie persistence ###

An organization needs to protect its data center from layer three-based and layer four-based exploits.
Which F5 product provides this functionality - A. AFM ###
B. ASM
C. GTM
D. APM

In which FTP mode is the server responsible for initiating the data connection back to the client? - A. Protected FTP
B. Active FTP ###
C. Secure FTP
D. Passive FTP

A company deploys F5 load balancers to manage a large number of secure applications. The company manages certificates. Which F5 product provides this functionality? - A. iHealth
B. BIG-IQ ###
C. GTM
D. LTM

What are two examples of network layer protocols? (Choose two) - A. ARP ###
B. TCP
C. IPv4
D. BGP
E. ICMP ###

Although it is not an easy thing for somebody to pass the F5CAB3 exam, DumpsValid can help aggressive people to achieve their goals. More qualified F5CAB3 certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition. This is the reason why we need to recognize the importance of getting our F5CAB3 Quiz torrent. And with our F5CAB3 exam questions, your dream will be easy to come true.

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our F5CAB3 real study dumps have the distinct advantage of fast delivery. On one hand, we adopt a reasonable price for you, ensuring people who are rich or poor have the equal access to buy our useful F5CAB3 real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet some problems during purchasing and using our F5CAB3 Prep Guide, you can contact with us through the email, and we will give you response and solution as quick as possible. With the commitment of helping candidates to pass F5CAB3 exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

>> [Authentic F5 F5CAB3 Exam Questions](#) <<

2026 F5 Professional Authentic F5CAB3 Exam Questions

Our F5CAB3 study materials boast three versions and they include the PDF version, PC version and the APP online version. The

clients can use any electronic equipment on it. If only the users' equipment can link with the internet they can use their equipment to learn our F5CAB3 study materials. They can use their cellphones, laptops and tablet computers to learn our F5CAB3 study materials. The great advantage of the APP online version is if only the clients use our F5CAB3 Study Materials in the environment with the internet for the first time on any electronic equipment they can use our F5CAB3 study materials offline later. So the clients can carry about their electronic equipment available on their hands and when they want to use them to learn our F5CAB3 study materials they can take them out at any time and learn offline.

F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q41-Q46):

NEW QUESTION # 41

A BIG-IP Administrator needs to apply persistence to a virtual server that is configured as a Performance (Layer 4) virtual server that allows access to a secure (TLS) e-commerce website.

What type of persistence profile can be used? (Choose one answer)

- A. Cookie persistence
- **B. Source Address Affinity**
- C. Microsoft RDP persistence
- D. Host persistence

Answer: B

Explanation:

A Performance (Layer 4) virtual server does not inspect or process application-layer data such as HTTP headers or cookies. Therefore, only Layer 4-compatible persistence methods can be used.

According to the BIG-IP Administration: Data Plane Configuration documentation:

Source Address Affinity persistence operates at Layer 4 and uses the client IP address to maintain session persistence.

It is fully compatible with Performance (Layer 4) virtual servers.

It works regardless of encryption, making it suitable for TLS-secured applications.

Why the other options are incorrect:

B . Cookie persistence

Requires an HTTP profile and Layer 7 inspection, which is not supported on Performance virtual servers.

C . Microsoft RDP persistence

Is protocol-specific and not applicable to web-based TLS traffic.

D . Host persistence

Requires HTTP host header inspection, which is not available at Layer 4.

Correct Resolution:

Source Address Affinity persistence is the appropriate choice for maintaining persistence on a Performance (Layer 4) virtual server handling TLS traffic.

Below is Batch 1 (Questions 1-10) extracted only from your uploaded document that are directly related to BIG-IP Administration: Data Plane Configuration topics (Virtual Servers, Pools, Load Balancing, Monitors, Persistence, SNAT, Profiles).

I have excluded system-only, licensing, support, hardware, HA management-only, and admin UI questions that are not Data Plane-focused.

Source: Your uploaded TMOS Administration v2.0 document

BATCH 1 (10 Questions)

NEW QUESTION # 42

All pool members are online and all other settings are default.

What might alter the load balancing behavior?

- A. Enabling SNAT Automap
- B. Adding a OneConnect profile
- **C. Adding a persistence profile**
- D. Enabling an HTTP fallback host

Answer: C

Explanation:

Persistence overrides load balancing decisions by maintaining client-to-server affinity.

NEW QUESTION # 43

During a high-demand event, the BIG-IP Administrator needs to limit the number of new connections per second to a Virtual Server. What should be applied?

- A. Connection Rate Limit
- B. Connection Limit
- C. OneConnect profile
- D. HTTP Compression profile

Answer: A

Explanation:

Connection rate limits restrict how many new connections are accepted per second, protecting application resources.

NEW QUESTION # 44

All pool members are online. All other virtual server settings are at default.

What might alter the load balancing behavior? (Choose one answer)

- A. Adding a OneConnect profile
- B. Adding a persistence profile
- C. Enabling a fallback host in the HTTP profile
- D. Enabling SNAT automap

Answer: B

Explanation:

By default, BIG-IP load balancing algorithms (such as Round Robin) distribute connections evenly across all available pool members. However, persistence profiles override normal load balancing decisions by forcing subsequent connections from a client to be sent to the same pool member.

According to the BIG-IP Administration: Data Plane Configuration documentation:

Persistence creates a client-to-server mapping that is honored before load balancing algorithms are applied.

When persistence is enabled, BIG-IP may repeatedly select the same pool member even if others are available.

This directly alters load balancing behavior.

Why the other options are incorrect:

A . Adding a OneConnect profile

OneConnect optimizes server-side TCP connections but does not change which pool member is selected.

B . Enabling SNAT automap

SNAT affects source address translation, not pool member selection.

C . Enabling a fallback host in the HTTP profile

A fallback host is only used when no pool members are available.

Correct Resolution:

Adding a persistence profile alters load balancing behavior by maintaining client affinity to a specific pool member.

NEW QUESTION # 45

DNS queries from internal DNS servers fail when sent through a BIG-IP Virtual Server.

Which Virtual Server property should be changed?

- A. Protocol to UDP
- B. Source Address to subnet
- C. Protocol Profile (Client) to DNS_OPTIMIZED
- D. Type to Performance (HTTP)

Answer: A

Explanation:

Standard DNS queries use UDP. Configuring the Virtual Server for TCP causes DNS traffic to fail.

NEW QUESTION # 46

.....

The world is changing rapidly and the requirements to the employees are higher than ever before. If you want to find an ideal job and earn a high income you must boost good working abilities and profound major knowledge. Passing F5CAB3 certification can help you realize your dreams. If you buy our product, we will provide you with the best F5-CA study materials and it can help you obtain F5CAB3 certification. Our product is of high quality and our service is perfect.
