IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q74-Q79):

NEW QUESTION # 74
Which of the following would best improve an organization' s system of limiting data use?

- A. Confirming implied consent for any secondary use of data.
- B. Applying audit trails to resources to monitor company personnel.
- C. Instituting a system of user authentication for company personnel.
- D. Implementing digital rights management technology.

Answer: B

NEW QUESTION # 75
What term describes two re-identifiable data sets that both come from the same unidentified individual?

- A. Imprecise data.
- B. Pseudonymous data.
- C. Aggregated data.
- D. Anonymous data.

Answer: B

Explanation:
Pseudonymous data refers to datasets where identifiers have been replaced with pseudonyms, allowing the data to still be linked to the same individual without directly revealing their identity. This means that while the data cannot directly identify an individual without additional information, it is still possible to re-identify the individual if the pseudonym is linked back to the individual.
Reference:
IAPP Certification Textbooks: "Pseudonymization" is explained as a privacy-enhancing technique where direct identifiers are replaced with pseudonyms, allowing data to be re-identified only under specific conditions.

NEW QUESTION # 76
Which of the following is considered a records management best practice?

- A. Archiving expired data records and files.
- B. Storing decryption keys with their associated backup systems.
- C. Using classification to determine access rules and retention policy.
- D. Implementing consistent handling practices across all record types. ID.

Answer: C

NEW QUESTION # 77
In day to day interactions with technology, consumers are presented with privacy choices. Which of the following best represents the Privacy by Design (PbD) methodology of letting the user choose a non-zero-sum choice?

- A. Displaying the percentage of users that chose a particular option, thus enabling the user to choose the most preferred option.
- B. Using contexts, antecedent events, and other priming concepts to assist the user in making a better privacy choice.
- C. Using images, words, and contexts to elicit positive feelings that result in proactive behavior, thus eliminating negativity and biases.
- D. Providing plain-language design choices that elicit privacy-related responses, helping users avoid errors and minimize the negative consequences of errors when they do occur.

Answer: D

NEW QUESTION # 78
SCENARIO - Please use the following to answer the next question:
Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company s information security policy and industry standards. Kyle is also-new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle s schedule included participating in meetings and observing work in the IT and compliance departments.
Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization s wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.

Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company s privacy risk assessment, noting that the secondary use of personal information was considered a high risk.

By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval processes, and application-level obligations, and couldn t wait to recommend his friend Ren who would be nerfert for the job Teds implementation is most likely a response to what incident?

- A. Confidential information discussed during a strategic teleconference was intercepted by the organization stop competitor.
- B. Signatureless advanced malware was detected at multiple points on the organization s networks.
- C. Encryption keys were previously unavailable to the organization s cloud storage host.
- D. Cyber criminals accessed proprietary data by running automated authentication attacks on the organization s network.

Answer: C
