Exam Analytics-DA-201 Study Guide, Analytics-DA-201 Hot Questions

When purchasing the Analytics-DA-201 learning materials, one of the major questions you may concerns may be the quality of the Analytics-DA-201 exam dumps. Our Analytics-DA-201 learning materials will provide you with the high quality of the Analytics-DA-201 exam dumps with the most professional specialists to edit Analytics-DA-201 Learning Materials, and the quality can be guaranteed. Besides, we also provide the free update for one year, namely you can get the latest version freely for 365 days.

Salesforce Certified Tableau Data Analyst Sample Questions (Q99-Q104):

NEW QUESTION # 99

You want to add a comment to March 2020 as shown in the following visualization.

You have the following sets in a Tableau workbook

- * Top N Customers
- * Customers of 2020
- * Top N Products
- * Sellers of 2020

Which two sets can you combine? Choose two

- A. Top N Customers
- B. Customers of 2020
- C. Sellers of 2020
- D. Top N Products

Answer: A,B

Explanation:

To combine two sets, they must have at least one dimension in common. In this case, Customers of 2020 and Top N Customers both have Customer Name as a dimension, so they can be combined using set operations such as union, intersection, or difference. Sellers of 2020 and Top N Products have different dimensions (Seller Name and Product Name), so they cannot be combined.

References: <https://help.tableau.com/current>

</pro/desktop/en-us/sets.htm> https://help.tableau.com/current/pro/desktop/en-us/sets_create.htm#combine-sets In Tableau, sets can be combined if they are created from the same dimension. From the options provided,

"Customers of 2020" and "Top N Customers" are likely created from the same dimension (Customers).

Therefore, these two sets can be combined to create a new set that includes or excludes members based on the combined criteria. Combining sets like "Top N Products" with "Customers of 2020" would not be feasible unless they are from the same dimension, which is typically not the case.

NEW QUESTION # 100

You have a data source that contains 20 tables.

You want the tables to be organized within the Data pane based on the type of data contained within the tables.

What should you use?

- A. Groups
- B. Sets
- **C. Folders**
- D. Hierarchies

Answer: C

Explanation:

To organize the tables in the Data pane based on the type of data contained within the tables, you should use folders. Folders are a way to manually group fields, parameters, sets, or tables in the Data pane according to your preference. You can create folders by right-clicking on the fields or tables you want to group and selecting Folders > Create Folder. You can also drag and drop fields or tables into existing folders. You can name the folders according to the type of data they contain, such as sales, customer, product, etc. Folders can help you find and access the fields or tables you need more easily and efficiently. NEW QUESTION # 101

You have the following visualization.

You Create a table calculation named Rank_Score that has a formula of RANK(AVG([Score])), and you drag Rank_Score to Text on the Marks cards.

What is the Rank Score value for Student ID 4220?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

To determine the Rank Score value for Student ID 4220, we look at the visualization provided and apply the table calculation of RANK(AVG([Score])). This function will rank the average scores in ascending order by default, with the lowest score receiving the rank of 1.

Based on the provided visualization, the scores for the students are as follows (from lowest to highest average score):

* Student ID 4183: 39 (Rank 1)

* Student ID 4220: 71 (Rank 6)

* Student ID 4247: 71 (Rank 6, same score as ID 4220 so they share the same rank)

* Student ID 4124: 75.5

* Student ID 4050: 64

* Student ID 4205: 67

* Student ID 4056: 66

Since Student ID 4220 has an average score of 71, which is the third-highest score, it shares the rank with Student ID 4247.

However, since Tableau ranks without gaps, the actual rank assigned is 6, considering that there are two students with a rank of 4 (due to the same average score being the second lowest), making the next rank number 6.

Note: The actual ranks for the highest scores are not provided, but they are not needed to determine the rank for Student ID 4220.

NEW QUESTION # 102

A Data Analyst has the following dashboard.

Currently, the map is used as a filter that affects the data on the other sheets of the dashboard. The analyst needs to configure the dashboard to ensure that selecting a data point on the map only filters the Detail table. What should the analyst do?

- A. Deselect Use as Filter from drop-down menu of Profits by State
- **B. Select Ignore Actions from the drop-down menu of Sales over time.**
- C. Select Deselect from the drop-down menu of Sales over time.
- D. Select Remove Dashboard Item from the drop-down menu of Sales over time.

Answer: B

NEW QUESTION # 103

You have the following chart that shows the cumulative of sales from various dates. You want the months to appear as shown in the following chart. What should you do?

- A. Convert the date to Attribute
- **B. Convert the date to Exact Date**
- C. Select Show Missing Values for the date
- D. Convert the date to Continuous

Answer: B

Explanation:

References: <https://help.tableau.com/current/pro/desktop/en-us/dates.htm> https://help.tableau.com/current/pro/desktop/en-us/dates_continuous.htm <https://help.tableau.com/current/pro/desktop/en-us/formatting.htm> To ensure the dates are shown in a continuous axis, you should convert the date to a continuous field. This will display the months in a sequence without any breaks, which is needed for showing a trend over time like the cumulative sum of sales.

NEW QUESTION # 104

.....

If you want to be a leader in some industry, you have to continuously expand your knowledge resource. Our Pass4cram always updates the exam dumps and the content of our exam software in order to ensure the Analytics-DA-201 exam software that you have are the latest and comprehensive version. No matter which process you are preparing for Analytics-DA-201 Exam, our exam software will be your best helper. As the collection and analysis of our Analytics-DA-201 exam materials are finished by our experienced and capable IT elite.
