Study 1z0-071 Tool & Certification Success Guaranteed, Easy Way of Training & 1z0-071 Test Questions Fee

As a prestigious platform offering practice material for all the IT candidates, Exams-boost experts try their best to research the best valid and useful 1z0-071 exam dumps to ensure you 100% pass. The contents of 1z0-071 exam training material cover all the important points in the 1z0-071 Actual Test, which can ensure the high hit rate. You can instantly download the 1z0-071 practice dumps and concentrate on your study immediately.

Target Audience

The Oracle 1z0-071 Exam is designed for those professionals who have some level of experience in operating with Oracle SQL and PL/SQL technologies and want to improve their expertise to perform the job roles of a Database Administrator or a Developer.

Oracle Database SQL Sample Questions (Q51-Q56):

NEW QUESTION # 51
Which two statements are true regarding constraints? (Choose two.)

- A. A foreign key cannot contain NULL values.
- B. A constraint is enforced only for an INSERT operation on a table.
- C. You can have more than one column in a table as part of a primary key.

- D. A column with the UNIQUE constraint can store NULLS.

Answer: C,D

NEW QUESTION # 52

Examine this description of the EMP table:

You execute this query:
SELECT deptno AS "departments", SUM (sal) AS "salary"
FROM emp
GROUP | BY 1
HAVING SUM (sal)> 3 000;
What is the result?

- A. only departments where the total salary is greater than 3000, returned in no particular order
- B. only departments where the total salary is greater than 3000, ordered by department
- C. all departments and a sum of the salaries of employees with a salary greater than 3000
- D. an error

Answer: D

NEW QUESTION # 53

MANAGER is an existing role with no privileges or roles.
EMP is an existing role containing the CREATE TABLE privilege.
EMPLOYEES is an existing table in the HR schema.
Which two commands execute successfully?

- A. GRANT CREATE SEQUENCE TO manager, emp;
- B. GRANT SELECT, INSERT ON hr.employees TO manager WITH GRANT OPTION:
- C. GRANT CREATE TABLE, emp TO manager;
- D. GRANT CREATE ANY SESSION, CREATE ANY TABLE TO manager;
- E. GRANT CREATE TABLE, SELECT ON hr. employees TO manager;

Answer: A,D

Explanation:
In Oracle SQL, roles can be granted privileges and other roles, and these privileges can then be passed on to users.
* Statement A is correct: GRANT CREATE SEQUENCE TO manager, emp; successfully grants the CREATE SEQUENCE
privilege to both the manager and emp roles.
* Statement E is correct: GRANT CREATE ANY SESSION, CREATE ANY TABLE TO manager; successfully grants two
system privileges to the manager role.
* Statements B, C, and D are incorrect for the following reasons:
* B is incorrect because the correct syntax to grant object privileges includes separating privileges with commas, not spaces, and the
object name should be in singular form (hr.employees).
* C is incorrect because you cannot grant a role and a privilege in the same statement.
* D is incorrect because the correct syntax for granting object privileges does not include the privilege CREATE TABLE before
specifying the object (hr.employees).

NEW QUESTION # 54

In your session, the NLS._DAE_FORMAT is DD- MM- YYYY.There are 86400 seconds in a day.Examine this result:
DATE
02-JAN-2020

Which statement returns this?

- A. SELECT TO_ CHAR(TO_ DATE('29-10-2019') + INTERVAL '3' MONTH + INTERVAL '7' DAY - INTERVAL '360' SECOND, ' DD-MON-YYYY') AS "date" FROM DUAL;
- B. SELECT To CHAR(TO _DATE('29-10-2019') + INTERVAL '2' NONTH + INTERVAL '5' DAY INEERVAL '120' SECOND, ' DD-MON-YYY) AS "date" FROM DUAL;
- C. SELECT TO_ CHAR(TO_ DATE('29-10-2019') +INTERVAL '2'; MONTH + INTERVAL '5'; DAY
  -
  INTERVAL '86410' SECOND, ' DD-MON-YYYY') AS "date"
  FROM DUAL;
- D. SELECT-TO_CHAR(TO _DATE('29-10-2019'+ INTERVAL '2' MONTH+INTERVAL '6' DAYINTERVAL '120' SECOND, 'DD-MON-YY') AS "daTe"
  FROM DUAL;
- E. SELECT-TO_CHAR(TO _DATE('29-10-2019'+ INTERVAL '2' MONTH+INTERVAL '4' DAYINTERVAL '120' SECOND, 'DD-MON-YY') AS "daTe"
  FROM DUAL;

Answer: A

Explanation:
To calculate the date from a given base date with intervals, Oracle allows you to add or subtract intervals from dates. Since the NLS_DATE_FORMAT is set to DD-MM-YYYY, the output is expected to be in that format.
Option B seems to calculate a date that is 3 months and 7 days ahead of October 29, 2019, and then subtracts 360 seconds (which is 6 minutes), resulting in a time that is still within the same day.
Here's how the calculation in option B would work out:
* Start date: 29-10-2019
* Add 3 months: 29-01-2020
* Add 7 days: 05-02-2020
* Subtract 360 seconds: Since it's only a few minutes, the date remains 05-02-2020.
However, this does not match the provided result of 02-JAN-2020. We would need to consider the exact amount of time being subtracted or added to find the correct answer.
But upon reviewing the options, they all have various syntax errors such as a missing TO_CHAR function, incorrect quotes, and date formats not matching the session's NLS_DATE_FORMAT. Therefore, we would need to correct these issues to find the right answer.

NEW QUESTION # 55
Examine this statement which returns the name of each employee and their manager:

```
SELECT e.last_name AS emp, m.last_name AS mgr
  FROM employees e
  JOIN managers m
    ON e.manager_id = m.employee_id
  ORDER BY emp;
```

You want to extend the query to include employees with no manager. What must you add before JOIN to do this?

- A. FULL OUTER
- B. RIGHT OUTER
- C. LEFT OUTER
- D. CROSS

Answer: D

NEW QUESTION # 56
