질문 # 12

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business catalogs listed below to the business role and save:

HCM - Employee Self-Service (SAP_HCM_BC_EMP_PC)

Concur - Employee Self-Service (SAP_CON_BC_CTE_ESS_PC)

정답:

설명:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the required business catalogs to the custom all-employee business role created in the previous task. These catalogs provide the applications that will later be shown in the launchpad space and page for all employees.

The catalogs that must be assigned are:

HCM - Employee Self Service

SAP_HCM_BC_EMP_PC

Concur - Employee Self-Service

SAP_CON_BC_CTE_ESS_PC

Business Scenario Explanation

In the previous task, you created a new custom all-employee business role, for example:

Z_EMPLOYEES_ALL_#####

That role exists, but on its own it does not yet provide app access.

In SAP S/4HANA Cloud, app access is granted through business catalogs.

This means the role must now be connected to the catalogs that contain the apps employees need.

Later, these catalogs will feed the launchpad page content so end users can easily find the relevant applications.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact catalog names and IDs.

Assign both required catalogs.

Save the role after assignment.

Do not assign the wrong catalog variant.

Required Catalogs

Assign exactly these two business catalogs:

Business Catalog

Business Catalog ID

HCM - Employee Self Service

SAP_HCM_BC_EMP_PC

Concur - Employee Self-Service

SAP_CON_BC_CTE_ESS_PC

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to maintain business roles, assign catalogs, assign launchpad spaces, and maintain restrictions.

Step 2: Search for your custom all-employee business role

Inside Maintain Business Roles:

Search for your business role ID:

Z_EMPLOYEES_ALL_#####

Example

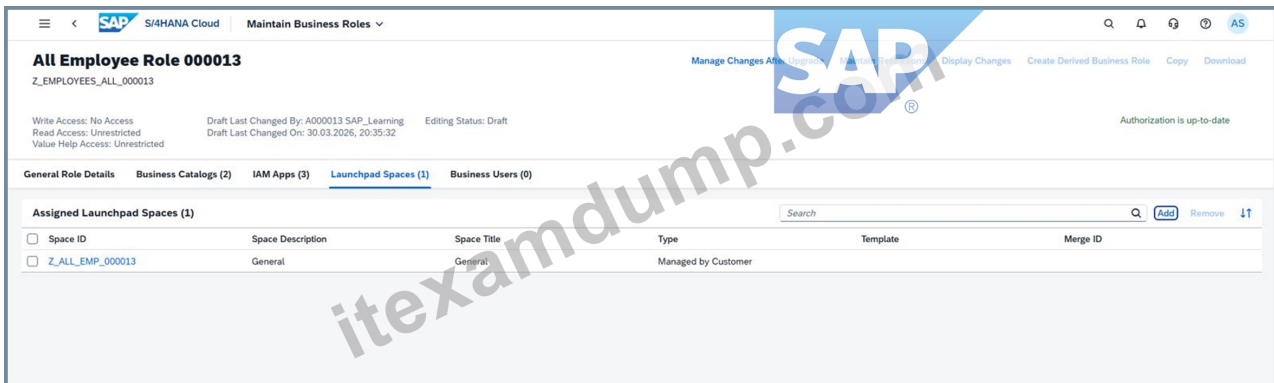

If your suffix is 000013, search for:

Z_EMPLOYEES_ALL_000013

Open the role.

Explanation:

You must open the custom all-employee role created in the previous task, not a template role and not a standard SAP role.

Step 3: Verify the correct role is open

Confirm that the role details show:

Business Role ID = Z_EMPLOYEES_ALL_#####

Business Role Description = All Employee Role #####

Explanation:

This ensures you are assigning catalogs to the correct business role.

Step 4: Go to the "Business Catalogs" tab

Inside the role:

Click the tab:

Business Catalogs

Explanation:

This tab is used to assign the business catalogs that define which apps and app authorizations the role provides.

Step 5: Click Add

In the Assigned Business Catalogs section:

Click Add

This opens the dialog:

Add Business Catalogs

Explanation:

The Add popup is used to search for and assign SAP-delivered business catalogs to the custom role.

Step 6: Search for the first catalog

In the Add Business Catalogs popup:

Search for:

SAP_HCM_BC_EMP_PC

or

HCM - Employee Self Service

Select:

HCM - Employee Self Service

Business Catalog ID: SAP_HCM_BC_EMP_PC

Explanation:

This catalog provides employee self-service apps and is required by the task.

Step 7: Search for the second catalog

Still in the Add Business Catalogs popup:

Search for:

SAP_CON_BC_CTE_ESS_PC

or

Concur - Employee Self-Service

Select:

Concur - Employee Self-Service

Business Catalog ID: SAP_CON_BC_CTE_ESS_PC

Explanation:

This catalog provides the Concur employee self-service content and is also explicitly required by the task.

Step 8: Add the selected catalogs

After selecting both catalogs:

Click OK or Apply

Explanation:

This adds the selected catalogs to the custom role in draft mode.

Step 9: Verify both catalogs are listed

Back in the Business Role screen, verify that both assigned catalogs are visible:

SAP_HCM_BC_EMP_PC

SAP_CON_BC_CTE_ESS_PC

Explanation:

This confirms that the required app authorizations have now been attached to the role.

Step 10: Save the role

Click:

Save

Explanation:

This finalizes the catalog assignment.

Without saving, the catalogs remain only in draft and the role will not provide the required app content.

Step 11: Verify the result after save

After saving, check again that the role still shows both business catalogs in the assigned list.

Explanation:

This confirms the task was completed successfully and the role is ready for the next step, which is launchpad space/page content.

Expected Result

After this task is completed successfully:

the custom all-employee role has both required business catalogs assigned, the role is saved successfully, the role now provides the app authorizations required for employee self-service content, the launchpad page can later use these catalogs to add the required tiles.

질문 # 13

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Assign the Configuration Expert - Data Migration (BR_CONFIG_EXPERT_DATA_MIG) business role to your user and save.

정답 :

설명:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the Configuration Expert - Data Migration business role to your own user so that you can use the migration cockpit and perform the bank data migration scenario using staging tables.

The required business role is:

Business Role ID: BR_CONFIG_EXPERT_DATA_MIG

Business Role Description: Configuration Expert - Data Migration

Business Scenario Explanation

In this scenario, you are responsible for migrating bank data into SAP S/4HANA Cloud Public Edition.

Because only a few banks need to be loaded, the chosen migration method is:

Migrate Data Using Staging Tables

Before you can use migration apps such as Migrate Your Data, your user must have the correct migration authorization.

That is why this task requires assigning the business role:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Without this role, you may not be able to:

create migration projects,
open migration objects,
upload staging-table files,
validate and transfer data,
execute mapping tasks,
or run the migration itself.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration tasks.

Use the exact role ID required by the task:

BR_CONFIG_EXPERT_DATA_MIG

Save the user after role assignment.

Make sure the user is not left only in draft status.

Required Role

Field

Value

Business Role ID

BR_CONFIG_EXPERT_DATA_MIG

Business Role Description

Configuration Expert - Data Migration

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to business users.

Since the task asks to assign a role to your own user, this is the correct starting point.

Step 2: Search for your own user

Inside Maintain Business Users:

In the search/filter area, enter your own user ID.

Click Go.

Explanation:

You must assign the migration role to your own user because you are the one who will execute the migration tasks.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the business user details page.

Explanation:

This opens the screen where assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Edit mode is necessary before the Assigned Business Roles list can be changed.

Step 5: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is the section where the new business role will be assigned.

Step 6: Click Add

In the Assigned Business Roles area:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign standard SAP business roles.

Step 7: Search for the migration role

In the Add Business Roles popup:

In the role search field, enter:

BR_CONFIG_EXPERT_DATA_MIG

Click Go

Select:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This is the exact role required for the bank migration scenario.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the migration role to your user in draft mode.

Step 9: Save the user

Back on the business user page:

Click Save

Explanation:

This finalizes the assignment.

Without saving, the role will not be available for use in the migration tasks.

Step 10: Verify the role assignment

After saving, confirm that your assigned roles list includes:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This verifies that your user is now authorized to work with migration projects and staging-table migration.

Expected Result

After this task is completed successfully:

your user has the role BR_CONFIG_EXPERT_DATA_MIG,

the role assignment is saved,

your user can proceed with the bank migration project tasks,

migration-related apps are available to your user.

질문 # 14

SIMULATION

Note: In this practical certification exam, you will only be given high-level instructions. The step descriptions are complete and tested to work. They are not detailed, as this is a test of your knowledge of navigating the system on your own.

Caution: Please make sure you are always using your assigned group number. The last 6 digits are denoted as ##### in the following tasks. Your results will not be recorded if you are not using your own group number. To find your group number: Select your user in the top right corner. You will see your user name with a series of numbers. Use the last 6 digits as your group number

Caution: To keep the system running smoothly and avoid unnecessary costs, please follow the assigned exercises carefully when using the SAP Landscape. Avoid going beyond the exercise scope and only use your group number to help maintain a stable and efficient environment for everyone.

정답:

설명:

See Explanation below for all solution

Explanation:

Purpose: Identify your own six-digit suffix and use it consistently in every task.

Open the user menu at the top-right of SAP S/4HANA Cloud.

Read your user name and note the last six digits.

Use those last six digits in every place the task PDF shows #####.

Example used in this guide: 000013

질문 # 15

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the Launchpad Space to your custom business role. Edit the Launchpad Page to add the applications listed below as tiles (standard "preferred" square tile) with the Section Title: Self-Services.

Manage My Timesheet

Concur Travel Expense

정답 :

설명:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to complete the launchpad setup for the custom all-employee role by:

assigning the custom Launchpad Space to the business role,

editing the Launchpad Page,

creating a section titled Self-Services,

adding the required applications as standard preferred square tiles:

Manage My Timesheet

Concur Travel Expense

Business Scenario Explanation

In the earlier tasks, you created:

a custom all-employee business role,

the required business catalog assignments,

a custom launchpad space and page.

This task completes that setup by adding the actual application tiles that end users will see on the launchpad.

The goal is to make it easy for employees to find the relevant self-service applications without searching manually.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values listed in the task.

The section title must be exactly:

Self-Services

The two tiles must be:

Manage My Timesheet

Concur Travel Expense

Save after editing the page.

Prerequisites

Before doing this task, the following should already exist:

custom business role:

Z_EMPLOYEES_ALL_#####

assigned business catalogs:

SAP_HCM_BC_EMP_PC

SAP_CON_BC_CTE_ESS_PC

custom launchpad space and page created for the role

page title and description:

General

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This is the app where the custom all-employee role is maintained. The launchpad space assignment and page navigation are controlled from here.

Step 2: Open the custom all-employee business role

In Maintain Business Roles:

Search for your custom business role:

Z_EMPLOYEES_ALL_#####

Open the role.

Example

If your suffix is 000013, the role is:

Z_EMPLOYEES_ALL_000013

Explanation:

You must work in the custom all-employee role because the launchpad space and page belong to this role.

Step 3: Open the Launchpad Spaces tab

Inside the role:

Click:

Launchpad Spaces

Explanation:

This tab shows which launchpad space is assigned to the role.

Step 4: Verify the Launchpad Space is assigned

Check that the assigned space exists.

In your execution, the assigned space followed this pattern:

Z_ALL_EMP_#####

Explanation:

The task says to assign the launchpad space to the custom business role.

If the space already appears in the assigned list, then this part is already complete.

If the space is not listed:

Click Add

Create or assign the required custom space

Save the role

Step 5: Open the assigned Launchpad Space

In the assigned launchpad spaces list:

Click the arrow > at the far right of the space row.

Explanation:

This opens Space Details, where the page linked to the space can be accessed.

Step 6: Open the Pages tab

In Space Details:

Click:

Pages

Explanation:

A space can contain one or more pages.

This task requires you to edit the page content.

Step 7: Open the Launchpad Page

In the Pages list:

Open the page row by clicking the arrow > at the far right.

In your run, the page followed this pattern:

Z_ALL_EMP_#####

Explanation:

This opens Page Details, where the page content can be edited.

Step 8: Open Page Content

Inside Page Details:

Click the tab:

Page Content

Explanation:

This is the area where sections and application tiles are maintained.

Step 9: Click Edit

On the Page Content screen:

Click Edit

Explanation:

The page must be in edit mode before you can create sections or add app tiles.

Step 10: Enter the section title

In the section title field, enter exactly:

Self-Services

Explanation:

This creates the section in which the required employee self-service app tiles will be placed.

The title must match the task exactly.

Step 11: Add the tile "Concur Travel Expense"

On the right side of the page content screen, in the list of apps derived from the assigned catalogs:

Find:

Concur Travel Expense

Click:

Add

Explanation:

This adds the Concur employee self-service app tile into the Self-Services section.

Step 12: Add the tile "Manage My Timesheet"

Still on the right side app list:

Find:

Manage My Timesheet

Click:

Add

Explanation:

This adds the timesheet app tile into the same Self-Services section.

Step 13: Verify both tiles are visible in the section

After adding both apps, confirm that the page content now shows:

Concur Travel Expense

Manage My Timesheet

under the section:

Self-Services

Explanation:

This confirms the tiles were placed correctly on the page.

Step 14: Save the page

Click:

Save

Explanation:

This finalizes the page changes.

If you do not save, the tiles and section will not be retained.

Step 15: Verify the role is assigned to your business user

To verify the page and tiles from the home screen, make sure the custom all-employee role is assigned to your own business user.

Open:

Maintain Business Users

Then:

Open your own user

Open Assigned Business Roles

Confirm the role is assigned:

Z_EMPLOYEES_ALL_#####

Save if needed

Explanation:

Without role assignment, the launchpad space and page may not appear on the homepage for your user.

Step 16: Refresh the homepage

Go back to Home.

Then:

Refresh the browser or reload the session

Open the page/tab:

General

Explanation:

This ensures the launchpad updates and shows the newly added content.

Step 17: Verify the result on the homepage

On the General page, verify that you can see:

section title:

Self-Services

tile:

Concur Travel Expense

tile:

Manage My Timesheet

Explanation:

This is the final proof that the task was completed successfully.

Expected Result

After this task is completed successfully:

the custom launchpad space is assigned to the business role,

the page contains a section named Self-Services,

the page shows the tiles:

Concur Travel Expense

Manage My Timesheet

the tiles are visible on the launchpad homepage under the General page.

질문 # 16

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a new migration project with the information listed below.

Parameter	Data
Name	Bank Data #####
Migration object	Bank

정답 :

설명:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a new migration project for the bank data migration scenario in SAP S/4HANA Cloud Public Edition.

The migration method for this scenario is:

Migrate Data Using Staging Tables

The migration project must be created with the exact values provided in the task.

Business Scenario Explanation

In this scenario, you are responsible for migrating bank master data into SAP S/4HANA Cloud Public Edition.

Because only a few banks need to be loaded, the selected migration approach is:

Migrate Data Using Staging Tables

Before any files can be uploaded or any bank data can be validated and migrated, a migration project must first be created. This project acts as the main container for:

the migration object,

the staging-table upload,

validation,

mapping,

transfer to staging tables,

and the final migration execution.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

The migration project must be created using:

Migrate Data Using Staging Tables

The migration object must be:

Bank

Save or create the project only after confirming the values are correct.

Required Values

Use the following values exactly as shown in the task image.

Parameter

Data

Name

Bank Data #####

Migration object

Bank

Example

If your suffix is 000013, then the values become:

Name = Bank Data 000013

Migration object = Bank

Detailed Step-by-Step Procedure

Step 1: Open the app "Migrate Your Data"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Migrate Your Data

or

Migration Projects

Open the app.

Explanation:

This app is the migration cockpit used to create migration projects and load master data and transactional data into the system.

Because the task asks you to create a new migration project, this is the correct starting point.

Step 2: Start creating a new migration project

Inside the migration app:

Click:

Create

When the dropdown appears, select:

Migrate Data Using Staging Tables

Explanation:

This is very important because the business scenario explicitly says that the chosen migration method is Migrate Data Using Staging Tables.

Do not choose:

Migrate Data Directly from SAP System

That would be the wrong migration approach for this task.

Step 3: Enter the migration project name

In the project creation screen, enter:

Name = Bank Data #####

Example

If your suffix is 000013, enter:

Bank Data 000013

Explanation:

This is the name of the migration project and must exactly match the task requirement.

Step 4: Keep the staging-table migration approach

On the project creation screen, confirm the migration approach is:

Migrate Data Using Staging Tables

Explanation:

This ensures the migration project is created with the correct loading approach for later CSV/staging-table processing.

Step 5: Keep the local database connection

When the system asks for database connection, leave the default:

Local SAP S/4HANA Database Schema

Explanation:

In your execution, the local schema was used for the migration project.

This is the expected option for the training scenario.

Step 6: Continue to Migration Objects

Click:

Step 2

or continue to the second step of project creation.

Explanation:

This moves from the general project header information to the migration object selection.

Step 7: Search for the migration object

In the Migration Objects section:

Search for:

Bank

Explanation:

The task explicitly requires the migration object:

Bank

So only that object should be selected.

Step 8: Select the migration object "Bank"

When the object appears:

Select:

Bank

Make sure it appears in the Selected Migration Objects area.

Explanation:

This step links the project specifically to the Bank migration object.

Without selecting the migration object, the migration project would be incomplete.

Step 9: Create the migration project

After confirming:

project name,

migration approach,

database connection,

migration object = Bank,

click:

Create

or the final confirmation button provided by the system

Explanation:

This finalizes the creation of the migration project.

Step 10: Verify the created migration project

After creation, verify that the new project shows:

Project Name = Bank Data #####

Migration Object = Bank

Explanation:

This confirms that the project has been created successfully and is ready for template download, CSV preparation, validation, staging-table transfer, and migration execution.

Expected Result

After this task is completed successfully:

a new migration project exists,

the project name matches the required naming pattern,

the migration approach is staging tables,

the migration object is Bank,

the project is ready for the next migration steps.
