The employee master file does NOT include:

- A. hire date.
- B. **workweek.**
- C. vacation accrual.
- D. withholding information.

정답: B

설명:

Comprehensive and Detailed in-Depth Explanation:

The employee master file is a comprehensive record containing essential information about each employee. It typically includes personal details (e.g., name, address, Social Security number), employment information (e.g., hire date, job title), compensation details, benefits information (e.g., vacation accruals), and tax withholding information. The term "workweek" refers to the standard period used by the employer to calculate wages and overtime, which is a company-wide setting rather than specific to individual employees.

Therefore, the correct answer is B. workweek.
