One of the key factors for passing the exam is practice. Candidates must use Cisco 350-701 practice test material to be able to perform at their best on the real exam. This is why Test4Engine has developed three formats to assist candidates in their Cisco 350-701 Preparation. These formats include desktop-based Cisco 350-701 practice test software, web-based practice test, and a PDF format.

Certification Overview: Cisco CCNP Security

The Cisco CCNP Security designation is a unique training path geared towards the Cisco security engineering job role. By and large, this certificate confirms your ability to secure routers, switches, appliances, and networking devices. It also proves that a learner can choose, deploy, support, and troubleshoot firewalls, IDS/IPS solutions, and VPNs for functional networking environments. However, the above-mentioned 350-701 Exam is just the first part of the CCNP Security certificate. Also, you must validate your skills using one concentration exam, among which you will find 300-710, 300-715, 300-720, 300-725, 300-730, and 300-735 tests.

Traffic is not passing through IPsec site-to-site VPN on the Firepower Threat Defense appliance. What is causing this issue?

- A. No split-tunnel policy is defined on the Firepower Threat Defense appliance.
- B. Site-to-site VPN preshared keys are mismatched.
- C. Site-to-site VPN peers are using different encryption algorithms.
- D. The access control policy is not allowing VPN traffic in.

Answer: A

Explanation:

If sysopt permit-vpn is not enabled then an access control policy must be created to allow the VPN traffic through the FTD device.

If sysopt permit-vpn is enabled skip creating an access control policy. Reference:
