100% Pass 2026 Oracle Newest 1z0-1057-25: Oracle Project Management Cloud 2025 Implementation Professional Test Dumps.zip

2026 Latest PremiumVCEDump 1z0-1057-25 PDF Dumps and 1z0-1057-25 Exam Engine Free Share: https://drive.google.com/open?id=1HCPEr4sYsJ8QbDMucW8zVS6T-gxQdrsP

We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent 1z0-1057-25 exam questions. In this era of cut throat competition, we are successful than other competitors. What is more, we offer customer services 24/7. Even if you fail the exams, the customer will be reimbursed for any loss or damage after buying our 1z0-1057-25 Guide dump. One decision will automatically lead to another decision, we believe our 1z0-1057-25 guide dump will make you fall in love with our products and become regular buyers.

As long as you enter the learning interface of our soft test engine of 1z0-1057-25 quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our 1z0-1057-25 Test Prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the 1z0-1057-25 exam torrent, and you can flexibly and freely choose these two modes according to your habit.

Valid 1z0-1057-25 Test Dumps.zip & Leader in Qualification Exams & Fantastic Oracle Oracle Project Management Cloud 2025 Implementation Professional

Do you need to find a high paying job for yourself? Well, by passing the Oracle Project Management Cloud 2025 Implementation Professional, you will be able to get your dream job. Make sure that you are buying our bundle 1z0-1057-25 brain dumps pack so you can check out all the products that will help you come up with a better solution. You can easily land a dream job by passing the 1z0-1057-25 Exam in the first attempt.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41
Which application would you use to map application roles to external roles? (Choose the best answer.)

- A. BPM Work List

- B. Security Console
- C. Oracle Identify Manager
- D. Authorization Policy Manager

Answer: D

Explanation:
Ref: https://docs.oracle.com/cd/E17904_01/doc.1111/e14431/managing.htm#APMAG3333 Fusion Middleware Administrator's Guide for Authorization Policy Manager Managing Security Artifacts This chapter describes the procedures an administrator follows to manage application-specific security artifacts, view the external role hierarchy, manage the application role hierarchy, and manage the many-to- many mapping of application roles to external roles from both the application and the external role point of view.
This chapter is divided into the following sections:
* Managing Application Security Artifacts
* Viewing the External Role Hierarchy
* Managing the Application Role Hierarchy
* Mapping Application Roles to an External Role
* Mapping External Roles to an Application Role
Role Mapping Policy
* A Role Mapping Policy is used to determine what external subjects (users, groups or External Roles) are assigned to the applicable Application Role. The Application Role, when referenced in an Authorization Policy, defines the principals affected by the Authorization Policy. Role Mapping Policies may also include conditions Oracle Identity Manager - Not used for mapping application roles to external roles How do Users Interact with Oracle Identity Manager?
Oracle Identity Manager provides an end-user interface, called the Identity Self Service console, and a system administrator interface, called the Identity System Administration console. Both end-users and system administrators use the web browser to log on to Oracle Identity Manager. Oracle Identity Manager (OIM)
* OIM provision users, roles, and defines what a user can do in Oracle Cloud
* Duty Roles are mapped to jobs and assigned access privileges (Data Security)

NEW QUESTION # 42
You have been asked to set up one active person, who is not a team member in the project, as a quality manager for each quality task created under projects. However, when you try to assign the quality manager as Task Manager, you cannot find the person's name in the list of values. What is the reason for this problem?
(Choose the best answer.)

- A. The quality manager belongs to a department that is not associated with the project.
- B. The "Require Task Managers to be Project Team Members" profile option is set to No.
- C. The "Require Task Managers to be Project Team Members" profile option is set to Yes.
- D. The quality manager is not assigned with a supervisor.

Answer: C

Explanation:
Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/introducing-oracle- project-portfolio-management-cloud-services.html#FAPFM428138 Topic - Project Foundation Profile Options Profile Option Name - Task Managers Must Be Project Team Members Description - Specify whether task managers must be project team members.
Values - No (Default) / Yes
Setup Task Name - Require Task Managers to be Project Team Members

NEW QUESTION # 43
You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works.
Which two are correct statements in this scenario? (Choose two.)

- A. A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.
- B. The association of a deliverable with a task is dependent on associating a requirement with a task.
- C. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.
- D. You associate a deliverable with a task independent of associating a requirement with a task.

Answer: C,D

Explanation:
According to Oracle sources1, the inheritance between requirements, tasks, and deliverables works as follows:
* You can associate a deliverable with a task independent of associating a requirement with a task. You can also associate a deliverable with a requirement independent of associating a task with a requirement
1.
* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. You must manually associate the deliverable with the tasks that produce it1.
Therefore, the correct answer is B and D.
1: Can deliverables for projects and tasks be inherited from associated requirements? - docs.oracle.com (index
1)
In Oracle Project Management, you can define requirements, tasks, and deliverables for your project based on your project methodology and lifecycle. Requirements are statements of needs or expectations that must be met by the project outcome. Tasks are units of work that must be performed to complete the project.
Deliverables are products or services that are produced or provided as part of a task or requirement. Two correct statements about how the inheritance between requirements, tasks, and deliverables works are:
* You associate a deliverable with a task independent of associating a requirement with a task. This means that you can create a deliverable for a task regardless of whether the task is linked to a requirement or not.
* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. This means that you have to manually associate a deliverable with a task even if both the deliverable and the task are linked to the same requirement.

NEW QUESTION # 44
While creating a new project template, you notice that a default Asset Cost Allocation method is being automatically associated. Identify the source setup from which the default value is being inherited. (Choose the best answer.)

- A. project type
- B. project unit
- C. project organization
- D. project classification

Answer: A

Explanation:
Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapjf/define-project.
html#OAPJF220111
Asset Cost Allocation Methods
The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.
You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.
Projects and project templates inherit a default asset cost allocation method from the associated project type.
You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level Asset Cost Allocation Methods The following table describes the available asset cost allocation methods.
Method
Basis of Cost Allocation
Actual Units
Number of units defined for each asset
Current Cost
Construction-in-process (CIP) cost of each asset
Estimated Cost
Estimated cost of each asset
Standard Unit Cost
Combination of the standard unit cost and the number of units defined for each asset Spread Evenly Equal allocation of cost to each asset

NEW QUESTION # 45

Your client uses Resource Breakdown Structures (RBS) and Resource Mapping to associate amounts to resources. After making some changes to the resources at project level, forecasts are regenerated. After reviewing the cost amounts associated with the resources, you suspect that the cost association does not match your client's expectations. Identify two valid rules based on which cost association works. (Choose two.)

- A. If a transaction maps to more than one level, Oracle PPM Cloud sums the precedence numbers for all resource type in the branch and gives precedence to the resource element in the branch with the highest sum.
- B. If one branch contains a user-defined resource type, precedence is given to the branch that contains a user-defined resource type.
- C. If the sum of precedence numbers is the same for more than one branch, precedence is given to the branch with the lowest number at the lowest level.
- D. If there is only one level in RBS to which the transaction maps, the cost amounts are mapped to that level.

Answer: C,D

Explanation:

Reference https://docs.oracle.com/cd/E37583_01/doc.1116/e22598/F458900AN13D82.htm How Resource Mapping Is Calculated You can track the cost impact of every resource that has been assigned to a project task and use the resource breakdown structure to view the breakdown of these costs. Oracle Fusion Projects associates the costs of the resources used for tasks with branches and levels in the resource breakdown structure. The process for determining the correct association is managed by rules of precedence.

Oracle Fusion Projects uses the following rules to associate cost amounts with resources:

* Select the lowest level in the resource breakdown structure to which a transaction can map.
* If there is only one level to which the transaction maps, the cost amounts are mapped to that level.
* If the transaction maps to more than one level, Oracle Fusion Projects sums the precedence numbers for all resource types in the branch and gives precedence to the resource element in the branch with the lowest sum.
* If more than one branch has the lowest precedence number at the lower level, the application uses the precedence number of the next level up.
* If the sum of precedence numbers is the same for more than one branch, precedence is given to the branch with the lowest number at the lowest level.
* If one branch contains a user-defined resource type, precedence is given to the branch that does not contain a user-defined resource type.

Note Oracle Fusion Projects gives more precedence to a lower precedence number. For example, a resource element with a precedence number of 1 is given precedence over a resource element with a precedence number of 10.

NEW QUESTION # 46

......

Crack the Oracle 1z0-1057-25 Exam with Flying Colors. The Oracle 1z0-1057-25 certification is a unique way to level up your knowledge and skills. With the Understanding Oracle Project Management Cloud 2025 Implementation Professional 1z0-1057-25 credential, you become eligible to get high-paying jobs in the constantly advancing tech sector. Success in the Oracle 1z0-1057-25 examination also boosts your skills to land promotions within your current organization. Are you looking for a simple and quick way to crack the Understanding 1z0-1057-25 examination? If you are, then rely on 1z0-1057-25 Dumps.
