Exam CASPO-001 Training & Dumps CASPO-001 Free Download

CASPO-001 Certified Agile Scrum Product Owner Practice Exam

1. Which of the following statements best reflects an Agile principle from the Agile Manifesto?
A) Following a rigid plan no matter what
B) Customer collaboration over contract negotiation
C) Comprehensive documentation over working software
D) Strict adherence to initial requirements
Answer: B
Explanation: The Agile Manifesto values customer collaboration over contract negotiation, emphasizing ongoing customer engagement and feedback.

2. What is the primary focus of Agile methodologies?
A) Maximizing documentation
B) Delivering value incrementally
C) Minimizing team interactions
D) Extending project timelines
Answer: B
Explanation: Agile methodologies focus on delivering value incrementally through iterative progress and continuous feedback.

3. Which of the following best describes Scrum within the Agile framework?
A) A sequential process for project management
B) A prescriptive methodology with fixed roles and events
C) An iterative framework that includes roles, events, and artifacts
D) A tool for creating Gantt charts
Answer: C
Explanation: Scrum is an iterative framework that defines specific roles, events, and artifacts to help teams work in short cycles.

4. What distinguishes Scrum from traditional project management approaches?
A) Fixed scope and predetermined deadlines
B) Emphasis on documentation over working software
C) Incremental delivery and adaptive planning
D) Centralized command and control
Answer: C
Explanation: Scrum emphasizes incremental delivery and adaptive planning, contrasting with the fixed scope and detailed upfront planning of traditional project management.

5. Which role is responsible for maximizing the value of the product in Scrum?
A) Scrum Master
B) Product Owner
C) Development Team
D) Project Manager
Answer: B
Explanation: The Product Owner is charged with maximizing the product's value by prioritizing work based on stakeholder and customer needs.

The CASPO certification is designed to help professionals who are responsible for managing product development and delivery to gain a deeper understanding of Agile Scrum principles, practices, and techniques.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q44-Q49):

NEW QUESTION # 44
In order to make investment decisions, the Product Owner is likely to look at the Total Cost of Ownership (TCO) of the product being built. What costs will a Product Owner take into account? (Choose the best answer)

- A. The accumulated cost over the earned value of the product
- B. The money spent on development of the product, often a fixed cost per Sprint multiplied by the Sprints required
- C. All investments required to conceive, develop, operate, and maintain the product

Answer: C

Explanation:
TCO encompasses all costs across a product's lifecycle, not just development. While the Scrum Guide doesn't define TCO, the Product Owner's value focus implies a broad view: "The Product Owner is accountable for maximizing the value of the product." Option B-conception, development, operation, and maintenance- reflects this holistic perspective.
* A:Development cost alone is too narrow.

NEW QUESTION # 45
What two things should be done if the Product Owner is unavailable? (Choose the best two answers)

- A. Within the Sprint, the Developers make the best decisions possible to assure progress toward the Sprint Goal, re-aligning with the Product Owner once he/she is available again.
- B. There should be a Product Owner team to allow a different person from that team to instantly take over the role of Product Owner.
- C. In a permanent state of unavailability, a new Product Owner needs to be appointed. Development efforts without a Product Owner are not employing Scrum.

Answer: A,C

Explanation:
The Product Owner is a singular, critical role in Scrum: "The Product Owner is one person, not a committee." Temporary or permanent unavailability requires specific actions:
* A:During a Sprint, the Developers' self-management allows them to proceed toward the Sprint Goal, adjusting with the Product Owner later, per: "The Developers are self-managing, meaning they internally decide who does what, when, and how."
* C:Permanent absence means Scrum isn't being followed without a Product Owner, necessitating a replacement: "For Product Owners to succeed, the entire organization must respect their decisions."

NEW QUESTION # 46
There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- A. Let the team decide
- B. 0
- C. 1
- D. It depends

Answer: B

Explanation:

A single product has one Product Owner, regardless of the number of teams. TheScrum Guidestates: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

* A:Multiple Product Owners fragment accountability.
* B:Correct-one Product Owner for one product.

NEW QUESTION # 47

Which does a self-organizing Scrum Team choose? (Choose the best answer)

- A. Product Backlog ordering
- B. Stakeholders for the Sprint Review
- C. When to release, based on its progress
- D. How to best accomplish its work
- E. Sprint length

Answer: D

Explanation:

Self-organization in Scrum means the Developers have autonomy over how they deliver the Sprint Goal. The Scrum Guidestates: "The Developers... are self-managing, meaning they internally decide who does what, when, and how." Option A aligns with this-choosing how to accomplish work is their domain. Option B is incorrect; the Product Owner orders the Product Backlog. Option C is wrong; the Product Owner invites stakeholders to the Sprint Review. Option D is partially true-Sprint length is set by the Scrum Team collaboratively, not just the Developers, and is typically fixed once established. Option E is false; release decisions are the Product Owner's responsibility. Thus, A is the best answer.

NEW QUESTION # 48

Who should know the most about the progress toward a business objective or a release? (Choose the best answer)

- A. The Project Manager
- B. The Scrum Master
- C. The Product Owner
- D. The Developers

Answer: C

Explanation:

TheScrum Guidestates: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team" and for "developing and explicitly communicating the Product Goal." This makes them the primary person responsible for tracking progress toward business objectives or releases, as they align the Product Backlog with stakeholder needs and strategic goals. Option B (Developers) focuses on Sprint-level execution, not overarching objectives. Option C (Scrum Master) ensures process adherence, not business progress. Option D (Project Manager) isn't a Scrum role. Thus, A is correct.
