### NEW QUESTION # 186

Cloud Kicks has recently rolled out a new Experience Cloud site for its customers. The site has been activated and the contacts have been enabled as customer users. However, none of the users received their login credentials in an email.

What caused this issue?

- A. The sender's email address was changed while it was pending verification.
- B. The roles were not enabled for the users.
- C. The sender's email address was changed and not verified.
- D. The welcome emails were not enabled for the site.

**Answer: C**

Explanation:

One possible cause of this issue is that the sender's email address was changed and not verified. The sender's email address is the email address that appears as the sender of the welcome emails to the customer users. If the sender's email address is changed, it needs to be verified by clicking on a link in a verification email. If the verification is not completed, the welcome emails will not be sent.

#### NEW QUESTION # 187

Universal Containers (UC) would like to create a site for its existing customers. The site will contain articles, manuals, and FAQs. The site will also contain access to UC's Contracts object specific to each customer and the ability for customers to update their billing information, requiring them to log in to the site to access any information.

Which template should UC select when building its site?

- A. Partner Central
- **B. Customer Account Portal**
- C. Customer Service
- D. Help Center

**Answer: B**

Explanation:

The Customer Account Portal template is designed for creating a site for existing customers who need to access their account information, such as contracts, billing, and support. The template includes features such as login, registration, profile management, case management, and commerce integration. The template also supports Knowledge articles, manuals, and FAQs.

#### NEW QUESTION # 188

Ursa Major Solar would like content from Salesforce CMS to be queried when users search for keywords in its customer portal. Which setting must be turned on in order for Global Search in Experience Builder to query content in Salesforce CMS?

- A. Community must be activated.
- B. Sharing Rules must be set to Read/Write.
- **C. Search must be enabled for the selected CMS Channel.**
- D. Gather Customer Insights Data must be selected.

**Answer: C**

Explanation:

This setting allows the CMS content to be searchable within the channel where it is published. To enable search for a channel, open the CMS Channels tab in Salesforce CMS, select Edit beside a channel, and click the Search toggle. Additionally, if the site is created with Experience Builder, the Global Search Box component must be configured to include the Content object4
