

# Free PEGACPRSA22V1 Exam Questions - First-grade Pegasystems PEGACPRSA22V1 Valid Exam Answers

## How to Get Ready for the Pegasystems PEGAPCDC87V1 Exam Quickly?

In today's challenging IT sector, earning the Pegasystems PEGAPCDC87V1 certification helps you accelerate your career. The Pega Certified Decisioning Consultant PEGAPCDC87V1 certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the PEGAPCDC87V1 certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Certified Pega Decisioning Consultant (PCDC) 87V1 PEGAPCDC87V1 exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest PEGAPCDC87V1 exam questions in three formats. With the help of these real [Pegasystems Dumps](#), you can get ready for the exam in a short time.

## Authentic (Valid) Details Regarding The Pegasystems PEGAPCDC87V1 Exam Questions

- VENDOR: (Pegasystems)
- EXAM CODE: (PEGAPCDC87V1)
- EXAM NAME: (Certified Pega Decisioning Consultant (PCDC) 87V1)
- Number OF Questions: (184)
- Certification Name: (Pega Certified Decisioning Consultant)
- Exam Language: (ENGLISH)
- Promo Code For Pegasystems PEGAPCDC87V1 Exam Questions: "SAVE25"

*Limited Time Huge Sale Offer On All Exams! 25% Extra OFF! Use Coupon Code: Save25*

You will identify both your strengths and shortcomings when you utilize Pegasystems PEGACPRSA22V1 practice exam software. You will also face your doubts and apprehensions related to the Pegasystems PEGACPRSA22V1 exam. Our Pegasystems PEGACPRSA22V1 practice test software is the most distinguished source for the Pegasystems PEGACPRSA22V1 Exam all over the world because it facilitates your practice in the practical form of the Pegasystems PEGACPRSA22V1 certification exam.

The PEGACPRSA22V1 Certification Exam is a challenging and comprehensive assessment that tests the candidate's skills and knowledge in areas such as Pega robotics architecture, configuration, design, and implementation. PEGACPRSA22V1 exam covers a wide range of topics, including Pega robotics development studio, Pega robotics runtime, Pega automation operations portal, and Pega robotics management console. Candidates are also expected to have a solid understanding of programming concepts, database design, and web services integration.

## HOT Free PEGACPRSA22V1 Exam Questions - High-quality Pegasystems PEGACPRSA22V1 Valid Exam Answers: Certified Pega Robotics System Architect 22

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to

the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test PEGACPRSA22V1 Certification can make them become that kind of people and if you are one of them buying our PEGACPRSA22V1 study materials will help you pass the PEGACPRSA22V1 test smoothly with few efforts needed.

Pegasystems PEGACPRSA22V1 (Certified Pega Robotics System Architect 22) Certification Exam is a globally recognized certification for professionals who specialize in the Pega Robotic Automation System. The Pega Robotic Automation System is a platform that allows businesses to automate their processes and workflows, making them more efficient and effective. Certified Pega Robotics System Architect 22 certification exam tests the candidate's ability to design, develop, and deploy Pega Robotics solutions using the latest tools and technologies.

## **Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q72-Q77):**

### **NEW QUESTION # 72**

In the Answer Area, drag each use case on the left to the correct Toolbox item.

**Answer:**

Explanation:

### **NEW QUESTION # 73**

Using the values from the data page definition, the value FETCH\_SCORE is configured for which robot activity property in Pega Robot Studio?

- A. (Name)
- B. FullName
- **C. ActivityName**
- D. UniqueID

**Answer: C**

Explanation:

In Pega Robot Studio, a Robot Activity serves as the link between a robotic automation (built in Pega Robot Studio) and the Pega Platform. This link allows a Pega case or data page to invoke robotic automations through the Robotic Desktop Automation (RDA) integration.

The Data Sources configuration in Pega Platform, as shown in the screenshot, defines the connection between a data page and a robotic automation. The field labeled "Robotic automation name" directly corresponds to the ActivityName property in the Robot Studio's activity definition.

From the Pega Robotics System Design and Implementation Guide, section "Configuring Robot Activities and Integrating with Pega Platform":

"Each robotic activity exposed to Pega Platform must have its ActivityName property defined in Robot Studio.

The ActivityName identifies the automation when it is invoked from Pega Platform through Robotic Desktop Automation (RDA) or Robotic Process Automation (RPA).

The name entered in the Pega Platform's data page configuration (for example, FETCH\_SCORE) must match exactly the ActivityName defined in the Robot Studio activity." Detailed Reasoning:

\* The screenshot shows a Data Page Source configuration where:

\* Source = Robotic desktop automation

\* Robotic automation name = FETCH\_SCORE

\* Timeout = 5 seconds

\* Request Data Transform = Request

\* Response Data Transform = RDAResponse

\* The Robotic automation name (FETCH\_SCORE) identifies which Robot Studio activity should execute when the Pega Platform requests the data.

\* In Robot Studio, this is mapped to the ActivityName property of the automation's activity component, ensuring a direct call mapping between Pega and Robot Studio.

Option Analysis:

\* A. ActivityName: Correct - this is the property used to link the automation in Pega Platform to the robotic activity in Robot Studio.

\* B. FullName: Incorrect - FullName refers to the namespace or project structure reference, not the callable identifier.

\* C. (Name): Incorrect - This refers to the internal object label, not the platform reference name.

\* D. UniqueID: Incorrect - This is an internal system identifier used by Robot Studio for distinguishing components, not for integration with Pega Platform

Therefore, the correct answer is A. ActivityName.

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Robot Activity Configuration and Pega Platform Integration (RDA/RPA) section (Pega Robotics 19.1 and later).

#### NEW QUESTION # 74

When evaluating business requirements and reviewing each application in a project, before you interrogate the application, what three actions do you perform during application discovery? (Choose Three)

- A. Identify the technology on which the application is built (web, Windows, text).
- B. Verify that the automation works as intended.
- C. Verify the number of application instances accessed by the user simultaneously.
- D. Verify the interactions between all applications in the project.
- E. Verify the match rules on all interrogated controls.
- F. Verify how the application opens outside of Pega Robot Studio.

**Answer: A,C,F**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

Application Discovery is the initial phase in Pega Robotics project development where developers analyze target applications before interrogation. The goal is to understand how each application behaves, what technology it uses, and how it interacts with other systems.

According to the Pega Robotics System Design and Implementation Guide, section "Application Discovery and Analysis Before Interrogation":

"Before interrogating applications, conduct application discovery to ensure that automations can be designed effectively.

During discovery, developers should:

- \* Determine the type and technology of each application (web, Windows, Java, or text-based).
- \* Verify how each application is launched and operates outside Robot Studio to ensure accessibility.
- \* Identify how many instances of each application the user accesses concurrently.
- \* Observe dependencies or interactions between applications for orchestration planning." Detailed Reasoning:
- \* A. Verify the number of application instances accessed by the user simultaneously.
- \* Correct. This ensures that the automation can handle multiple instances (e.g., several browser windows or desktop clients).
- \* C. Verify how the application opens outside of Pega Robot Studio.
- \* Correct. Understanding launch methods (desktop shortcuts, URLs, credentials) helps configure adapters correctly.
- \* E. Identify the technology on which the application is built (web, Windows, text).
- \* Correct. This determines which adapter type (Web, Windows, or Text adapter) to configure in the project.

Incorrect Options:

- \* B. Verify that the automation works as intended.
- \* Incorrect. This happens after interrogation during testing, not during discovery.
- \* D. Verify the interactions between all applications in the project.
- \* Partially correct but not part of the discovery phase-it's addressed in the design phase.
- \* F. Verify the match rules on all interrogated controls.
- \* Incorrect. This is performed after interrogation, not during discovery.

Final Correct answer: A, C, E

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Application Discovery and Adapter Configuration Planning section (Pega Robotics 19.1 and later).

#### NEW QUESTION # 75

The business requirements states that the login automation creates a Success or Failed response when attempting to log in to the finance application. If a failure occurs, the automation should pass a message code with the Message Manifest before exiting the automation.

Which image represents the exit logic?

- A. Exhibit D
- B. Exhibit B
- C. Exhibit A

- **D. Exhibit C**

**Answer: D**

### NEW QUESTION # 76

To modify an object's default properties before use in a project, which setting must be updated?

- **A. Naming Rules**
- B. Type Name
- C. Type Prefixes
- D. Prefix Types

**Answer: A**

### NEW QUESTION # 77
