Free PDF Quiz High Pass-Rate PCNSE - Pass Palo Alto Networks Certified Network Security Engineer Exam Exam

To let the clients have an understanding of their mastery degree of our PCNSE study materials and get a well preparation for the test, we provide the test practice software to the clients. The test practice software of PCNSE study materials is based on the real test questions and its interface is easy to use. The test practice software boosts the test scheme which stimulate the real test and boost multiple practice models, the historical records of the practice of PCNSE Study Materials and the self-evaluation function.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q330-Q335):

NEW QUESTION # 330

Which log type would provide information about traffic blocked by a Zone Protection profile?

- A. Data Filtering
- B. IP-Tag
- C. Traffic
- D. Threat

Answer: D

Explanation:

Explanation

<https://knowledgebase.paloaltonetworks.com/KCSArticleDetail?id=kA10g000000ClhzCAC>

* D is the correct answer because the threat log type would provide information about traffic blocked by a Zone Protection profile.

This is because Zone Protection profiles are used to protect the network from attacks, including common flood, reconnaissance attacks, and other packet-based attacks¹. These attacks are classified as threats by the firewall and are logged in the threat log². The threat log displays

* information such as the source and destination IP addresses, ports, zones, applications, threat types, actions, and severity of the threats².

NEW QUESTION # 331

A company has a PA-3220 NGFW at the edge of its network and wants to use active directory groups in its Security policy rules. There are 1500 groups in its active directory. An engineer has been provided 800 active directory groups to be used in the Security policy rules.

What is the engineer's next step?

- **A. Create two Group Include Lists, each with 400 Active Directory groups.**
- B. Create a Group Include List with the 800 Active Directory groups.
- C. Create a Group Mapping with 800 groups in the Group Include List.
- D. Create two Group Mappings, each with 400 groups in the Group Include List.

Answer: A

NEW QUESTION # 332

You are auditing the work of a co-worker and need to verify that they have matched the Palo Alto Networks Best Practices for Anti-Spyware Profiles.

For which three severity levels should single-packet captures be enabled to meet the Best Practice standard?

(Choose three.)

- A. Informational
- **B. High**
- C. Low
- **D. Medium**
- **E. Critical**

Answer: B,D,E

Explanation:

<https://docs.paloaltonetworks.com/best-practices/10-2/data-center-best-practices/data-center-best-practice-security-policy/how-to-create-data-center-best-practice-security-profiles/create-the-data-center-best-practice-anti-spyware-profile> The Palo Alto Networks Best Practices for Anti-Spyware Profiles recommend enabling single-packet captures (PCAP) for medium, high, and critical severity threats. This allows for capturing the first packet of the malicious traffic for further analysis and investigation. PCAP should not be enabled for low and informational severity threats, as they generate a relatively high volume of traffic and are not particularly useful compared to potential threats². NEW QUESTION # 333

An organization conducts research on the benefits of leveraging the Web Proxy feature of PAN-OS 11.0.

What are two benefits of using an explicit proxy method versus a transparent proxy method? (Choose two.)

- **A. It supports the X-Authenticated-User (XAU) header, which contains the authenticated username in the outgoing request.**
- B. Explicit proxy supports interception of traffic using non-standard HTTPS ports.
- C. No client configuration is required for explicit proxy, which simplifies the deployment complexity.
- **D. Explicit proxy allows for easier troubleshooting, since the client browser is aware of the existence of the proxy.**

Answer: A,D

NEW QUESTION # 334

Which option would an administrator choose to define the certificate and protocol that Panorama and its managed devices use for SSL/TLS services?

- A. Set up SSL/TLS under Policies > Service/URL Category>Service.
- B. Configure a Decryption Profile and select SSL/TLS services.
- C. Set up Security policy rule to allow SSL communication.
- **D. Configure an SSL/TLS Profile.**

Answer: D

Explanation:

SSL/TLS service profiles specify a server certificate and a protocol version or range of versions for firewall or Panorama services that use SSL/TLS (such as administrative access to the web interface). By defining the protocol versions, the profiles enable you to restrict the cipher suites that are available for securing communication with the client systems requesting the services.
