At QuestionsTube, you can read 300-445 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Cisco 300-445 practice questions. These free demo questions are parts of the 300-445 exam questions. Download and read them carefully, you will find that the 300-445 test questions of QuestionsTube will be your great learning materials online. Share some 300-445 exam online questions below.

2026 Latest Pass4guide 300-445 PDF Dumps and 300-445 Exam Engine Free Share: https://drive.google.com/open?id=14JID67t-j_aJWie7GB9bQoiXZ5fGFzKb

We have a special technical customer service staff to solve all kinds of consumers' problems on our 300-445 exam questions. If you have questions when installing or using our 300-445 practice engine, you can always contact our customer service staff via email or online consultation. They will solve your questions about 300-445 Preparation materials with enthusiasm and professionalism, giving you a timely response whenever you contact them.

Cisco 300-445 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Analysis: This domain encompasses diagnosing network issues like packet loss, congestion, routing, and jitter, plus end-device problems. It includes analyzing web application performance and identifying security threats such as DDoS attacks, DNS hijacking, and BGP hijacking.
Topic 2	<ul style="list-style-type: none">• Platforms and Architecture: This domain covers understanding monitoring agent types and placement, active versus passive monitoring, and ThousandEyes WAN Insights. It addresses Cisco platform integrations, metric baselines, and selecting appropriate integration methods and assurance platforms based on business requirements.

Topic 3	<ul style="list-style-type: none"> • Data Collection Implementation: This domain focuses on deploying enterprise and endpoint agents across infrastructure and end-user devices. It covers configuring network, DNS, voice, web, and endpoint tests using ThousandEyes and Meraki Insights, along with implementing synthetic web tests and authentication methods.
Topic 4	<ul style="list-style-type: none"> • Insights and Alerts: This domain addresses configuring alert rules based on network conditions and end-user experience factors. It covers selecting metrics for stakeholders, validating alerts, and recommending network optimization for capacity planning.

300-445 Valid Exam Pattern | 300-445 Frenquent Update

All people dream to become social elite. However, less people can take the initiative. If you spend less time on playing computer games and spend more time on improving yourself, you are bound to escape from poverty. Maybe our 300-445 real dump could give your some help. Our company concentrates on relieving your pressure of preparing the 300-445 Exam. Getting the certificate equals to embrace a promising future and good career development. Perhaps you have heard about our 300-445 exam question from your friends or news. Why not has a brave attempt? You will certainly benefit from your wise choice.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which integration type enables seamless data exchange between Cisco technologies and external systems using standardized protocols?

- A. Open telemetry
- B. SNMP integration
- **C. API integration**
- D. Alerting thresholds

Answer: C

Explanation:

API integration facilitates seamless data exchange between Cisco technologies and external systems using standardized protocols.

NEW QUESTION # 63

Which security issue affecting network performance can be identified by analyzing BGP routing data?

- A. Route leaking
- B. DDoS attacks
- C. DNS hijacking
- **D. BGP hijacking**

Answer: D

Explanation:

BGP hijacking is a security issue affecting network performance that can be identified by analyzing BGP (Border Gateway Protocol) routing data. BGP hijacking occurs when an unauthorized party announces IP address prefixes that they do not own, diverting traffic intended for those addresses to unauthorized destinations, leading to network congestion and performance degradation.

NEW QUESTION # 64

What is the purpose of recommending optimization for network capacity planning based on data interpretation?

- A. Reduce latency

- B. Improve reliability
- C. Enhance security
- D. Ensure scalability

Answer: D

Explanation:

The purpose of recommending optimization for network capacity planning based on data interpretation is to ensure scalability by identifying capacity bottlenecks, optimizing resource allocation, and planning for future growth and demand to maintain network performance and accommodate increasing workloads and traffic volumes.

NEW QUESTION # 65

Which type of test are we using for these dashboards (Executive and IT Operations)?

- A. Page Load
- B. Agent to server
- C. FTP
- D. HTTP server

Answer: A

Explanation:

According to the Designing and Implementing Enterprise Network Assurance (300-445 ENNA) data analysis guidelines, identifying the underlying test type is the first step in interpreting a dashboard. By observing the metrics displayed across both the Executive and IT Operations dashboards, we can definitively identify the test type as Page Load (Option B).

A Page Load test is a Web-layer test that uses a browser engine (Chromium) to fully render a page and collect advanced metrics beyond simple availability. Evidence for this test type in the dashboards includes:

* Page Completion Time: Displayed on the Executive dashboard map, this metric is specific to how much of the page successfully rendered.

* DOM Load Time: Found in the IT Operations dashboard, the Document Object Model (DOM) time is a browser-centric metric that measures when the page structure has finished loading.

* Waterfall Charts: While not a specific answer option, these are the foundation of Page Load tests, allowing for the timing of individual web components.

Simple HTTP Server tests (Option A) only measure availability and response codes, missing the rendering metrics seen here. Agent to server (Option C) is a network-layer test that provides path visualization but no browser-level data. FTP (Option D) is a protocol-specific test not used for web application monitoring.

Therefore, the presence of DOM and Page Completion metrics confirms the Page Load test type.

NEW QUESTION # 66

Why might an organization choose digest over basic authentication when configuring tests?
(Choose Two)

- A. Digest provides a higher level of security than basic authentication.
- B. Digest does not transmit passwords in clear text.
- C. Digest requires less configuration on the client side.
- D. Digest offers better performance under load.

Answer: A,B

NEW QUESTION # 67

.....

As long as you get to know our 300-445 exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our 300-445 study materials have grown to be more fluent and we have revised and updated 300-445 learning guide according to the latest development situation. In the guidance of teaching syllabus as well as theory and practice, our 300-445 training engine has achieved high-quality exam materials according to the tendency in the industry.
