Salesforce Certified Sharing and Visibility Architect certification is highly respected in the Salesforce ecosystem and is a valuable asset for professionals who are looking to advance their careers in this field.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q62-

Q67):

NEW QUESTION # 62

Universal Containers has selected a small and diverse group of users to review Inactive accounts. Given the Private sharing model, a public group was created and made available to this group of users. A sharing rule was created to make inactive Accounts visible to the public group. However, some of these users are reporting they don't see any of the Accounts that were shared with the public group.

what is the underlying Issue for these users?

- A. The page layout assigned to these marts to different than the Account owner
- B. The Accounts ire owned by users higher in the role hierarchy.
- C. The users have a permission set that only allow Accounts in "Active' status.
- D. The users are in profiles that have no access to the Account object.

Answer: D

Explanation:
Explanation
The underlying issue for these users who don't see any of the accounts that were shared with the public group is that they are in profiles that have no access to the Account object. If a user does not have Read permission on an object in their profile or permission set, they cannot access any records of that object, regardless of any sharing rules or manual sharing. The page layout assigned to these users does not affect their record visibility, only their field visibility and layout. The permission set that only allows accounts in Active status does not affect their record visibility, only their record filtering. The accounts being owned by users higher in the role hierarchy does not affect their record visibility, as sharing rules can grant access to records owned by any user in any role.

NEW QUESTION # 63

Which two reasons should the Architect consider regarding the use of Apex Sharing Reasons?
Choose 2 answers

- A. Ensuring the developer can more easily troubleshoot programmatic sharing.
- B. Ensuring there is additional criteria available for Criteria-Based Sharing.
- C. Ensuring the Share record is deleted upon ownership change.
- D. Ensuring the Share record is not deleted upon ownership change.

Answer: A,D

Explanation:
Explanation
The two reasons that the architect should consider regarding the use of Apex sharing reasons are A and B.
Option A allows the developer to more easily troubleshoot programmatic sharing, as they can identify which sharing records are created by which Apex code. Option B prevents the share record from being deleted upon ownership change, as Apex sharing reasons are not subject to recalculation by Salesforce. The other options are either incorrect or irrelevant.

NEW QUESTION # 64

Which features does Salesforce provide for restricting login access to the application?
Choose 2 answers.

- A. Profile-based IP restrictions
- B. Profile-based login hour restrictions
- C. Role-based IP restrictions
- D. Organization-wide login hour restrictions

Answer: A,B

NEW QUESTION # 65

Universal Containers has the following requirements:
* The Commercial Account and Consumer Account support departments should not collaborate.

* The Commercial and Consumer sales users roll up to the same VP of Sales, but there should be no collaboration between sales departments.
* The Commercial sales department should share its customers with the Commercial support department.
* The Consumer sales department shares its customers with the Consumer support department.
* The Commercial and Consumer support departments roll up to the same Support Director.
* The sales departments will remain the Account Owner for the Accounts that they sell to.
What is the recommended Org-Wide Sharing Default for Accounts, and how would the Architect enable proper Commercial and Consumer Sales to Support Account Sharing for this scenario?

- A. Private Account Sharing with Sharing Rules from Commercial Sales Group(s) to Commercial Support Groups(s) and Consumer Sales Group(s) to Consumer Support Group(s).
- B. Private Account Sharing with Sharing Rules from Commercial Sales Role(s) to Consumer Support Role(s) and Consumer Sales Role(s) to Commercial Support Role(s).
- C. Private Account Sharing with Sharing Rules from Commercial support Role(s) to Commercial Support Role(s) and Consumer Sales Role(s) to Consumer Support Role(s).
- D. Read-Only Account Sharing with Sharing Rules from Commercial Sales Role(s) to Consumer Support Group(s) and Consumer Sales Role(s) to Commercial Support Groups(s).

Answer: A

NEW QUESTION # 66
A company intends bring work from anywhere culture in a bid to improve productivity. Their sellers use wide variety of devices with different form factors. The company currently uses one page layout to display opportunity record details to the sellers. The Regional Vice President of Sales is complaining about incorrect alignment of data in opportunity records, making it difficult for some sellers. Which steps are recommended to rectify this?

- A. Use a visualforce override for Opportunity view action, identify the form factor onLoad action and display relevant layouts based on form factors.
- B. Use a custom LWC override for Opportunity view action, identify form factor onLoad action and display relevant layouts based on form factors.
- C. Use Dynamic Form to define different field sections applicable for different form factors of devices.

Answer: C

Explanation:
* Dynamic Forms: Salesforce Dynamic Forms enable administrators to create field sections that adapt based on device form factors (mobile, desktop, or tablet). This helps align data properly on different devices without requiring custom code.
* Why Option C is Correct:
* Dynamic Forms allow flexibility to display relevant fields and layouts for different devices without creating separate overrides or custom components.
* It adheres to the company's objective of improving productivity by offering a user-friendly interface across form factors.
* Why Others Are Incorrect:
* Option A: Custom LWC overrides add unnecessary complexity and require more maintenance.
* Option B: Visualforce is outdated for modern Salesforce solutions and not recommended for such use cases.
For more details, refer to the Salesforce documentation on Dynamic Forms: https://help.salesforce.com/
