About the upcoming PEGACPRSA22V1 exam, do you have mastered the key parts which the exam will test up to now? Everyone is conscious of the importance and only the smart one with smart way can make it. Maybe you are unfamiliar with our PEGACPRSA22V1 Latest Material, but our PEGACPRSA22V1 real questions are applicable to this exam with high passing rate up to 98 percent and over.

Pegasystems PEGACPRSA22V1 certification exam is designed for professionals who want to validate their skills and knowledge in the field of Pega Robotics. Certified Pega Robotics System Architect 22 certification exam is intended for system architects who have experience in designing and developing robotic process automation (RPA) solutions using Pega Robotics technology. PEGACPRSA22V1 exam tests the candidate's understanding of the Pega Robotics platform, its features and functionalities, and their ability to develop, deploy, and maintain RPA solutions using Pega Robotics.

The PEGACPRSA22V1 Certification Exam is recognized by leading companies worldwide, including Fortune 500 companies. Certified Pega Robotics System Architect 22 certification exam is a valuable asset for individuals looking to advance their careers in the field of Pega Robotic Automation.

## Choose VCETorrent Pegasystems PEGACPRSA22V1 Actual Dumps for Quick Preparation

Our accurate, reliable, and top-ranked Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam questions will help you qualify for your Pegasystems PEGACPRSA22V1 certification on the first try. Do not hesitate and check out VCETorrent excellent Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) practice exam to stand out from the rest of the others.

## Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q97-Q102):

### NEW QUESTION # 97

Your Pega Robot Manager indicates that one of your robots has an unhealthy status and has failed several assignments. What is the first step in troubleshooting an unhealthy robot?

- A. Modify the File Publisher Diagnostics settings to review a studio log of all the robot's actions.
- B. Open the Developer Toolbar and use the Clipboard tool to review the data available in the pyWorkPage.
- C. Confirm that the File Publisher Diagnostics settings are enabled and review a run-time log of all the robot's actions.
- D. Open the Developer Toolbar and use the Tracer to review a log of all the robot's actions.

**Answer: A**

### NEW QUESTION # 98

Before deploying your robotic project, you realize that the connection parameters (or Pega Robot Manager, the Pega Robot Runtime settings, and the application login credentials for Assisted Sign-On need updating to reflect the production environment. Arrange the three steps, as shown in the following figure, that you click in the correct order to access the necessary configuration files. (Choose Three).

□

**Answer:**

Explanation:

□ Explanation:

Tools

Folders

Files

Before deploying automations to a production environment, it's essential to update configuration files such as PegaRuntimeConfig.xml, CommonConfig.xml, and CredentialManagerConfig.xml. These files define how the robot connects to Pega Robot Manager, how the runtime behaves, and how credentials are managed for Assisted Sign-On.

In Pega Robot Studio, these files are accessed through the Debug menu path that navigates through several levels - starting from Tools, then Folders, and finally Files.

From the Pega Robotics System Design and Implementation Guide, section "Accessing and Editing Configuration Files for Deployment":

"Configuration files used by the Pega Robot Runtime environment can be accessed within Robot Studio through the Debug menu.

The access path is Debug # Tools # Folders # Files.

This navigation path opens the directory containing essential configuration files such as PegaRuntimeConfig.xml, CommonConfig.xml, and CredentialManagerConfig.xml, which can be modified to point to the correct environment (test, staging, or production)." Detailed Step Explanation:

\* Step 1: Tools

\* The Tools section under the Debug menu provides access to the environment utilities used for configuration and diagnostics.

\* Step 2: Folders

\* Under Tools, select Folders to navigate to the configuration folder where Robot Studio and Runtime files are stored.

\* Step 3: Files

\* Within Folders, click Files to open and view all editable XML/JSON configuration files required for environment updates (e.g., PegaRuntimeConfig.xml, CommonConfig.xml, CredentialManagerConfig.xml).

By following this sequence, developers can easily access and update environment settings before packaging the deployment.

Final Correct Sequence:

\* Tools

\* Folders

\* Files

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Managing Configuration Files and Environment Setup for Deployment section (Pega Robotics 19.1 and later).

### NEW QUESTION # 99

As a new development requirement, you must disable the Inventory link as shown in the following image.

The Inventory link must be available only to the Store Managers user group. The user group validation is already developed, and the web application has already completed interrogation.

How do you disable Inventory link for the remaining user group?

□

- A. In the Match Rules tab of the adapter, from the Selected Target pane, assign the Checked property to False.

- B. In Automation, on the created event of the Inventory link, set the Enabled property to False.
- C. In the Match Rules tab of the adapter, delete the Attribute Value Match rule associated to Inventory link.
- D. In Automation, in the created event of the Inventory link, set the IsCreated property to False.

**Answer: C**

#### NEW QUESTION # 100

You are working on a team project with several other architects. Each architect is assigned to create activities for several applications. You are ready to add your HR adapter project to the controller project.

Which three steps are required to add the HR project to the main solution? (Choose three.)

- A. Add an assembly reference to the HR project from the controller project.
- B. Create an activity to make a call to the HR project to log in to the application.
- C. Import the HR project to the controller project using the manage imported projects window.
- D. Add an existing project from the solution file using the solution explorer window.
- E. Update the controlling project's .Net framework property to match the HR adapter project.

**Answer: A,B,C**

#### NEW QUESTION # 101

While setting up Start My Day, the user makes some changes in the Manage Applications window to prioritize and manage the applications that are configured to launch using the Start My Day functionality.

Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. Pega Finance, CRM, Notepad, BankerInsight
- B. CRM, Notepad, BankerInsight
- C. Pega Finance, Notepad, BankerInsight
- D. CRM, BankerInsight

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Start My Day (SMD) functionality allows a user to define and launch all required applications at once when starting work. The configuration of these applications is performed in the Manage Applications window, where each application can be individually enabled or disabled for automatic startup.

According to the Pega Robotics System Design and Implementation Guide, in the section "Start My Day Configuration and Manage Applications", the documentation specifies the following:

"Applications configured for Start My Day will launch automatically when the Start My Day feature is invoked.

The Manage Applications dialog lists all project applications and determines which ones are launched using the 'Enabled' checkbox. Only applications marked as enabled will be started when the user initiates Start My Day. Applications that are listed but not enabled remain closed." The screenshot in the question shows the following configuration under the Manage Applications window:

Application

Enabled

Type

Path

Pega Finance

Yes

Adapter

BankerInsight

Yes

Adapter

C:\Program Files (x86)\CRM Setup\CRM.exe

CRM

No

Exe

C:\Program Files (x86)\CRM Setup\CRM.exe

Notepad

Yes

Exe

C:\Windows\notepad.exe

From this configuration, the Enabled column indicates that the following applications will start automatically when Start My Day is triggered:

- \* Pega Finance
- \* BankerInsight
- \* Notepad

The CRM application is not enabled and therefore will not launch.

Option Analysis:

- \* Option A (Pega Finance, Notepad, BankerInsight): Correct, as these are the enabled applications.
- \* Option B (CRM, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option C (CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option D (Pega Finance, CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

Therefore, the correct answer is A. Pega Finance, Notepad, BankerInsight.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Start My Day (SMD) Configuration and Application Management section (Pega Robotics 19.1 and later).

## NEW QUESTION # 102

.....

Candidates may have different ways to practice the PEGACPRSA22V1 study materials, some may like to practice in paper, and some may like to practice it in the computer. We have three versions for you to meet your different needs. If you like to practice in the paper, PEGACPRSA22V1 PDF version will be your choice, which can be printed into the hard one. If you like to practice on your computer, PEGACPRSA22V1 Soft test engine will be your best choice, besides it also stimulates the exam environment, you can experience the exam environment through this.
