PCNSE Valid Cram Materials | PCNSE Exam Consultant

Because our Palo Alto Networks PCNSE practice test is a web-based mock test, there is no need for software installation as it

works with all of the popular web browsers, including Internet Explorer, MS Edge, Firefox, Chrome, Opera, and Safari. Your preparation for the PCNSE Certification Exam will go more smoothly because our Palo Alto Networks PCNSE online practice exam precisely replicates the environment of the actual exam.

Palo Alto Networks Certified Security Engineer (PCNSE) certification is a highly esteemed credential in the cybersecurity industry that validates an individual's expertise in using Palo Alto Networks technologies. Palo Alto Networks Certified Network Security Engineer Exam certification is designed for security professionals who want to demonstrate their mastery of the PAN-OS 10.0 operating system and its associated features. The PCNSE Exam is known for being rigorous and challenging, requiring candidates to demonstrate their in-depth knowledge of different network security concepts and technologies.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q372-Q377):

NEW QUESTION # 372
When a malware-infected host attempts to resolve a known command-and-control server, the traffic matches a security policy with DNS sinkhole enabled, generating a traffic log.
What will be the destination IP address in that log entry?

- A. The IP address of the command-and-control server.
- B. The IP address of sinkhole.paloaltonetworks.com
- C. The IP address specified in the sinkhole configuration.
- D. The IP address of one of the external DNS servers identified in the anti-spyware database.
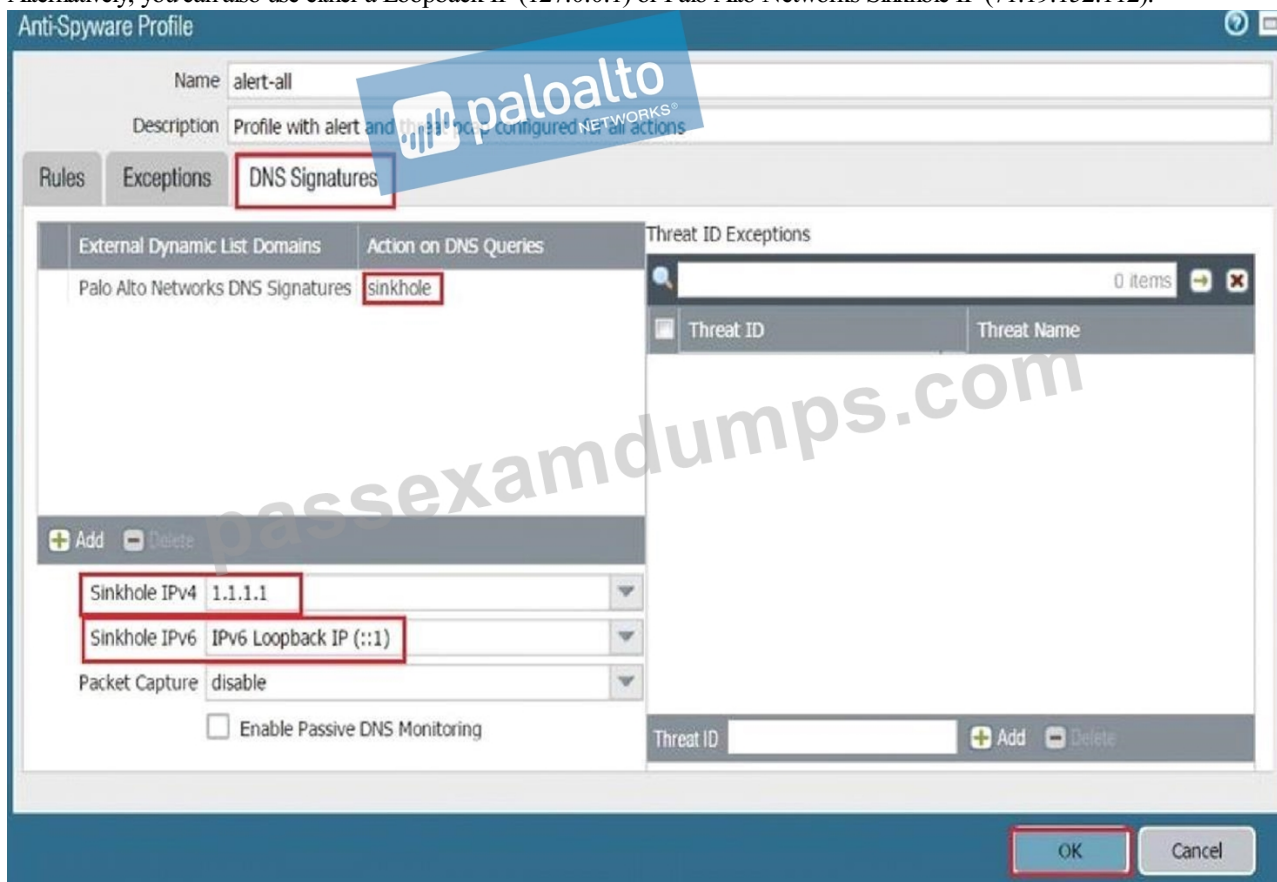

Answer: C

Explanation:
Change the "Action on DNS queries" to 'sinkhole'.
Click in the Sinkhole IPv4 field and type in the fake IP. The example here shows using 1.1.1.1 for simplicity, but as long as this fake IP is not used inside of the network, then it should be Ok.
Alternatively, you can also use either a Loopback IP (127.0.0.1) or Palo Alto Networks Sinkhole IP (71.19.152.112).

NEW QUESTION # 373

Given the following snippet of a WildFire submission log did the end-user get access to the requested information and why or why not?

TYPE	APPLICATION	ACTION	RULE	RULE UUID	BYTES	SEVERITY	CATEGORY	URL CATEGORY LIST	VERDICT
wildfire	web-browsing	allow	General Web Infrastructure	af55edce-93...		high			malicious
url	web-browsing	alert	General Web Infrastructure	af55edce-93		informational	private-ip-addresses	private-ip-addresses	

- A. No, because this is an example from a defeated phishing attack
- B. No, because the severity is high and the verdict is malicious.
- C. Yes, because the action is set to allow.
- D. Yes, because the action is set to alert

Answer: C

NEW QUESTION # 374

An engineer creates a set of rules in a Device Group (Panorama) to permit traffic to various services for a specific LDAP user group.
What needs to be configured to ensure Panorama can retrieve user and group information for use in these rules?

- A. A service route to the LDAP server
- B. A Master Device
- C. A User-ID agent on the LDAP server
- D. Authentication Portal

Answer: A

Explanation:
Explanation
To configure LDAP authentication on Panorama, you need to23:
* Define an LDAP server profile that specifies the connection details and credentials for accessing the LDAP server.
* Define an authentication profile that references the LDAP server profile and defines how users authenticate to Panorama (such as username format and password expiration).
* Define an authentication sequence (optional) that allows users to authenticate using multiple methods (such as local database, LDAP, RADIUS, etc.).
* Assign the authentication profile or sequence to a Panorama administrator role or a device group role.

NEW QUESTION # 375

Which data flow describes redistribution of user mappings?

- A. firewall to firewall
- B. User-ID agent to firewall
- C. Domain Controller to User-ID agent
- D. User-ID agent to Panorama

Answer: B

Explanation:
Explanation

NEW QUESTION # 376

What is a key step in implementing WildFire best practices?

- A. n a security-first network, set the WildFire size limits to the minimum value.
- B. Configure the firewall to retrieve content updates every minute.
- C. Ensure that a Threat Prevention subscription is active.
- D. In a mission-critical network, increase the WildFire size limits to the maximum value.

Answer: C

Explanation:
