# Reliable Analytics-DA-201 Test Cram - Analytics-DA-201 Reliable Exam Registration

What is more difficult is not only passing the Financials in Salesforce Certified Tableau Data Analyst (Analytics-DA-201) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the Salesforce Certified Tableau Data Analyst (Analytics-DA-201) certification. If you are going through the same tough challenge, do not worry because Getcertkey is here to assist you.

## Salesforce Certified Tableau Data Analyst Sample Questions (Q121-Q126):

### NEW QUESTION # 121

You have the following table.

You need each record to alternate between grey and white. What should you change in the Format Shading pane?

- A. the column banding size to 1
- B. the column banding size to 3
- C. the row banding size to 3
- **D. the row banding size to 1**

**Answer: D**

Explanation:

To have each record alternate between grey and white, you should change the row banding size to 1 in the Format Shading pane. This setting will ensure that each row has a different shading from the one above and below it, creating an alternating pattern of grey and white rows. References: The answer can be verified through practical application within Tableau or by consulting Tableau's official learning resources, such as Tableau Help: Format Shading or Tableau Training Pass: Formatting.

### NEW QUESTION # 122

A Data Analyst has a large data source that contains more than 10 million rows. Users can filter the rows by a field named Animal. The following is a sample of the data.

The analyst wants to ensure that every calculation is affected by including only animals of a particular type. Which type of filter should the analyst create on the worksheet?

- A. Extract
- B. Measure
- **C. Context**
- D. Table calculation

**Answer: C**

### NEW QUESTION # 123

You connect to a database server by using Tableau Prep. The database server has a data role named Role1.

You have the following field in the data.

You need to apply the Role1 data role to the Material field.

Which two actions should you perform? Choose two.

- A. From the More actions menu of Materials, filter the selected values.
- B. From the More actions menu of Materials, select Valid in the Show values section.
- **C. From the More actions menu of Materials, select Group Values, and then select Spelling.**
- **D. For the data type of the Material field, select Custom, and then select Role1.**

**Answer: C,D**

Explanation:

To apply a custom data role to a field, you need to select the data type of the field and then choose the data role from the list of available roles. This will validate the values in the field against the data role and mark any invalid values with a red exclamation mark. To fix the invalid values, you can use the Group Values option and select the Spelling algorithm, which will group values that are

close in spelling and replace them with the most frequent value in the group. This will help you standardize the values in the Material field and match them with the Role1 data role. References: The information is based on the following sources:

\* Use Data Roles to Validate your Data - Tableau

\* New in Tableau Prep: Automatically identify data quality issues with Data Roles

#### NEW QUESTION # 124

You have the following dataset.

Which Level of Detail (LOD) expression should you use to calculate the grand total of all the regions?

- A. {FIXED: SUM Sales}
- B. {FIXED: TOTAL (Sales)}
- C. {Fixed: [Region]: TOTAL Sales}
- D. {FIXED: [Region] SUM Sales}

**Answer: A**

Explanation:

The correct Level of Detail (LOD) expression to calculate the grand total of sales across all regions would be {SUM(Sales)}. The FIXED expression is not needed here because we are not computing the sum at the level of each region, but rather the total sum across all regions. The FIXED keyword is typically used to aggregate at a certain level regardless of the view. [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_tablecalculation.htm#TOTAL](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#TOTAL)

#### NEW QUESTION # 125

A Data Analyst has the following dataset.

□ The analyst wants to create a parameter to dynamically filter the data to produce the following results based on quantity being above X value.

□ Which two types of parameters should the analyst use to produce the results? (Choose two)

- A. Boolean
- B. Float
- C. Integer
- D. Date

**Answer: B,C**

#### NEW QUESTION # 126

.....

If you would like to create a second steady stream of income and get your business opportunity in front of more qualified people, please pay attention to Salesforce Analytics-DA-201 latest study dumps. Analytics-DA-201 useful exam torrents are valid and refined from the previous actual test. You will find the Getcertkey Analytics-DA-201 valid and reliable questions & answers are all the key questions, unlike other vendors offering the dumps with lots of useless questions, wasting the precious time of candidates. Getcertkey Salesforce free demo is available and you can download and have a try, then you can make decision to buy the Salesforce exam dumps. Do study plan according to the Salesforce exam study material, and arrange your time and energy reasonably. I believe that an efficiency and reasonable exam training can help you to pass the Analytics-DA-201 Exam successfully.
