IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q67-Q72):

NEW QUESTION # 67

A focus group is a form of which type of research?

- A. Qualitative
- B. Statistical
- C. Theoretical
- D. Quantitative

Answer: A

NEW QUESTION # 68

What requirements are good candidates for reuse?

- A. Requirements at low levels of abstraction
- B. Requirements with specific references to departments
- C. Requirements without direct ties to a particular tool
- D. Requirements expressed in more detail

Answer: C

Explanation:

Requirements that are good candidates for reuse are those that are not tied to a specific tool, technology, or system. These requirements are generally applicable across various contexts and can be used in multiple projects without significant changes. They are typically high-level business requirements that describe what the business needs without prescribing how to achieve it. This makes them flexible and adaptable to different situations, which is essential for reuse.

The concept of reusable requirements is discussed in the context of Business Analysis, where it is emphasized that requirements should be general enough to apply to multiple situations while still being specific enough to provide value. They should also be stable, meaning they are unlikely to change over time

1 .

NEW QUESTION # 69

Video conferencing, electronic calendars, and electronic voting are examples of:

- A. knowledge management tools.
- B. word processing tools.
- C. mapping tools.
- D. collaboration tools.

Answer: D

Explanation:

Video conferencing, electronic calendars, and electronic voting are all tools that facilitate collaboration among team members by allowing them to communicate and make decisions together, regardless of their physical location. These tools support the sharing of information and resources, coordination of activities, and collective decision-making, which are essential aspects of collaboration in business analysis.

The BABOK Guide v3 mentions collaboration tools as part of the techniques to be used for effective business analysis. These tools are part of the underlying competencies that a business analyst should possess to facilitate and maintain engagement with stakeholders 1 .

NEW QUESTION # 70

The approach that defines how requirements will be re-used is the:

- A. approach to identifying business analysis improvements.
- B. governance approach.
- C. information management approach.
- D. business analysis approach.

Answer: C

Explanation:

The information management approach outlines the methods by which business analysis information, including requirements and models, will be stored, maintained, and accessed for future use. This approach ensures that the valuable insights gained from business analysis are not lost and can be effectively reused in subsequent projects or processes, thereby saving time and resources.

NEW QUESTION # 71

In which activity would a business analyst (BA) consider using an organizational Center of Excellence?

- A. Understanding the stakeholders concerns and interests
