Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36

You have recently enabled the keyword audit feature for expenses to help automate the detection of potential policy violations or fraudulent activity within expense reports. After the feature is enabled all expense reports containing keywords in certain fields are selected for audit.

Which two Expense Item fields are included in this feature?

- A. Itemization Type
- B. Expense Type
- C. Location
- D. Description**
- E. Merchant Name**

Answer: D,E

NEW QUESTION # 37

You are an Expenses Manager at a large company and need to address complaints from your corporate card provider about delayed transaction payments incurred by former employees who are now inactive. To ensure timely and efficient processing of valid business charges posted to an inactive employee's corporate credit card, you can run the following two processes: Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees.

Which two capabilities included in these processes?

- A. Employee Termination Date**
- B. Grace Period**
- C. Outstanding Cash Advances

- D. Individual Pay Liability

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, managing corporate card transactions for inactive employees is crucial to maintain timely payments and avoid disputes with card providers. The processes Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees are designed to handle such scenarios effectively.

Key Capabilities of These Processes:

Employee Termination Date (Option A):

Role in Processing: The system identifies inactive employees based on their termination or inactive status. When the Process Corporate Card Transactions for Inactive Employees process is executed, it scans for employees whose status has changed to inactive (e.g., due to termination or unpaid leave) and identifies any outstanding corporate card transactions associated with them.

Reference:

Grace Period (Option D):

Role in Processing: A grace period can be configured to allow the system to process transactions that are posted after an employee's termination date. This ensures that any legitimate business expenses incurred shortly before termination are not overlooked. The default grace period is set to 0 days but can be adjusted as needed.

Configuration Path: To modify the grace period, navigate to the Manage Expenses System Options page:

In the Setup and Maintenance work area, select:

Offering: Financials

Functional Area: Expenses

Task: Manage Expenses System Options

Options Not Included:

Outstanding Cash Advances (Option B):

This pertains to any cash amounts advanced to employees that have not yet been reconciled. The processes in question focus on corporate card transactions and do not directly address outstanding cash advances.

Individual Pay Liability (Option C):

This refers to scenarios where employees are responsible for paying their corporate card bills directly (Individual Pay). The processes mentioned are designed to handle transactions for inactive employees, regardless of the payment liability setup (Individual Pay, Company Pay, or Both Pay).

By utilizing these processes and configuring the grace period appropriately, companies can ensure that all valid business expenses incurred by inactive employees are processed efficiently, thereby maintaining good standing with corporate card providers and ensuring accurate financial reporting.

How Corporate Card Transactions for Inactive Employees Are Processed

Answer: C,E,F

NEW QUESTION # 39

You are a global process owner at a large company that handles a heavy amount of expenses due to travel and entertainment reimbursements. Employees want to have a streamlined expense reimbursement process because they spend a lot of time submitting their expense reports. You are very excited to introduce them to Oracle's functionality allowing them to create expenses directly from emails that a user forwards with receipt attachments.

Which two options can you set the Expense Attachment Preference to, when configuring this functionality in the application?

- A. Attach the primary receipt from the email.
- B. Attach the email.
- C. Attach multiple receipts from the email.
- D. Attach the invoice.
- E. Attach custom email.

Answer: A,B

NEW QUESTION # 40

Adaptive Intelligence (AI), integrated with Oracle Payables Cloud, supports sophisticated data science that drives early payment discount offers.

Which of these is NOT a feature of early payment discounts?

- A. Variable annual percentage rate (APR), based on "days paid early," is used to determine the discount amount.
- B. Eligible discounts decrease on a sliding scale based on the supplier's discretion.
- C. The earlier the payment, the greater the discount.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth

Oracle Payables Cloud, enhanced with Adaptive Intelligence (AI), offers a feature known as Early Payment Discounts. This functionality enables organizations to optimize their cash flow by taking advantage of discounts offered for early invoice payments.

Key Features of Early Payment Discounts:

Variable Annual Percentage Rate (APR) Based on "Days Paid Early" (Option B):

The discount amount is calculated using a variable APR, which is determined based on the number of days the payment is made ahead of the due date. The earlier the payment is made, the higher the discount percentage applied.

Reference:

The Earlier the Payment, the Greater the Discount (Option C):

This principle aligns with the time value of money, where paying invoices earlier results in greater discounts. The discount decreases as the payment date approaches the invoice due date.

Clarification of Option A:

Eligible Discounts Decrease on a Sliding Scale Based on the Supplier's Discretion:

While the discount offered decreases over time, this scaling is typically predefined in the payment terms agreed upon between the buyer and the supplier, rather than being adjusted at the supplier's discretion on a case-by-case basis. The terms are set during the establishment of the early payment discount program and are systematically applied, ensuring consistency and predictability in discount calculations.

Therefore, Option A is not a feature of the early payment discounts as implemented in Oracle Payables Cloud with Adaptive Intelligence.
