About choosing the perfect AI-102 study material, it may be reflected in matters like quality, prices, after-sale services and so on. AI-102 exam simulation is accumulation of knowledge about the exam strictly based on the syllabus of the exam. They give users access to information and exam, offering simulative testing environment when you participate it like in the classroom. And if you are afraid of the lack experience of the exam, our AI-102 Practice Engine will be your good choice.

It is acknowledged that there are numerous AI-102 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for AI-102 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our AI-102 Actual Exam is. To let you have a general idea about the shining points of our training materials I would like to list three of the advantages of our training for you.

Pass Guaranteed Quiz 2026 Microsoft AI-102: Marvelous Designing and Implementing a Microsoft Azure AI Solution Reliable Test Sample

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test AI-102 certification can make you realize your dream and find a satisfied job. Our study materials are a good tool that can help you pass the exam easily. You will feel convenient if you buy our product not only because our AI-102 Exam Prep is of high pass rate but also our service is also perfect. What's more, our update can provide the latest and most useful AI-102 exam guide to you, in order to help you learn more and master more.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q326-Q331):

NEW QUESTION # 326

You plan to build a chatbot to support task tracking.

You create a Language Understanding service named lu1.

You need to build a Language Understanding model to integrate into the chatbot. The solution must minimize development time to build the model.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

area and arrange them in the correct order. (Choose four.)

Answer:

Explanation:

Explanation

1. Add a new application
2. Add a prebuilt domain intent ToDo (it has already utterances so we can skip this step)
3. Train
4. Publish

NEW QUESTION # 327

You have an Azure subscription that contains an Azure OpenAI resource named All.

You plan to develop a console app that will answer user questions.

You need to call All and output the results to the console.

How should you complete the code? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 328

You have an Azure subscription that contains an Azure OpenAI resource named All and an Azure AI Content Safety resource named CS1.

You build a chatbot that uses All to provide generative answers to specific questions and CS1 to check input and output for objectionable content. You need to optimize the content filter configurations by running tests on sample questions.

Solution: From Content Safety Studio, you use the Moderate text content feature to run the tests.

Does this meet the requirement?

- A. No
- **B. Yes**

Answer: B

NEW QUESTION # 329

You are building an Azure Cognitive Search custom skill.

You have the following custom skill schema definition.

For each of the following statements, select Yes if the statement. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

Once you have defined a skillset, you must map the output fields of any skill that directly contributes values to a given field in your search index.

Box 2: Yes

The definition is a custom skill that calls a web API as part of the enrichment process.

Box 3: No

For each organization identified by entity recognition, this skill calls a web API to find the description of that organization.

NEW QUESTION # 330

You are building a retail chatbot that will use a QnA Maker service.

You upload an internal support document to train the model. The document contains the following question: "What is your warranty period?" Users report that the chatbot returns the default QnA Maker answer when they ask the following question: "How long is the warranty coverage?" The chatbot returns the correct answer when the users ask the following question: "What is your warranty period?" Both questions should return the same answer.

You need to increase the accuracy of the chatbot responses.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose three.)

Answer:

Explanation:

Explanation:

This scenario is about improving the accuracy of QnA Maker responses when user phrasing is different but semantically the same.

- * Uploaded document contains: "What is your warranty period?"
- * Users ask: "How long is the warranty coverage?"
- * QnA Maker fails because it does not automatically equate these two phrasings.
- * Both must map to the same answer.

Problem

- * Add alternative phrasing to the question and answer (QnA) pair.
- * In QnA Maker, you can add synonyms or paraphrases for a question.
- * Example: Add "How long is the warranty coverage?" as an alternative phrasing to the existing QnA pair.
- * This ensures the system treats both phrasings as the same question.
- * Retrain the model.
- * After modifying the knowledge base with new alternatives, you must retrain the model.
- * This step incorporates the updates into the QnA Maker service.
- * Republish the model.
- * To make the changes live and accessible by the chatbot endpoint, the retrained model must be republished.
- * Without republishing, the chatbot will still use the old knowledge base.

Correct Sequence of Actions

- * Add a new QnA pair # Not needed, because we want both questions to map to the same existing answer, not duplicate answers.
- * Add additional questions to the document # That's not required when QnA Maker already supports adding alternative phrasing within the portal or JSON editor.

Actions That Are Not Required

- * Add alternative phrasing to the question and answer (QnA) pair.
- * Retrain the model.
- * Republish the model.

Final Answer (Sequence)

- * QnA Maker - Add alternative phrasing
- * Train and publish a QnA Maker knowledge base
