CompTIA Security+ Certification Exam SY0-701 Practice Test 1

► Which of the following answers can be used to describe technical security controls? (Select 3 answers)

- ☒ ☒ ☒ Focused on protecting material assets (X Your answer)
- ☐ ☒ ☒ Sometimes called logical security controls (O Missed)
- ☒ ☒ ☒ Executed by computer systems (instead of people) (X Your answer)
- ☐ ☐ ☐ Also known as administrative controls
- ☐ ☒ ☒ Implemented with technology (O Missed)
- ☒ ☐ ☐ Primarily implemented and executed by people (as opposed to computer systems) (X Your answer)

■ Your answer to this question is incorrect or incomplete.

► Which of the answers listed below refer to examples of technical security controls? (Select 3 answers)

- ☐ ☐ ☐ Security audits
- ☐ ☒ ☒ Encryption (O Missed)
- ☐ ☐ ☐ Organizational security policy
- ☐ ☒ ☒ IDSs (O Missed)
- ☒ ☐ ☐ Configuration management
- ☐ ☒ ☒ Firewalls (O Missed)

■ Your answer to this question is incorrect or incomplete.

► Which of the following answers refer to the characteristic features of managerial security controls? (Select 3 answers)

With the help of our SY0-701 test material, users will learn the knowledge necessary to obtain the CompTIA certificate and be competitive in the job market and gain a firm foothold in the workplace. Our SY0-701 quiz guide' reputation for compiling has created a sound base for our beautiful future business. We are clearly concentrated on the international high-end market, thereby committing our resources to the specific product requirements of this key market sector, as long as cater to all the users who wants to get the test CompTIA certification.

CompTIA SY0-701 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Security Operations: This topic delves into applying common security techniques to computing resources, addressing security implications of proper hardware, software, and data asset management, managing vulnerabilities effectively, and explaining security alerting and monitoring concepts. It also discusses enhancing enterprise capabilities for security, implementing identity and access management, and utilizing automation and orchestration for secure operations.

Topic 2	<ul style="list-style-type: none"> • Threats, Vulnerabilities, and Mitigations: In this topic, you'll find discussions comparing threat actors and motivations, explaining common threat vectors and attack surfaces, and outlining different types of vulnerabilities. Moreover, the topic focuses on analyzing indicators of malicious activity in scenarios and exploring mitigation techniques used to secure enterprises against threats.
Topic 3	<ul style="list-style-type: none"> • General Security Concepts: This topic covers various types of security controls, fundamental security concepts, the importance of change management processes in security, and the significance of using suitable cryptographic solutions.
Topic 4	<ul style="list-style-type: none"> • Security Architecture: Here, you'll learn about security implications across different architecture models, applying security principles to secure enterprise infrastructure in scenarios, and comparing data protection concepts and strategies. The topic also delves into the importance of resilience and recovery in security architecture.
Topic 5	<ul style="list-style-type: none"> • Security Program Management and Oversight: Finally, this topic discusses elements of effective security governance, the risk management process, third-party risk assessment, and management processes. Additionally, the topic focuses on security compliance requirements, types and purposes of audits and assessments, and implementing security awareness practices in various scenarios.

SY0-701 Minimum Pass Score | SY0-701 Reliable Exam Bootcamp

Sometimes choice is greater than important. Good choice may do more with less. If you still worry about your exam, our SY0-701 braindump materials will be your right choice. Our exam braindumps materials have high pass rate. Most candidates purchase our products and will pass exam certainly. If you want to fail exam and feel depressed, our SY0-701 braindump materials can help you pass exam one-shot. ActualPDF sells high passing-rate preparation products before the real test for candidates.

CompTIA Security+ Certification Exam Sample Questions (Q732-Q737):

NEW QUESTION # 732

A business uses Wi-Fi with content filtering enabled. An employee noticed a coworker accessed a blocked site from a work computer and reported the issue. While investigating the issue, a security administrator found another device providing internet access to certain employees. Which of the following best describes the security risk?

- A. A rogue access point is allowing users to bypass controls.
- B. A valid access point is being jammed to limit availability.
- C. Employees who have certain credentials are using a hidden SSID.
- D. The host-based security agent is not running on all computers.

Answer: A

Explanation:

The presence of another device providing internet access that bypasses the content filtering system indicates the existence of a rogue access point. Rogue access points are unauthorized devices that can create a backdoor into the network, allowing users to bypass security controls like content filtering. This presents a significant security risk as it can expose the network to unauthorized access and potential data breaches.

References =

* CompTIA Security+ SY0-701 Course Content: Rogue access points are highlighted as a major security risk, allowing unauthorized access to the network and bypassing security measures.

NEW QUESTION # 733

A software development manager wants to ensure the authenticity of the code created by the company. Which of the following options is the most appropriate?

- A. Performing code signing on company-developed software
- B. Testing input validation on the user input fields
- C. Ensuring secure cookies are use
- D. Performing static code analysis on the software

Answer: A

Explanation:

Explanation

Code signing is a technique that uses cryptography to verify the authenticity and integrity of the code created by the company. Code signing involves applying a digital signature to the code using a private key that only the company possesses. The digital signature can be verified by anyone who has the corresponding public key, which can be distributed through a trusted certificate authority. Code signing can prevent unauthorized modifications, tampering, or malware injection into the code, and it can also assure the users that the code is from a legitimate source. NEW QUESTION # 734

An organization wants to implement a secure solution for remote users. The users handle sensitive PHI on a regular basis and need to access an internally developed corporate application. Which of the following best meet the organization's security requirements? (Choose two.)

- A. Local administrative password
- B. Perimeter network
- C. Jump server
- D. WAF
- E. VPN
- F. MFA

Answer: E,F

NEW QUESTION # 735

A technician wants to improve the situational and environmental awareness of existing users as they transition from remote to in-office work. Which of the following is the best option?

- A. Update the content of new hire documentation.
- B. Send out periodic security reminders.
- C. Modify the content of recurring training.D Implement a phishing campaign

Answer: C

Explanation:

Recurring training is a type of security awareness training that is conducted periodically to refresh and update the knowledge and skills of the users. Recurring training can help improve the situational and environmental awareness of existing users as they transition from remote to in-office work, as it can cover the latest threats, best practices, and policies that are relevant to their work environment. Modifying the content of recurring training can ensure that the users are aware of the current security landscape and the expectations of their roles. NEW QUESTION # 736

A company is working with a vendor to perform a penetration test Which of the following includes an estimate about the number of hours required to complete the engagement?

- A. SOW
- B. NDA
- C. BPA
- D. SLA

Answer: A

Explanation:

A statement of work (SOW) is a document that defines the scope, objectives, deliverables, timeline, and costs of a project or service. It typically includes an estimate of the number of hours required to complete the engagement, as well as the roles and responsibilities of the parties involved. A SOW is often used for penetration testing projects to ensure that both the client and the vendor have a clear and mutual understanding of what is expected and how the work will be performed. A business partnership agreement (BPA), a service level agreement (SLA), and a non-disclosure agreement (NDA) are different types of contracts that may be related to a penetration testing project, but they do not include an estimate of the number of hours required to complete the engagement.
